Rack Rail Reducer Panel PA Series

NEW

Hammond's Rack Rail Reducer Panel allows standard 19" rackmount equipment to be securely installed in 23" or 24" wide racks, offering a simple and reliable solution for adapting wider rack enclosures. Available in 1U to 5U height options and both black and white finishes, it's ideal for data centers and telecom applications where flexibility and clean integration are essential.

Features

- Constructed in 14-gauge steel.
- EIA-compliant 10-32 threaded mounting holes.
- Converts standard 23-inch or 24-inch rack mounting rails to 19-inch rack mounting.
- Finished in matte RAL9005 black or RAL9003 white powder paint coat.
 - Complies with the Greenguard guidelines for indoor air quality.
- Rounded corners prevent burrs and sharp edges for an improved factory finish.
- TAA-compliant for federal GSA schedule purchases within the USA.
- RoHS and REACH compliant.
- Manufactured in North America within an ISO 9001:2015 certified facility.
