SWITCH MODE POWER SUPPLY
PFA10-T

PFA10-T-01-3-240-DC24V-10A

The primary switched-mode power supply of type PFA10-T is ideally suited for automation and mechanical engineering applications. Its compact design allows space-saving integration into control cabinets with limited installation space. The housing with 25° angled terminals enables tool-free installation and quick replacement. The three-phase AC input is also suitable for operation with DC voltage. With a 24 V DC output, up to 94.1 % efficiency, 240 W output power, and 150 % power reserve for up to 5 seconds, the power supply meets all the requirements of dynamic industrial applications.

TYPICAL FEATURES

- Slim Design (80 mm) with 25° Push-In connectors
- Fast tool-less mounting and demounting
- PFC >0.9 and Active Inrush Current Limitation
- DC input range 450 V to 815 V / 850 V 10 s
- Best efficiency factor up to 94.1 %
- No derating at -40 °C to +70 °C, Boost Power 150 % for 5 s
- Performance bonus up to 120 % at 45 °C
- Charging & Parallel Operation
- Highest Lifetime Expectancy 80.000 h /40 °C
- DC-OK-Signal
- Reduced power consumption in idle mode 0.8 W - 1.1 W
- Extended surge immunity 2.5 kV / 6 kV

YOUR BENEFITS

- High power density
- Robustness suitable for industrial use
- Power boost for peak loads
- Quick, tool-free installation
- High efficiency and long service life

TYP. APPLICATIONS

Industrial & automation, building automation, energy, datacom & telecom, infrastructure

COMPLIANCE

TECHNICAL DATA (TU = +25 °C, UB = 3AC 400 V UNDER FULL LOAD AND AFTER WARM-UP, UNLESS OTHERWISE SPECIFIED)

INPUT CIRCUIT	
Rated input voltage range U_e	AC 320...575 V (3 phase operation) AC 350...575 V (2-phase operation) DC 450...815 V (DC input refer to „Connections for DC-operation“ continuous) Max. DC 850 V (DC input refer to „Connections for DC-operation" max. 10 s)
Rated input voltage U_n	AC 400...480 V (at 50/60 Hz)
Input current	3 x 0.7 A typ. at U_b = AC 400 V 3 x 0.6 A typ. at U_b = AC 480 V 0.8 A typ. at U_b = DC 500 V
Mains frequency	47...63 Hz
Inrush current	with 3-phase AC 400 V: max. 10 A (cold start)
Turn-on Voltage	prevents operation at 1 AC min. AC 310 V DC operation min. DC 440 V
Turn-off Voltage	AC operation min. AC 290 V DC operation min. DC 410 V
Power factor correction	> 0.45 (full load)
Input protection	Internal back-up fuse, 2x T5 A slow-blow
Recommended back-up fuse	3 pole MCB e.g. E-T-A's 4230; C16 protector

OUTPUT CIRCUIT	
Output power rating	240 W
Rated output voltage U_o	DC 24 V
Rated output current I_o	10 A
Overload limit in constant current mode	12 A
Output voltage accuracy	±1 %
Minimum load	0 %
Line Regulation	±0.1 % typ. (low line to high line, full load)
Load regulation	with load range 0 % to 100 % typ. ±0.4 %
Voltage setting range	DC 24...28 V When input voltage is below AC 350 V, the output voltage is limited to DC 24 V. Make sure that the maximum rated output power will not be exceeded when trimming up.
Power boost factor	150 % for 5 s 250 % for 20 ms (see „Boost Power“)
Residual ripple	1 % of the rated value V_{out}; 20 MHz bandwidth
Capacitive load	Max. 20 mF
Transient Response	10-100% load: ±3.0% typ. recovery time: 100 ms typ.
Short circuit behaviour	Hiccup mode, auto recovery
Reverse voltage resistance	Max. DC 35 V (continuous) DC 38 V (< 5 min)
Operating conditions signalling	DC OK - green LED DC OK - LED off (abnormal mode, no operation or failure) standard operation, output voltage okay closed - Signal Contact (normal mode) open - Signal Contact (abnormal mode, no operation or failure)

