

# Technical Information

## Liquiphant FTL31

Vibronic

Point level switch for liquids

### Application

The Liquiphant FTL31 is a point level switch for liquids and is used in tanks, vessels and pipes.

It is used for overfill protection or pump protection in cleaning and filter systems as well as in cooling and lubrication vessels, for instance.

Ideal for applications in which float switches or conductive, capacitance and optical sensors have been used up to now. The Liquiphant FTL31 also works in areas where these measuring principles are not suitable due to conductivity, buildup, turbulence, flow conditions or air bubbles.

The Liquiphant FTL31 can be used for process temperatures up to:

- 100 °C (212 °F)
- 150 °C (302 °F)

Not suitable for hazardous areas.

The use of the Liquiphant FTL33 is recommended for hygiene areas.

### Your benefits

- Operational safety, reliability and universal application thanks to the tuning fork measuring principle
- Robust stainless steel housing (316L), optionally available with M12x1 plug with IP69 protection
- External function test with test magnet
- Onsite function check possible thanks to LED indication
- Compact design for easy installation even in confined conditions or hard-to-access areas

## Function and system design

### Measuring principle

A piezoelectric drive causes the tuning fork of the device to vibrate at its resonance frequency. When the tuning fork is immersed in a liquid, its intrinsic frequency changes due to the change in density of the surrounding medium. The electronics system in the point level switch monitors the resonance frequency and indicates whether the tuning fork is vibrating in air or is covered by liquid.

### Measuring system

The measuring system consists of a point level switch, e.g. for connection to programmable logic controllers (PLC).

Fig. 1 Installation examples

- 1 Overfill protection or upper level detection (maximum safety)
- 2 Dry running protection for pump (minimum safety)
- 3 Lower level detection (minimum safety)

## Input

<b>Measured variable</b>	Density
<b>Measuring range</b>	> 0.7 g/cm <sup>3</sup> (optionally available: > 0.5 g/cm <sup>3</sup> )

## Output

<b>Switch output</b>	Switching behavior: On/Off <b>Function</b> 3-wire DC-PNP: Positive voltage signal at the switch output of the electronics (PNP), switching capacity 200 mA 2-wire AC/DC: Load switching in the power supply line, switching capacity 250 mA
<b>Operating modes</b>	The device has two operating modes: maximum safety (MAX) and minimum safety (MIN). By choosing the corresponding operating mode, the user ensures that the device also switches in a safety-oriented manner even in an alarm condition, e.g. if the power supply line is disconnected. <ul style="list-style-type: none"><li>■ <b>Maximum safety (MAX)</b> The device keeps the electronic switch closed as long as the liquid level is below the fork. Sample application: overfill prevention</li><li>■ <b>Minimum safety (MIN)</b> The device keeps the electronic switch closed as long as the fork is immersed in liquid. Sample application: Dry running protection for pumps</li></ul> <p>The electronic switch opens if the limit is reached, if a fault occurs or the power fails (quiescent current principle).</p>

## Power supply

<b>Supply voltage</b>	<b>DC-PNP</b> 10 to 30 V DC, 3-wire <b>AC/DC</b> 20 to 253 VAC/DC, 2-wire
<b>Power consumption</b>	<b>DC-PNP</b> < 975 mW <b>AC/DC</b> < 850 mW
<b>Current consumption</b>	<b>DC-PNP</b> < 15 mA <b>AC/DC</b> < 3.8 mA
<b>Residual ripple</b>	<b>DC-PNP</b> 5 V <sub>ss</sub> 0 to 400 Hz <b>AC/DC</b> —
<b>Residual voltage</b>	<b>DC-PNP</b> U < 3 V (for switched through transistor) <b>AC/DC</b> —

**Electrical connection**

Two electronic versions and three different connections are available for the device.

- Electronic version 3-wire DC-PNP with connection; M12 plug, valve plug or cable
- Electronic version 2-wire AC/DC with connection; valve plug or cable

A fine-wire fuse is necessary for operation: 500 mA slow-blow.

**Electronic version 3-wire DC-PNP**

3-wire DC-PNP is preferably used in conjunction with programmable logic controllers (PLC), DI modules as per EN 61131-2. Positive signal at the switch output of the electronics (PNP).

Voltage source: non-hazardous contact voltage or Class 2 circuit (North America).

*Connection with M12 plug*

Depending on the analysis of the switch outputs, the device works in the MAX (maximum safety) or MIN (minimum safety) mode.

 A cable is optionally available

 2 M12 plug

*Function monitoring with M12 plug*

Using a two-channel analysis, function monitoring of the sensor can be implemented in addition to level monitoring, e.g. per relay switch, PLC, AS-i Bus I/O module.

When both outputs are connected, the MIN and MAX outputs assume opposite states when the device is operating fault-free (XOR). In the event of an alarm condition or a line break, both outputs are deenergized.

