

## 38 V, 0.5 A synchronous step-down switching regulator evaluation board based on A6985F

Data brief

### Features

- AECQ100 qualification
- 0.5 A DC output current
- 4 V to 38 V operating input voltage
- Low consumption mode or low noise mode
- Programmable  $I_{SKIP}$  current
- 30  $\mu$ A  $I_Q$  at light load (LCM  $V_{IN} = 12$  V and  $V_{OUT} = 3.3$  V)
- 8  $\mu$ A  $I_{Q-SHTDWN}$
- Adjustable  $f_{SW}$  (250 kHz - 2 MHz)
- Output voltage adjustable from 0.85 V to  $V_{IN}$
- Embedded output voltage supervisor
- Synchronization
- Adjustable soft-start time
- Internal current limiting
- Overvoltage protection
- Output voltage sequencing
- Peak current mode architecture
- $R_{DS(on)HS} = 360\text{ m}\Omega$ ;  $R_{DS(on)LS} = 150\text{ m}\Omega$
- Thermal shutdown
- RoHS compliant

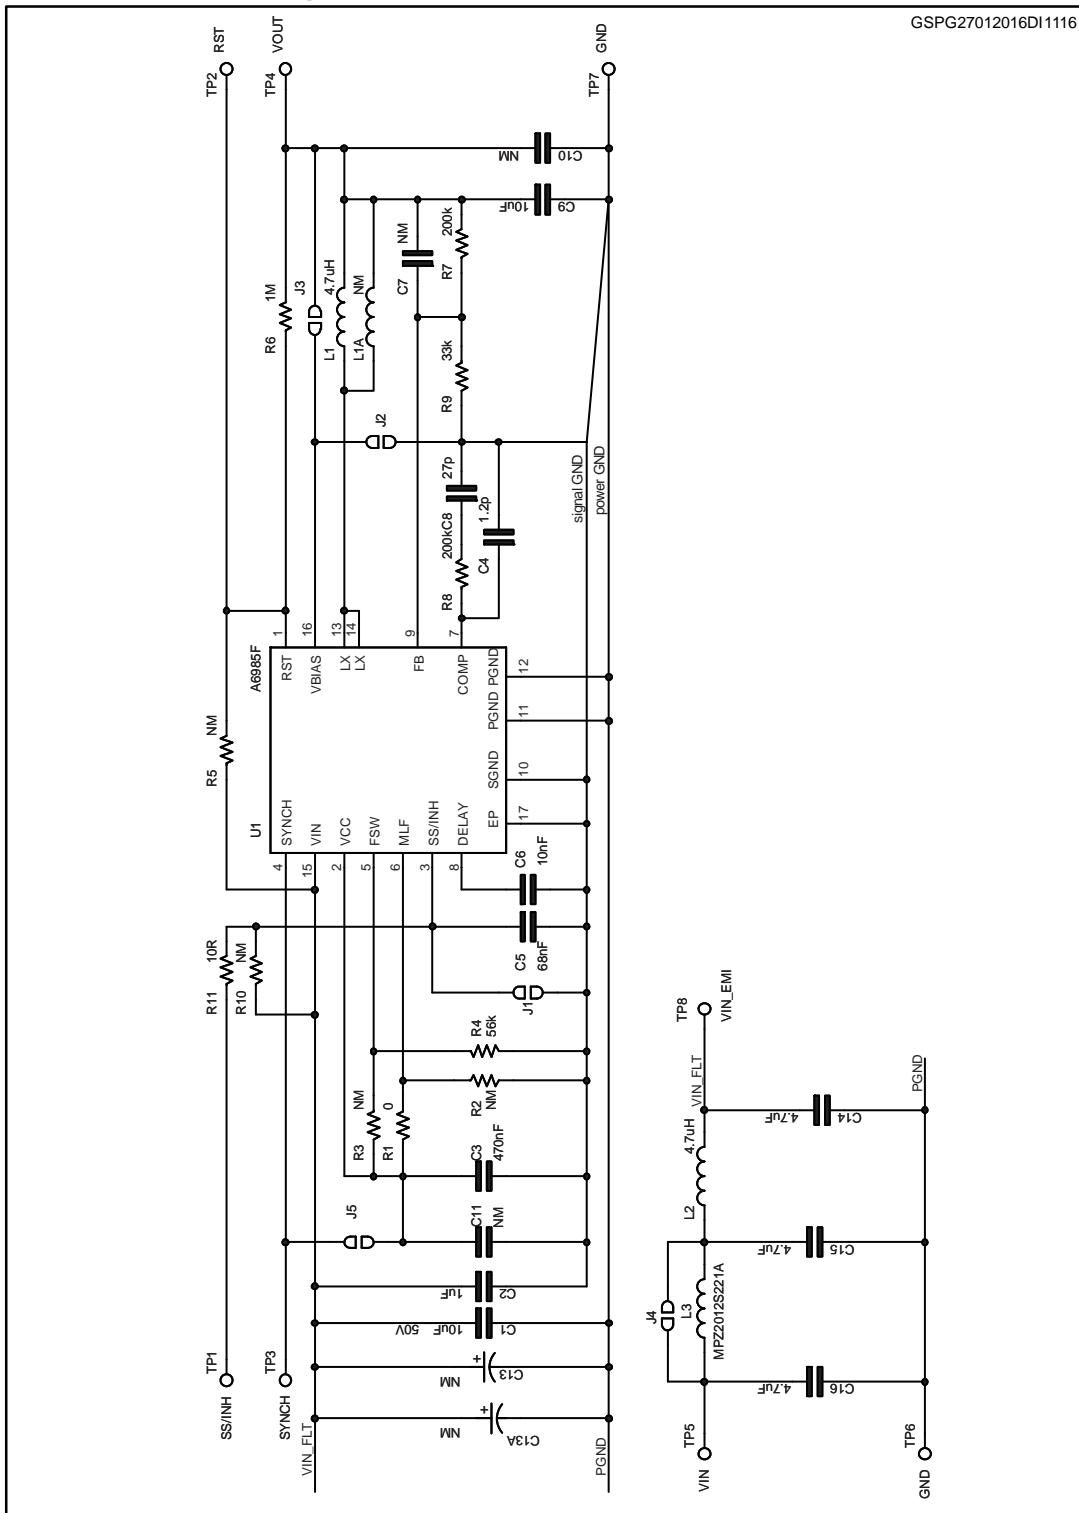

### Description

The STEVAL-ISA187V1 is a product evaluation board based on the ST synchronous step-down switching regulator A6985F, which can deliver up to 0.5 A and, with its 100% duty cycle ability to withstand cold crank events and wide input operating voltage range, represents the ideal choice for battery-powered automotive systems. Synchronous rectification helps achieve higher efficiency at full load as well as application compactness, while high-frequency switching (programmable up to 2 MHz) helps reduce the cost and size of power passive components while remaining outside the AM band.

The device can operate in low consumption mode (LCM), with a quiescent current of 30  $\mu$ A at  $V_{IN}=12$  V and  $V_{OUT}= 3.3$  V that ensures high efficiency under light load, which is a requirement in typical car body applications that are active when a car is parked. A low noise mode (LNM) can be selected to meet the requirements of infotainment applications with forced PWM mode under all load conditions. The default board configuration is LCM active, 2 MHz switching frequency, high  $I_{SKIP}$  current and the switchover feature enabled, but all of these settings can be easily changed so the user can evaluate different application scenarios.
