Single-Phase Metered Input Rack PDU G4, 100-240V, 24 Outlets, 16A, 3.8kW, C20/L6-20 Input, 10 ft. Cord, 0U Vertical

MODEL NUMBER: **EVMIL620A**

Metered input PDU with enhanced cybersecurity is ideal for data center managers seeking to streamline PDU procurement and management.

Features

Single-Phase Metered Input PDU Ideal for Data Center Managers with Large-Scale Distributed IT
The EVMIL620A Rack PDU G4 is ideal for streamlining PDU procurement and deployment within a rack in an enterprise data center, colocation data center or distributed IT infrastructure. Equipped to meet even the most diverse data center rack power needs, the EVMIL620A delivers versatile, enterprise-quality power distribution.

Market-Leading Cybersecurity Ensures Your Data Is Kept Safe
Chain-of-trust encryption, a user-configurable firewall and secure firmware boot capability prevent the EVMIL620A PDU from being a cyberattack vulnerability point on a network. An embedded, hot-swappable Gigabit Network Module (GNM) offers enhanced management and cybersecurity, including zero-trust architecture and zero-touch provisioning. The EVMIL620A is compatible with select Eaton Brightlayer Data Centers suite software solutions that enable extensive automation to shorten response times to power issues and ensure timely updates for stronger cybersecurity.

Metering to Optimize Utilization and Prevent Down Time
High accuracy metering for voltage, current, power and energy. Use this data for capacity planning, alarming or reporting energy consumption. Set alarm thresholds to prevent overload and prevent costly down time. Power data is available on the local LCD display or over the network using Web, SNMP, CLI or RestAPI.

24 Outlets Give You Plenty of Power Options
The EVMIL620A features 12 C13 outlets, which accept C14 connectors, and 12 high-retention C39 combo outlets, which accept both C14 and C20 connectors, adding flexibility to deployments and reducing the quantity of PDUs you will need to purchase and install. The outlets are evenly distributed into color-coded load banks, each with its own circuit breaker, to improve load balancing and organize connections in a crowded rack.

Convenient Box-to-Rack Installation
This EVMIL620A rack PDU (rPDU) features toolless mounting buttons that allow front- or side-facing rack installation, depending on your rack's layout and your power needs. The 10-foot power cord has an attached C20 input and an L6-20 input adapter is included for versatility. Low-profile circuit breakers are flush with the lightweight aluminum chassis, and the narrow two-inch width saves space within the rack for

revenue-generating equipment. You can cascade up to 40 EVMIL620A models with each model maintaining its own individual IP address from a single network connection point.