Connection for function monitoring using XOR operation

**Electronic version 2-wire AC/DC**

The load is switched via an electronic switch directly in the power supply circuit. Always connect in series with a load!

Not suitable for connection to low-voltage PLC inputs!

*Selection tool for relays*

Fig. 5 Minimum rated power of the load

P/S Rated power in [W] / [VA]

U Operating voltage in [V]

Item	Supply voltage	Rated power	
		min	max
P1 AC mode	24 V	> 1.3 VA	< 6 VA
	110 V	> 1.5 VA	< 27.5 VA
	230 V	> 2.5 VA	< 57.5 VA
P2 DC mode	24 V	> 0.7 W	< 6 W
	48 V	> 0.9 W	< 12 W
	60 V	> 1.5 W	< 15 W

Relays with a lower rated power can be operated by means of an RC module connected in parallel (optional).

*Connection with valve plug*

Depending on the assignment of the plug or the wiring of the cable, the device works in either the MAX or MIN operating mode.

### *Connection with cable*

Depending on the assignment of the plug or the wiring of the cable, the device works in either the MAX or MIN operating mode.

When the cable is wired, one wire of the cable does not have any function in each of the operating modes (brown in the case of MIN, and gray in the case of MAX). The cable with no function must be secured against inadvertent contact.

C Cable 5 m (16 ft); secured in place on delivery and cannot be disassembled

**Cable specification**

- Valve plug
  - Cable cross-section: max. 1.5 mm<sup>2</sup> (AWG 16)
  - Ø 3.5 to 8 mm (0.14 to 0.26 in)
- M12 plug: IEC 60947-5-2
- Cable (3LPE)
  - Cable cross-section: 0.75 mm<sup>2</sup> (AWG 20)
  - Ø 6 to 8 mm (0.24 to 0.31 in)
  - Material: PUR

**Overvoltage protection**

Overvoltage category II

## Performance characteristics

<b>Reference operating conditions</b>	Ambient temperature: +25 °C (+77 °F) Process pressure: 1 bar (14.5 psi) Fluid: Water (density: approx. 1 g/cm <sup>3</sup> , viscosity 1 mm <sup>2</sup> /s) Medium temperature: 25 °C (77 °F) Density setting: > 0.7 g/cm <sup>3</sup> Switching time delay: Standard (0.5 s, 1 s)
<b>Switch point</b>	13 mm (0.51 in)±1 mm
<b>Hysteresis</b>	max. 3 mm (0.12 in)
<b>Non-repeatability</b>	±1 mm (0.04 in) in accordance with DIN 61298-2
<b>Influence of ambient temperature</b>	Negligible
<b>Influence of medium temperature</b>	-25 µm (984 µin)/°C
<b>Influence of medium pressure</b>	-20 µm (787 µin)/bar
<b>Switching delay</b>	<ul style="list-style-type: none"> <li>■ 0.5 s when tuning fork is covered</li> <li>■ 1.0 s when tuning fork is uncovered</li> <li>■ Optionally available: 0.2 s; 1.5 s or 5 s (when the tuning fork is covered and uncovered)</li> </ul>
<b>Switch-on delay</b>	max. 3 s
<b>Measuring frequency</b>	approx. 1 100 Hz in air
<b>Measured error</b>	In event of device change: ±2 mm (0.08 in) as per DIN 61298-2

## Installation

### Orientation

The point level switch can be installed in any position in a vessel, pipe or tank. Foam formation does not affect the function.

Fig 8 Installation examples

- 1 Overfill protection or upper level detection (maximum safety)
- 2 Dry running protection for pump (minimum safety)
- 3 Lower level detection (minimum safety)

### Installation instructions

#### Switch point

The switch point (A) on the sensor depends on the orientation of the point level switch (water +25 °C (+77 °F), 1 bar (14.5 psi)).

Fig 9 Orientation: vertical from above, vertical from below, horizontal; dimensions in mm (in)

#### Short tube version

The use of the short tube ensures that the switch point is at the same level as in the previous Liquiphant FTL260 model when an identical thread is selected. In this way, the device can be replaced quickly and easily. (Applies for process connections G 1" weld-in adapter for flush mount installation, MNPT 1" and R 1")

### Installation in pipes

During installation, pay attention to the position of the fork in order to minimize turbulence in the pipe.

### Installation in vessels

If installed horizontally, pay attention to the position of the tuning fork to ensure that the liquid can drip off.

The electrical connection, e.g. M12 plug, should be pointing down with the cable. This can prevent moisture from penetrating.

■ 10 Position of the fork in the case of horizontal installation in a vessel

#### Distance from wall

Ensure that there is sufficient distance between the expected buildup on the tank wall and the fork. Recommended distance from wall  $\geq 10$  mm (0.39 in).

