Product Information for S1045 Dual-Receptable Grounding Block for Workbenches

Description

The S1045 is a space-saving grounding block designed to provide direct path to ground in ESD Benches & Workstations for two operators/users.

Features

- Using (2) Screws (included) it can easily be installed/mounted at the desired location, ideally beneath workstations/ benches

- A 15' long straight Green color cord with a # 10 Ring Terminal provides a connecting means to the ground point

- Users can snap/park their cords onto the two 4mm studs, when not in use

- With its no built-in resistor construction, this product provides a direct path to the ground
