				MINIMUM	TYPICAL		
LUXEON 2835C	3V	2700K	90	36	42	117	L128-27HGCA3500000
		3000K	90	38	43	120	L128-30HGCA3500000
		3250K	90	40	45	125	L128-33HGCA3500000

Notes for Table 1:

1. Lumileds maintains a tolerance of ± 2 on CRI and $\pm 7.5\%$ on luminous flux measurements.
2. Luminous flux and CRI specs are based upon mounted package on highly reflective surface at $T_j=25^\circ\text{C}$. Typical CRI is approximately 2 points higher than the minimum CRI specified, but this is not guaranteed.

 - The average current for each cycle does not exceed the maximum allowable DC forward current
 - The maximum amplitude of the ripple does not exceed the maximum peak pulsed forward current
3. At $\leq 50\%$ duty cycle with pulse width of 5ms.
4. Transient reverse voltages and surge currents due to electrical switching or supply interruptions are acceptable if these events do not last for more than 10ms, the amplitude of the reverse voltage does not exceed 5V and the reverse current is less than 220uA.
5. Max 5V reverse for up to 10s is an acceptable beginning of life, one time test condition.

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

LUXEON 2835 with CrispColor Technology LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

Where:

A B C D

- A** – designates luminous flux bin (example: R=48 to 52 lumens, T=56 to 60 lumens)
- B C** – designates correlated color bin (example: 5D, 5E, 5F, 5G, 5H for 4000K parts)
- D** – designates forward voltage bin (example: W=3.0 to 3.1V, X=3.1 to 3.2V)

Therefore, a LUXEON 2835 with CrispColor Technology with a lumen range of 48 to 52, color bin of 5D and a forward voltage range of 3.0 to 3.1V has the following CAT code:

R 5 D W

Luminous Flux Bins

Table 5 lists the standard luminous flux bins for LUXEON 2835 with CrispColor Technology emitters. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all CCTs.
