Overview

The R90C 4-Port Converter connects to four IO-Link devices and provides access to IO-Link data and functionality via a Modbus RTU connection.

Modbus registers allow for access to both IO-Link devices and their functions:

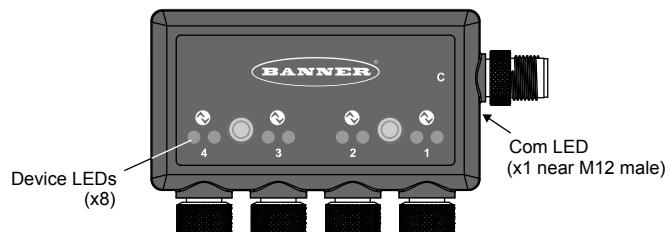

- Process Data In
- Process Data Out
- Connected device information
- ISDU data
- Discrete I/O configuration
- IO-Link events
- Data storage
- SIO mode

For more information, see p/n 221399 *IO-Link to ModBus Converter - Device Register Map*.

Status Indicators

The R90C-4K-MQ IO-Link Master/Modbus Converter has matching RGB LED indicators on both sides for each IO-Link device port to allow for installation needs and still provide adequate indication visibility. There is also an Amber LED indicator on both sides of the converter, which is specific to the Modbus communication.

Figure 1. R90C 4-Port Converter status indicators – front and back

IO-Link Device Port 1, 2, 3, and 4 RGB LEDs	
Indication	Status
Off	Deactivated port
Flashing Green	Waiting for IO-Link device
Solid Green	IO-Link device is connected
Flashing Red	Validation Error
Solid Yellow	Signal high in SIO-mode
Solid Blue	Processor communication error

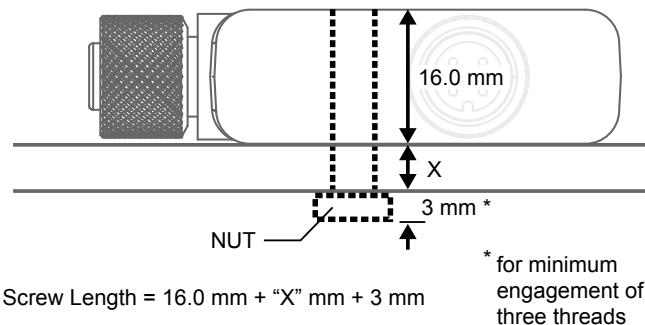

Modbus Communication Amber LED	
Indication	Status
Flashing Amber (4 Hz)	Modbus communications are active
Solid Amber (2 seconds) to Off	Modbus communications are lost after connection
Solid Amber (2 seconds) to Flashing Amber (4 Hz)	Modbus communications momentarily lost, but then reestablished
Solid Amber	Modbus communications are intermittent, or communications error occurs more frequently once every 2 seconds
Off	Modbus communications are not present

Installation Instructions

Mechanical Installation

Install the R90C 4-Port Converter to allow access for functional checks, maintenance, and service or replacement.

All mounting hardware is supplied by the user. Fasteners must be of sufficient strength to guard against breakage. Use of permanent fasteners or locking hardware is recommended to prevent the loosening or displacement of the device. The mounting hole (4.5 mm) in the R90C 4-Port Converter accepts M4 (#8) hardware. See the figure below to help in determining the minimum screw length.

CAUTION: Do not overtighten the R90C 4-Port Converter's mounting screw during installation. Overtightening can affect the performance of the R90C 4-Port Converter.
