

TECHNICAL DATA SHEET

Part No. 596-00817
Article No. 596-00817
Type DC2011S

Designed with cross-laminated UV stable materials, these variable print Solar Installation Labels are designed to accept printing from any standard thermal transfer printer using a resin-based ink ribbon for the best durability. Print your voltage information directly on the label and then laminate with an optional clear acrylic laminate material for added protection. These labels can be used to print disconnecting means and breaker series directly on the labels for a more professional result and a smoother inspection process.
