NOTES

RoHS Compliance

The levels of RoHS restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application, in accordance with EU Directive 2011/65/EC (RoHS2), as implemented January 2, 2013. RoHS Declarations for this product can be obtained from your Cree LED representative or from the [Product Ecology](#) section of the Cree LED website.

Vision Advisory

WARNING: Do not look at an exposed lamp in operation. Eye injury can result.

KIT NUMBER SYSTEM

Cree LED lamps are tested and sorted into performance bins. A bin is specified by ranges of color, forward voltage, and brightness.

Cree LEDs are sold by order codes in combinations of bins called kits. Order codes are configured in the following manner:

REFLOW SOLDERING

- The CLMVC-FKC is rated as a MSL 5a product.
- After opening the sealed bag, the SMD LED must be stored under the condition $<30^{\circ}\text{C}$ and $<60\%$ RH. Under these conditions, the SMD LEDs must be used (subject to reflow) within 24 hours after bag opening, and baking 24-hour/ 80°C is required when exceeding 24 hours.
- Note that baking must only be done once.
- The temperature profile is as below.

Use only with CLMVC-FKC

| Solder |
|--|
| Average ramp-up rate = 4°C/s max |
| Preheat temperature = $150^{\circ}\text{C} \sim 200^{\circ}\text{C}$ |
| Preheat time = 120s max |
| Ramp-down rate = 6°C/s max |
| Peak temperature = 250°C max |
| Time within 5°C of actual Peak Temperature = 10s max |
| Duration above 217°C is 60s max |

NOTES

- The packaging sizes of these SMD products are very small and the resin is still soft after solidification. Users are required to handle with care. Never touch the resin surface of SMD products.
- To avoid damaging the product's surface and interior device, it is recommended to choose a special nozzle to pick up the SMD products during the process of SMT production. If handling is necessary, take special care when picking up these products. The following method is necessary:

PACKAGING

- The boxes are not water resistant and they must be kept away from water and moisture.
- The LEDs are packed in cardboard boxes after packaging in normal or anti-electrostatic bags.
- Cardboard boxes will be used to protect the LEDs from mechanical shocks during transportation.
- The reel pack is applied in SMD LED.
- Max 12800 pcs per reel.