#### Length of connecting cable

- Up to 1 000 m (3 281 ft)
- Max. 25  $\Omega$ /wire, total capacitance  $< 100$  nF

## Environment

<b>Solids contents</b>	ø < 5 mm (0.2 in)
<b>Lateral loading capacity</b>	Lateral loading capacity of the tuning fork: maximum 200 N

## Mechanical construction

### Design

The point level switch is available in different versions, which can be assembled in accordance with user specifications.

The versions can be selected via the product structure in the Product Configurator, see the "Ordering information" section. Examples in the graphic below:

Versions	Examples			
	A	B	C	D
Electrical connection	Valve plug	Cable (cannot be disassembled)	M12 plug for housing cover IP66/68/69	M12 plug for housing cover IP65/67
Housing (sensor design) for process temperatures up to:	100 °C (212 °F) or 150 °C (302 °F)	100 °C (212 °F) or 150 °C (302 °F)	100 °C (212 °F) or 150 °C (302 °F)	100 °C (212 °F) or 150 °C (302 °F)
Sensor type	Compact version	Short tube version	Compact version	Short tube version

**i** For detailed information on the process connections, see the "Mechanical construction" -> "Sensor type" section

**i** For information on the short tube version, see the "Mounting" -> "Installation instructions" section

**Plug****Dimensions**

Dimensions mm (in)

The following graphics illustrate the plugs together with the suitable housing covers on the housing of the point level switch.

Electrical connection with housing cover	Designation

**i** Pay attention to the temperature and pressure specifications for seals used at the customer site.

**i** Endress+Hauser supplies DIN/EN process connections with threaded connection in stainless steel in accordance with AISI 316L (DIN/EN material number 1.4404 or 1.4435). With regard to their stability-temperature property, the materials 1.4404 and 1.4435 are grouped together under 13E0 in EN 1092-1, Tab. 18. The chemical composition of the two materials can be identical.

Weight	Sensor type	Weight
	Compact version with process adapter G 1/2" and valve plug for process temperature up to 100 °C (212 °F)	Approx. 140 g (4.938 oz)
	Short tube version with process adapter G 1/2" and valve plug for process temperature up to 150 °C (302 °F)	Approx. 169 g (5.961 oz)

## Materials

Material specifications in accordance with AISI and DIN EN.

### Materials in contact with process

Component part	Material
Tuning fork	316L
Process adapter	316L (1.4404/1.4435)
Short tube	316L (1.4404/1.4435)
Seal for weld-in adapter with G 3/4", G 1"	VMQ
Flat seal	FA (composite material based on aramid fibers combined with NBR)

*Materials not in contact with process*

Component part	Material
Housing cover with M12 plug (IP66/68/69)	316L (1.4404/1.4435) PPSU
Housing cover with M12 plug (IP65/67)	
Housing cover with valve plug (IP65)	
Housing cover with cable (IP66/68)	
Cable gland	PVDF
Design ring	PBT/PC
Housing	316L (1.4404/1.4435)

**Surface roughness**      Metallic surface in contact with process:

Ra ≤ 3.2 µm (126 µin)

 The surface is not defined in the area of the welding seam.

## Operability

### LED display

A0016856

A M12 plug, (cable without graphic)

B Valve plug

Item	Function	Description
1	Green LED (gn) Lit	Device is operational
2	Yellow LED (ye) Lit	<b>M12 plug</b> Indicates the sensor state: tuning fork is covered by liquid <b>Valve plug / cable</b> Indicates the switching state: <ul style="list-style-type: none"> <li>▪ MAX operating mode (overfill protection): sensor is <b>not</b> covered by liquid</li> <li>▪ MIN operating mode (dry running protection): the sensor is covered by liquid</li> </ul>
3	Red LED (rd) Flashing Lit	Warning/maintenance required: Fault can be remedied, e.g. incorrect wiring; protective function if test magnet is held against the sensor for longer than 30 s Fault/device failure: error cannot be rectified, e.g. electronic error

**i** On the metal housing cover (IP69), there is no external signaling via LEDs. A connecting cable with an M12 plug and LED display can be optionally ordered as an accessory. See the "Accessories" section

### Function test with test magnet

Carry out a function test while the device is in operation.

- ▶ Hold the test magnet for at least 2 s against the marking on the housing.
  - ↳ This inverts the current switch status, and the yellow LED changes state. When the magnet is removed, the switching status valid at that time is adopted.

If the test magnet is held against the marking for longer than 30 s, the red LED will flash: The device returns automatically to the current switch status.

**i** The test magnet is not included in the scope of delivery. It can optionally be ordered as an accessory. See the "Accessories" -> "Additional accessories" section

23 Position for test magnet on housing

## Certificates and approvals

 The following documents are also available in the Download Area of the Endress+Hauser website: [www.endress.com](http://www.endress.com) → Downloads.

