

X410 carrier board for Jetson AGX Orin

Overview

The X410-AI and X410-LC are specially designed for system integrators, offering enhanced flexibility with their low-profile connectors and a variety of adapter options.

These features allow you to easily position the ports exactly where you need them within your enclosure or system.

The X410-AI comes equipped with the following:

- 2x CSI interface
- Micro SD slot
- CAM LED
- Battery holder
- GbE via 12-pin FPC
- 2x UART interface (3.3V)

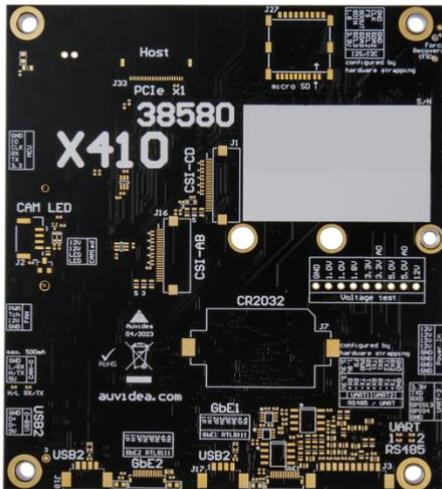

In contrast, the standout feature of the X410-LC is its flat underside, free of components. This design ensures a safe integration process, minimizing the risk of short circuits or interference with your enclosure.

Features

- Production volume is easily scalable as only readily available components are used
- Crypto chip to protect your software investment
- Designed and manufactured in Germany
