Ruggedized, Industry-Certified IoT Gateway for Octave™ All-in-One Edge-to-Cloud Solution

SETTING A NEW STANDARD FOR IOT EMBEDDED SOLUTIONS

The FX30 is the industry's smallest, most rugged programmable LTE cellular gateway. As part of an integrated, secure edge-to-cloud solution, the FX30 enables rapid, scalable, and global IoT deployments for any connected machine or infrastructure, with and without industrial protocols.

PROGRAMMABLE AND MANAGEABLE

The FX30 ships with [Octave™](#), Sierra Wireless' All-in-One Edge-to-Cloud Solution for connecting industrial assets to the cloud. Octave helps industrial companies scale from proof of concept to commercial deployment more easily than ever by letting them securely extract and orchestrate data from industrial equipment to cloud infrastructure, all while efficiently managing their connected machines.

Integrating device modules and gateways, wireless connectivity, and cloud APIs, Octave ensures you have the data you need, exactly when you need it. Providing a simple JavaScript framework, it enables powerful combinations of data processing rules both in the cloud and at the resource-constrained edge. With a single pane of glass to monitor, control, update and maintain connected edge devices and assets—including the lifecycle of the devices themselves, as well as their SIM connectivity—Octave empowers industrial companies to act on the data that matters most to them.

INDUSTRIAL GRADE

The FX30 provides superior performance in harsh environments with its small, rugged aluminum form factor. It meets MIL-STD-810 standard for vibration and mechanical shock, and maintains operation in extended temperatures from -30°C to +75°C, making it the ideal embeddable solution for any industrial machine.

FX30 is pre-certified for large deployments, meeting a comprehensive range of regulatory and industry standards worldwide, including industrial protocols such as Modbus.

SCALABLE AND EXTENSIBLE

Offering unparalleled flexibility, the FX30 is available in both Ethernet and Serial variants supporting a variety of industrial protocols such as Modbus RTU and Modbus TCP.

There is also an IoT Connector expansion slot for hardware extensions such as CANopen and additional GPIOs. The IoT Connector enables the FX30 to be expanded to support a wide range of wired or wireless interfaces. The FX30 offers best-in-class low power consumption, consuming less than 1W in idle mode and 2mW in ultra-low power mode, making it ideal for solar and battery powered applications.

The FX30 Octave includes a SIM pre-provisioned for global connectivity and an innovative pay as you go pricing model, significantly reducing the logistics of SIM procurement and data plan management.

BEST IN CLASS SECURITY

When it comes to security, FX30 Octave delivers the most comprehensive solution in the industry. As the only MITRE-Approved CVE Numbering Authority IoT gateway provider, we are a trusted partner that makes securing your IoT solution easier and more secure.