<b>CE mark</b>	The measuring system complies with the statutory requirements of the applicable EC Directives. These are listed in the corresponding EC Declaration of Conformity together with the standards applied. Endress+Hauser confirms successful testing of the device by affixing to it the CE mark.
<b>EAC conformity</b>	The measuring system meets the legal requirements of the applicable EAC guidelines. These are listed in the corresponding EAC Declaration of Conformity together with the standards applied. Endress+Hauser confirms successful testing of the device by affixing to it the EAC mark.
<b>RCM-Tick marking</b>	The supplied product or measuring system meets the ACMA (Australian Communications and Media Authority) requirements for network integrity, interoperability, performance characteristics as well as health and safety regulations. Here, especially the regulatory arrangements for electromagnetic compatibility are met. The products are labelled with the RCM- Tick marking on the name plate.
 <small>A0029561</small>	
<b>Approval</b>	CSA C/US General Purpose
<b>Overfill protection</b>	 Prior to mounting the device, pay attention to the WHG approval documents. The documents are available on the Endress+Hauser website: <a href="http://www.endress.com">www.endress.com</a> → Downloads. <p><b>WHG</b></p> <ul style="list-style-type: none"> <li>▪ Overfill detection system: Z-65.11-531</li> <li>▪ Leak detection system: Z-65.40-532</li> </ul>
<b>Marine approvals</b>	<ul style="list-style-type: none"> <li>▪ GL (Germanischer Lloyd) / DNV (Det Norske Veritas)</li> <li>▪ ABS (American Bureau of Shipping)</li> <li>▪ LR (Lloyd's Register)</li> <li>▪ BV (Bureau Veritas)</li> </ul>
<b>CRN approval</b>	Versions with a CRN approval (Canadian Registration Number) are listed in the corresponding registration documents. CRN-approved devices are labeled with registration number 0F16950.5C on the nameplate. For further details on the maximum pressure values, see the Download Area of the Endress+Hauser website.
<b>Inspection certificates</b>	The following documents can be ordered with the device (optional): <ul style="list-style-type: none"> <li>▪ Acceptance test certificate as per EN 10204-3.1</li> <li>▪ Final inspection report</li> </ul>
<b>Manufacturer declaration</b>	The following manufacturer declarations can be ordered (optional): <ul style="list-style-type: none"> <li>▪ FDA conformity</li> <li>▪ TSE-free, materials free from animal origin</li> <li>▪ ROHS-compliant in accordance with Endress+Hauser regulation</li> </ul>
<b>Pressure Equipment Directive</b>	The device does not fall within the scope of Pressure Equipment Directive 97/23/EC as it does not have a pressurized housing as defined in Article 1, Section 2.1.4 of the directive.
<b>Other standards and guidelines</b>	The applicable European guidelines and standards can be found in the relevant EU Declarations of Conformity.

## Ordering information

### Ordering information

Detailed ordering information is available from your nearest sales organization [www.addresses.endress.com](http://www.addresses.endress.com) or in the Product Configurator under [www.endress.com](http://www.endress.com).

#### Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

### Services (optional)

In addition, the following services can be selected via the product structure in the Product Configurator:

- Cleaned of oil+grease
- PWIS-free (PWIS = paint-wetting impairment substances)
- Density setting > 0.5 g/cm<sup>3</sup>
- Switching delay setting

## Accessories

### Weld-in adapter

Various weld-in adapters are available for installation in vessels or pipes.

The adapters are optionally available with inspection certificate 3.1 EN10204.

View (example)	Description
 1 Leakage hole	<b>G ¾"</b> ø29 pipe installation ø50 vessel installation FDA-listed materials as per 21 CFR Part 175-178
	<b>G 1"</b> ø53 pipe installation ø60 vessel installation

If installed horizontally and weld-in adapters with a leakage hole are used, ensure that the leakage hole is pointing down. This allows leaks to be detected as quickly as possible.

For detailed information, see "Technical Information" TI00426F (Weld-in adapters, process adapters and flanges)

Available in the Download Area of the Endress+Hauser website ([www.endress.com/downloads](http://www.endress.com/downloads)).

### Plug-in jack, cable

The plug-in jacks listed are suitable for use in the temperature range -25 to +70 °C (-13 to +158 °F).

Engineering unit mm (in)

Plug-in jack M12 IP69 with LED	Description	Order number
 A0020871	<ul style="list-style-type: none"> <li>▪ Elbowed 90°</li> <li>▪ Terminated at one end</li> <li>▪ 5 m (16 ft) PVC cable (orange)</li> <li>▪ Slotted nut 316L</li> <li>▪ Body: PVC (transparent)</li> </ul>	52018763