ELECTRICAL DATA	
Rated frequency	65 kHz

Rated insulation voltage	I/P to O/P: AC 3,5 kV / DC 5 kV I/P to PE: AC 1,6 kV / DC 2,5 kV O/P to PE: AC 500 V / DC 700 V (tested for 1 minute)
Efficiency	Typ. 94.1 %
Auxiliary circuit ratings	DC 30 V / 0.1 A (do not connect signaling contact to hazardous voltages)
Power consumption	< 0.8 W (3-phase AC 400 V; max. 0.8 W) < 1.1 W (3-phase AC 500 V; max. 1.1 W)
Power failure bridging time	15 ms
Switch-on delay t_{Start}	2- and 3-phase operation, AC 400 V typ. 37 ms max. 50 ms
Rise time	Typ. 23 ms max. 30 ms
Insulation resistance	Input to output (I/P → O/P) ≥ 4.5 MΩ

OPERATING MODE SETTING

Description	DIP1	DIP2	Switch position
Single Mode (Factory set) Power Boost Mode available, refer to „Boost Power“	OFF	OFF	
Parallel Load Share Mode Angled output characteristic for load sharing. Voltage drop from 0 to nom. IOUT: 1.2V	ON	OFF	
Charging Mode Current Limitation strictly at nominal current. Refer to „CC/CV Mode (Charging Mode)“ For battery charging, please get in contact with E-T-A.	OFF	ON	
Not allowed!	ON	ON	

MECHANICAL DATA	
Mounting dimensions (WxHxD)	43 x 135 x 140.4 mm
Mounting position	Wall mounting with input terminals pointing downwards (see dimensions)
Mass	Approx. 531 g
Material	Polycarbonate / Aluminum

MOUNTING VALUES - CAGE CLAMP

Connection capacity Connection L1, L2, L3	Cable cross section [mm²]	Cable cross section [AWG]	Stripping length [mm]
rigid	0.25...6	24...8	12...13
flexible	0.25...6	24...8	12...13
Connection capacity Connection PE	**Cable cross section [mm²]**	**Cable cross section [AWG]**	**Stripping length [mm]**
rigid	0.25...6	24...8	12...13

flexible	0.25...6	24...8	12...13
Connection capacity Connection +1, +2 (V_{out})	**Cable cross section [mm²]**	**Cable cross section [AWG]**	**Stripping length [mm]**
rigid	0.75...25	18...4	18...20
flexible	0.75...25	18...4	18...20
Connection capacity Connection -1, -2 (V_{out})	**Cable cross section [mm²]**	**Cable cross section [AWG]**	**Stripping length [mm]**
rigid	0.75...25	18...4	18...20
flexible	0.75...25	18...4	18...20

Use flexible (stranded wire) or solid cables with above wire cross-section is recommended. Use copper conductors designed for an operating temperature of at least 90°C.

IECEE CB SCHEME	IEC/EN 61010-1, IEC/EN 61010-2-201, IEC/EN 62368-1

The products were submitted for safety files at AC- and DC-Input operation. (AC 350...575 V and DC 450...600 V).
If input voltage is > DC 500 V consider an external fuse according to applicable standards. 2-phase operation is not included in the safety approvals. Additional tests might be necessary when the complete application has to be approved according to UL 62368-1, 61010-1 and UL 61010-2-201

Output power derating for Line-input of less than 3AC 350 V (derate linearly from 100% at AC 350 V to 90% at 3AC 320 V)

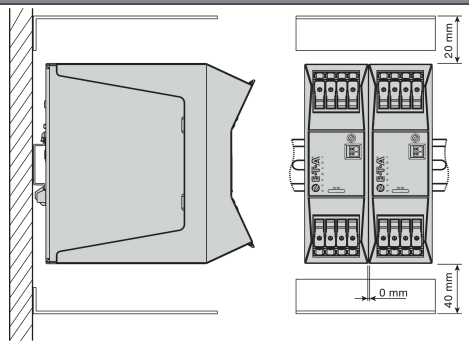
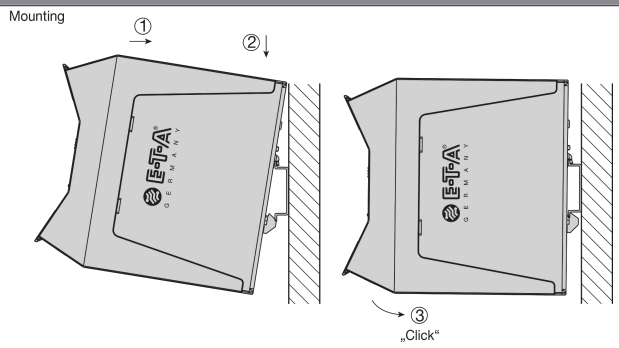
INSTALLATION INSTRUCTIONS

