

RA2A

2-pole solid state relays

Main features

- AC switching solid state relay
- Zero cross switching
- Back to back thyristor output
- Direct copper bonding (DCB) technology
- For resistive and inductive AC loads
- DC control voltage
- LED for control presence indication for each independent pole
- 6.35 mm Faston termination for control and output terminals

Description

This 2-pole industrial relay minimises the space requirements in a control cabinet without compromising performance. By applying an input voltage on control A, the corresponding output semiconductor is activated at the first zero crossing of the line voltage. The same applies to control B.

LEDs indicate the control status of each pole. The optimised design is free of moulding mass to reduce internal mechanical stress.

The RA2A..M types have been specially customised for demanding inductive loads.

Specifications are at a surrounding temperature of 25°C unless otherwise specified.

Applications

Plastic injection machines, extrusion machines, blow moulding machines, thermoformers, coffee machines, electrical ovens, fryers, shrink tunnels, reflow ovens.

Main functions

- 2 independent pole switching solid state relay
- Zero cross switching
- Ratings up to 600 VAC, 40 AAC per pole
- 4.5 - 32 VDC control voltage range

Order code

Enter the code option instead of ☐. Refer to selection guide section for valid part numbers.

Pick-up voltage	4.25 VDC
Drop-out voltage	2.0 VDC
Maximum reverse voltage	32 VDC
Response time pick-up @ 50 Hz	≤10 ms
Response time drop-out @ 50 Hz	≤10 ms
Input current per pole @ max. input voltage	≤10 mA

Output power dissipation

Applications

Care must be taken to ensure proper heatsinking when the relay is to be used at high sustained currents. Adequate electrical connection between relay terminals and cable must be ensured.

Thermal characteristics

The thermal design of solid state relays is very important. It is essential that the user makes sure that cooling is adequate and that the maximum junction temperature of the relay is not exceeded.

If the heatsink is placed in a small closed room, control panel or the like, the power dissipation can cause the ambient temperature to rise. The heatsink is to be calculated on the basis of the ambient temperature and the increase in temperature.

Heatsink selection

Thermal resistance [$^{\circ}\text{C}/\text{W}$] of RA2A...25/25M

Load current [A]	Surrounding ambient temperature [$^{\circ}\text{C}$]

Radio interference field emission (radiated)	EN/IEC 55011 Class A: from 30 to 1000 MHz
Radio interference voltage emissions (conducted)	EN/IEC 55011 Class A (Industrial) with external filters: from 0.15 to 30 MHz

Note:

- The power circuit to this component may require external suppression to be connected across the power terminals.
- Control input lines must be installed together to maintain products' susceptibility to Radio Frequency interference.
- Performance Criteria 1 (PC1): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): During the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.

Environmental specifications

Operating temperature	-20°C to +70°C (-4°F to +158°F)
Storage temperature	-20°C to +80°C (-4°F to +212°F)
Relative humidity	95% non-condensing @ 40°C
Pollution degree	2
EU RoHS compliant	Yes
China RoHS	

The declaration in this section is prepared in compliance with People's Republic of China Electronic Industry Standard SJ/T11364-2014: Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products.

Part Name	Toxic or Harardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Power Unit Assembly	x	O	O	O	O	O

O: Indicates that said hazardous substance contained in homogeneous materials for this part are below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

这份申明根据中华人民共和国电子工业标准
SJ/T11364-2014：标注在电子电气产品中限定使用的有害物质

零件名称	有毒或有害物质与元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴化联苯 (PBB)	多溴联苯醚 (PBDE)
功率单元	x	O	O	O	O	O

O:此零件所有材料中含有的该有害物低于GB/T 26572的限定。

X: 此零件某种材料中含有的该有害物高于GB/T 26572的限定。

Short circuit protection

Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state. In type 2 coordination the device under test will still be functional after the short circuit. In both cases, however, the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors of terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 65,000 Arms Symmetrical Amperes, 600 Volts maximum when protected by fuses. Tests at 65,000 A were performed with Class J, fast acting: please refer to the table below for maximum allowed ampere rating of the fuse. Use fuses only.

Protection co-ordination Type 1 according to UL 508

Part No.	Prospective short circuit current [kArms]	Max. fuse size [A]	Class	Voltage [VAC]
RA2A..25..	65	30	J / CC	Max. 600
RA2A..40..		40	J	
		20	HSJ20 (Mersen)	

Protection co-ordination Type 2 (IEC/EN 60947-4-3)

Part No.	Prospective short circuit current [kArms]	Ferraz Shawmut (Mersen)		Voltage [VAC]
		Max. fuse size [A]	Part number	
RA2A..25..	10	25	6.9 gRC 10- 25	Max. 600
RA2A..40..		40	6.9xx CP gRC 14x51/40	

xx= 00 without fuse trip indication

xx = 21 with fuse trip indication

Protection co-ordination Type 2 with Miniature Circuit Breakers (M.C.B.s)

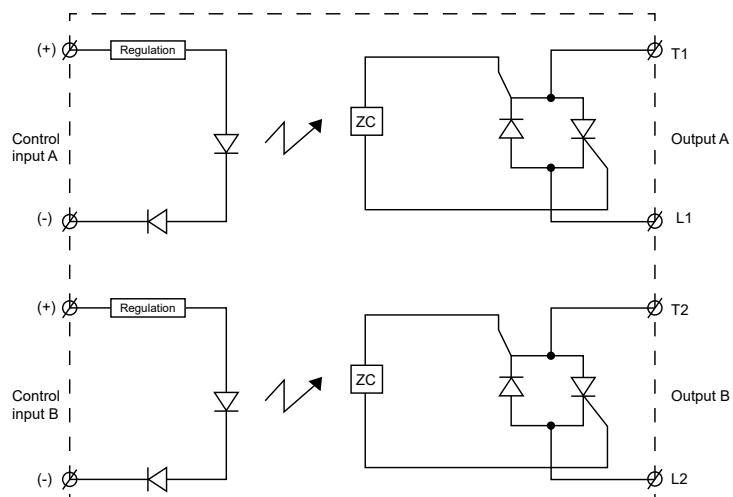

Solid State Relay type	ABB Model no. for Z - type M. C. B. (rated current)	ABB Model no. for B - type M. C. B. (rated current)	Wire cross sectional area [mm ²]	Minimum length of Cu wire conductor [m] ¹
RA2A..25 (525 A ² s)	1-pole S201 - Z4 (4A) S201 - Z6 UC (6A)	S201 - B2 (2A) S201 - B2 (2A)	1.0	21.0
			1.0	21.0
			1.5	31.5
RA2A..40 (1800 A ² s)	1-pole S201 - Z10 (10A)	S201 - B4 (4 A)	1.0	7.6
			1.5	11.4
			2.5	19.0
	S201 - Z16 (16A)	S201 - B6 (6 A)	1.0	5.2
			1.5	7.8
			2.5	13.0
	S201 - Z20 (20A)	S201 - B10 (10 A)	4.0	20.8
			1.5	12.6
			2.5	21.0
	S201 - Z25 (25A)	S201 - B13 (13 A)	2.5	25.0
			4.0	40.0
	2-pole S202 - Z25 (25A)	S202 - B13 (13 A)	2.5	19.0
			4.0	30.4

1. Between MCB and Load (including return path which goes back to the mains)

Note: A prospective current of 6 kA and a 230 / 400 V power supply is assumed for the above suggested specifications. For cables with different cross section than those mentioned above please consult Carlo Gavazzi's Technical Support Group.

S201 models refer to 1-pole M.C.B., S202 models refer to 2-poles M.C.B.
