## GENERAL INFORMATION

For safe handling information on this product, consult the Safety Data Sheet, (SDS).

**This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be used with chlorine or other strong oxidizing materials.**

## DIRECTIONS FOR USE

1. For best results, dispense onto substrate warmed to 90°C.
2. LOCTITE ECCOBOND FP4323 may settle upon storage. Each container must be thoroughly mixed before combining.
3. Mix Part A and Part B separately for about 5 to 10 minutes on a standard paint shaker to ensure complete dispersion of the filler.
4. Stir with a large spatula to check for lumps.
5. Cold storage will minimize filler settling.
6. Part B may form a crust if exposed to moist air for an extended period of time. Keep in a well sealed container. For best results, do not use Part B which contains this crust caused by moisture contamination.
7. Thorough mechanical mixing of Part A and Part B together is required for best results. Hand mixing alone is not recommended.