MOUNTING DIMENSIONS



To guarantee sufficient convection cooling, keep a distance of 20 mm above and 40 mm below the device.
For vertical mounting the device should be installed with the input terminal on the bottom.
No space between supplies are required.

INSTALLATION INSTRUCTIONS MOUNTING

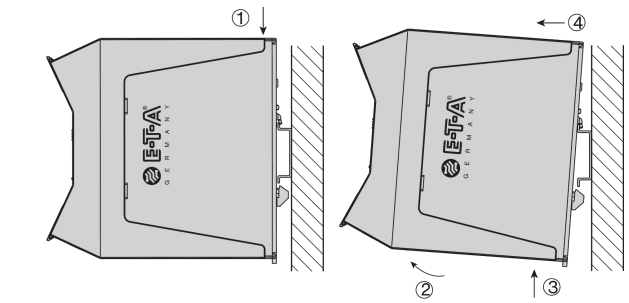


1. Place the device on the DIN rail with a slight upward tilt. Snap the device onto the DIN rail.
2. Now tilt the device downwards until it reaches the lower part of the DIN rail.
3. Press the lower part of the device firmly against the rail until the device clicks into place on the DIN rail.

4. Shake the device gently to ensure that it is securely engaged.

INSTALLATION INSTRUCTIONS DISMANTLING

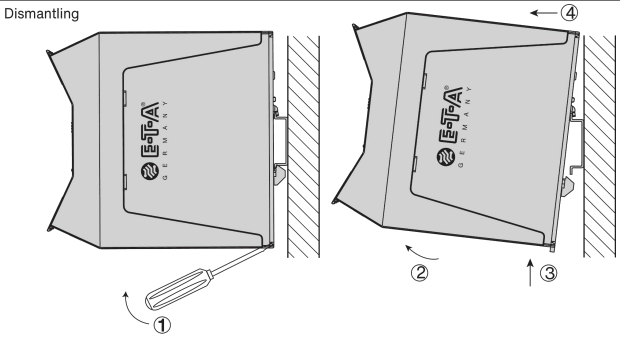
Dismantling



1. Press the unlock button on the top of the device to release the latch from the rail.
2. While pushing the button, slightly tilt the device forward.
3. Pull the device away from the DIN rail by pushing it up
4. Remove the power supply completely from the rail.

