Type FTTT

HellermannTyton BundleTags enable companies to accurately track and bundle individual wire groupings, ensuring operators apply the correct terminals and place the wires on the right line. Machine printing replaces handwriting, so more data can be included, including bar codes, eliminating most mistakes and hard-to-read data. The one-piece design is intuitive and easy to use. Each label is marked to indicate where to place the tag relative to the bundle, ensuring a proper wrap each time.
