3.8kW Single-Phase Local Metered Automatic Transfer Switch PDU, Two 200-240V C20 Inlets, 8 C13 & 2 C19 Outputs, 1U, TAA

MODEL NUMBER: **PDUMH20HVAT**

Features

- 200-240V 20A Automatic Transfer Switch (ATS) / Local Metered rack PDU (rPDU) (Agency de-rated to 16A continuous)
- Provides a redundant power option for critical networking equipment with a single input power cord
- 2 digit display reports output power consumption in amps
- 1U horizontal rack-mount form factor; 14.8 in. / 37.6 cm depth
- 10 outlets (8 C13, 2 C19)
- Set of Plug-lock output power cable retention sleeves prevent accidental disconnection of connected devices
- Set of two C20 inlets support connection to separate PRIMARY and SECONDARY power sources
- Two 12-ft. / 3.6m C19 to C20 power cables included
- ATS circuits normally maintain output sourced from the primary input cable; As primary input power fails or becomes unstable, the ATS will switch to maintain output sourced from the secondary input cable until power on the primary input is restored and stable
- ATS configurations enable fault-tolerant, hot-swappable UPS protection when used with a single UPS and fully redundant UPS protection when each cord is connected to a separate UPS system (in a two-UPS environment, the primary input cable must be supported by an online UPS with zero transfer time similar to SmartOnline series)
- Advanced ATS configurations utilizing separate mains circuits, backup generators and even separate out of phase utility power grid feeds are fully supported
- On-board ATS processor constantly evaluates power quality on both inputs to prevent transfer to the secondary source when unavailable or of lower quality than the primary source
- Super-fast switchover between primary and secondary power sources occurs in 2-5 milliseconds
- Built-in card slot supports optional SNMPWEBCARD or WEBCARDLX for permanent upgrade to a switched & monitored PDU system
- Outlets are factory programmed for sequential turn-on at 250 millisecond intervals when the PDU is first energized to prevent inrush-related equipment interaction on startup
- Front panel LEDs confirm power availability on both input lines
- Federal Trade Agreements Act / TAA Compliant for GSA Schedule purchases
