Product Description	Connector Clips are designed with various fixing point designs, to accommodate the many connectors out in the market. This specific connector clip is designed for a commonly used automotive connector. The width and the height of the fixation point creates minimal rattle when secured. The innovative design of the fir tree creates an interface with four different size holes that are common in the automotive industry. The fir tree branch design on all four sides makes a 360-degree interface with the panel, creating a more secure fit into the hole.
