

403A

SUPER COLD™ 134 Freeze Spray

The 403A Super Cold 134A is a cooling spray for electronics. It quickly chills circuits to -50 °C. It is made is 100% HFC-134a, which is non-flammable, non-conductive, moisture free, and zero residue.

This freeze spray is an electronic component cooler for troubleshooting problem components on PCBs, motherboards, and other electronic devices. It can also be used to protect heat sensitive components during soldering and desoldering, quickly cooling solder joints, and locating hairline cracks in traces. It can be used for low temperature testing of instruments and electromechanical devices, and it can also be used to freeze gum and adhesives for easy removal.

Features & Benefits

Quickly cools electronic components to -51 C (-60F)

Safe for use on energized circuits

Non-flammable & non-conductive

Moisture free & Zero residue

VOC exempt & Ozone safe

Storage and Handling

Store between -20 and 27 °C in a dry area, away from sunlight. Store in well-ventilated places (see SDS).

Available Packaging

Part #	Packaging	Net Vol.	Net Wt.
403A-285G	Aerosol	236 mL	285 g
403A-400G	Aerosol	332 mL	400 g

Application Instructions

Read the product SDS for more detailed instructions before using this product.

To remove safety tab:

1. Firmly hold the head of the nozzle and trigger in place.
2. Pull tab forward on top of nozzle until it snaps off.

To check for intermittent faults:

1. Spray directly on component using bursts of spray.
2. Use extension tube to direct the spray in hard to reach corners.

Properties

Color	Colorless
Odor	Slight, ether-like
Density of Liquid @ 25 °C	1.2 g/mL
Boiling Point	-26.2 °C
Flash Point	None
Ozone Depleting Potential	0.00
GWP (100 y global warming potential)	1 430
VOC	Exempt
Shelf Life	5 y