INSTALLATION INSTRUCTIONS DISMANTLING

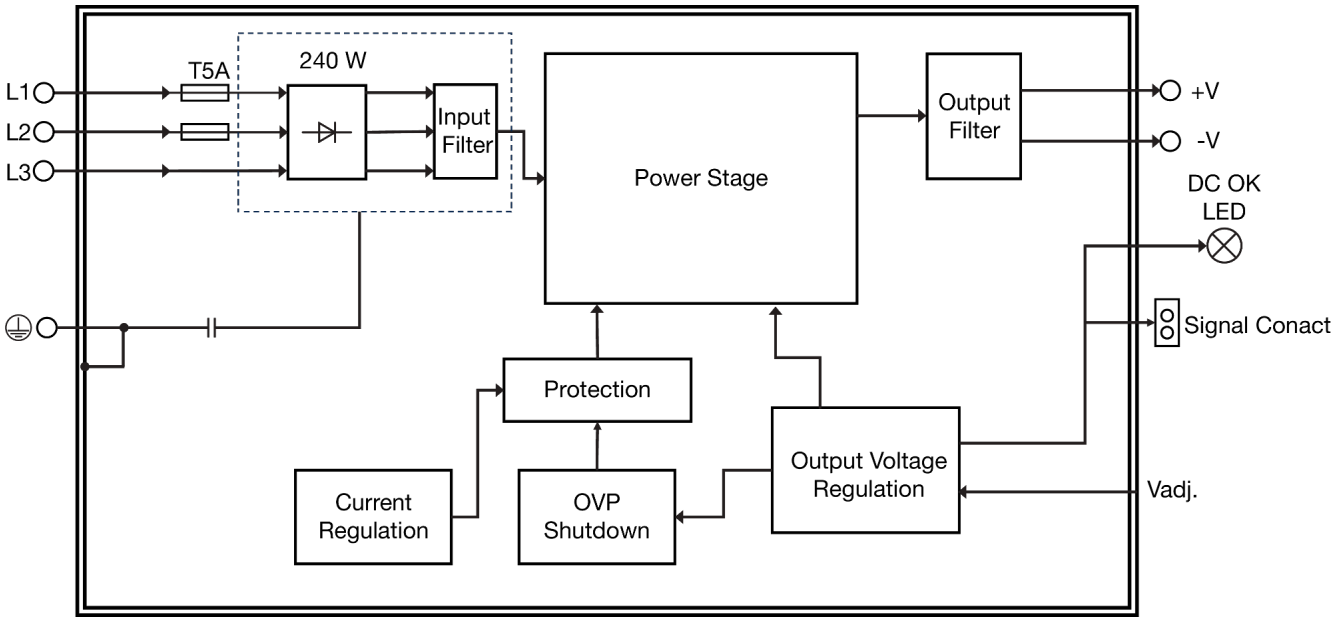
Dismantling



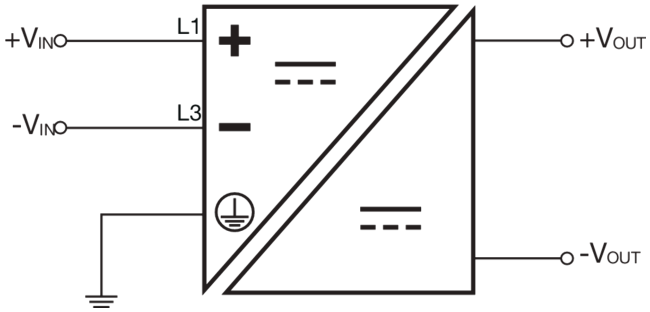
1. Pull the DIN rail latch by using a screwdriver OUT of the device and HOLD it.
2. Tilt the bottom of the device OUT.
3. Pull the device away from the DIN rail by pushing it up.
4. Remove the power supply completely from the rail.

SCHEMATIC DIAGRAMS

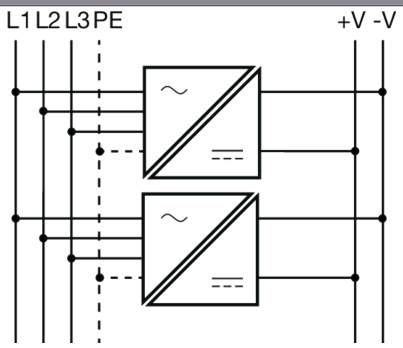
SCHEMATIC DIAGRAM



CONNECTIONS FOR DC-OPERATION

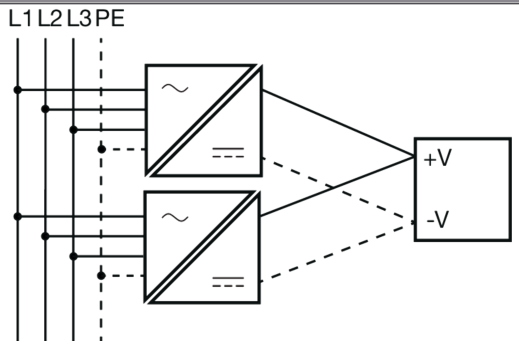


PHASE REDUNDANCY



1) If one phase fails, operation is still guaranteed. (2-phase operation)

PARALLEL OPERATION



1) Set DIP switch 1 to “ON” to enable parallel operation.
2) Adjust all power supplies to exactly the same output voltage under identical load and cooling conditions.
2) Use identical cable lengths and cross-sections (star configuration). Switch on all units simultaneously to prevent triggering overload protection.
3) Only use parallel operation in the standard mounting position (input terminals at the bottom). Do not connect in parallel under conditions that require output current reduction (e.g., above 60 °C ambient temperature,...).
4) Leakage current, EMI, inrush current, and harmonics increase when using multiple power supplies in parallel.
