

USB 3.0 SuperSpeed Active Extension Repeater Cable (USB-A M/F), 20M (65.61 ft.)

MODEL NUMBER: **U330-20M**

Connects to any computer, device and/or cable with USB-A connectors to increase the length of a device cable with no decrease in signal or performance. Extends beyond the 10 ft. limit of conventional USB 3.0 cables.

Description

The U330-20M USB 3.0 SuperSpeed Active Extension Repeater Cable (M/F) increases the length of a device cable up to 65 feet with no worry of signal loss. By daisy-chaining two cables while using external power, you can extend the length between USB devices up to 130 feet (39.6 meters).

Connect the male plug to a USB port on your computer or hub and the female end to a USB device cable. A built-in bus-powered signal booster ensures peak performance. Backward compatible with previous USB generations, this cable supports data transfer rates up to 5 Gbps.

The U330-20M works with all computers, devices and cables with USB-A connectors. It provides up to 360mA of power to a connected device (a 5V, 2A external power supply is required for power applications stronger than 360mA).

Premium foil and braid shielding delivers top-of-the-line signal quality and protection from EMI/RFI interference. Nickel-plated USB connectors with gold-plated copper contacts ensure excellent conductivity. Integral strain relief ensures the cable and connectors last a long time.

Features

Extends Connections Between 2 USB-A Devices and/or Cables

- Increases length of device cable up to 20M (65.61-ft.)
- Daisy-chain 2 cables for maximum distance up to 130-ft. (39.62 m) (while using an external 5V, 2A power supply)
- Supports data transfer rates up to 5 Gbps
- Built-in bus-powered signal booster for peak performance
- Provides up to 360mA of power to connected device
- Backward compatible with previous USB generations

Premium Construction for Superior Signal Transfer

- Premium foil and braid shielding protects against EMI/RFI
- Nickel-plated connectors with gold-plated copper contacts ensure excellent conductivity
- Works with all computers, devices and cables with USB-A connectors
- 5V, 2A external power supply required for power applications stronger than 360mA

Highlights

- Daisy-chain 2 cables for max distance up to 130 ft.
- Supports data transfer rates up to 5 Gbps
- Built-in signal booster for peak performance
- Provides up to 360mA of power to connected device
- Backward compatible with previous USB generations

System Requirements

- USB 3.0 computer port and USB 3.0 device required to meet USB 3.0 speeds
- 5V, 2A power supply with 3.5 x 1.35 mm DC jack required for power applications above 360mA. Output plug requires positive tip and negative sleeve.

Package Includes

- U330-20M USB 3.0 SuperSpeed Active Extension Repeater Cable (M/F), 20 m
