

OM4 and OM5 Signature Core™ Push-Pull LC Duplex Fiber Optic Patch Cords

general information

OM4 and OM5 Signature Core™ Push-Pull LC Duplex Fiber Optic Patch Cords allow for rapid deployment of high-density permanent links in a single assembly for data center applications requiring high bandwidth, extended reach, and extremely low insertion loss. Push-Pull LC Duplex Fiber Optic Patch Cords containing the custom push-pull strain relief boot and duplex clip, allow users easy accessibility in tight areas when deploying very high density LC patch fields in data center applications. They are available in riser (OFNR) for OM4 Signature Core™ and for plenum (OFNP), and low smoke zero halogen (LSZH) rated jacket materials for both OM4 and OM5 Signature Core™ to comply with local cabling ordinances.

technical information

OM4 and OM5 Signature Core™ Fibers are modal and chromatic dispersion compensating multi-mode fibers designed for optimum performance with high-speed Vertical Cavity Surfacing Emitting Lasers (VCSEL) transceivers. The refractive index profile is engineered to correct for the interaction between modal and chromatic dispersion increasing the total channel bandwidth.

Like OM3 and OM4 fiber types, the actual supported reach for Signature Core™ Fiber family depends on the electrical and optical characteristics of the VCSEL transceiver¹.

OM4 Signature Core™ provides you on average 20% longer reach than OM4 defined standard for all applications using Ethernet, Fibre Channel and Cisco BiDi technologies. For example, the OM4 Signature Core™ Fiber will support a 600m reach with 10GBASE-SR transceivers compared to a 400m maximum reach over OM4 as specified in IEEE 802.32.

OM5 Signature Core™ provides you on average 15% longer reach than OM5 defined standard for all applications that use Short Wavelength Division Multiplexing (SWDM). SWDM is a technology that boosts transmission capacity by sending multiple signals in four wavelengths across the 850nm to 940nm on a single fiber.

OM4 and OM5 Signature Core™ Fibers are 100% standards compliant meeting all OM3 and OM4 specifications, with an additional requirement for Differential Mode Delay (DMD) that compensates for modal and chromatic dispersion effects⁴. OM5 Signature Core™ includes additional bandwidth characterization at 953 nm to support extended distances when using SWDM.

application:

Provide interconnect and cross-connect of applications in entrance facilities, telecommunication rooms, data centers, and network applications to interconnect pre-terminated cassettes in main distribution, horizontal distribution, and equipment distribution areas.

construction

Fiber count:	Duplex (2-fiber) jacketed zipcord
Cable jacket ratings:	Plenum (OFNP) Riser (OFNR) Low Smoke Zero Halogen (LSZH)
Fiber types:	OM4 Signature Core™ OM5 Signature Core™
Connector types, End 'A':	Duplex LC
Connector types, End 'B':	Duplex LC
Jacket color:	Aqua: OM4 Signature Core™ Lime green: OM5 Signature Core™

optical properties

Connector insertion loss:	0.10dB max
Connector return loss:	26dB min

¹ The actual channel reach of a laser optimized, multimode fiber (OM3, OM4, or Signature Core™) depends on the optical and electrical parameters of the VCSEL transceiver. For worst-case optical and electrical parameters, Signature Core™ Fiber will provide at least 20% greater reach over standard un-compensated OM4 fiber.

² OM4 fiber was ratified in the IEEE802.3/D3.0 proceedings from Dec.15, 2011, Table 52-6 with an Operating Range of 2m to 400m.

³ Reach values are a minimum.

⁴ Differential Mode Delay (DMD) is a metric defined in telecommunications industry association standard EIA/TIA 455-220-A, January 2003, which describes a method for measuring the modal dispersion of laser optimized multimode fiber.

⁵ OM5 fiber has been approved as the new wideband multimode standard on June 2016, by ANSI/TIA-492AAAE

physical properties

Cable outside diameter (OD):	1.6mm duplex
Bend radius, minimum:	32mm
Bend radius, minimum (long term):	16mm
Connector cable retention:	50N (4.24 lb) @ 0°C (32°F) 19.4N (4.4 lb) @ 90°C (194°F)
Connector durability:	500 cycles

environmental properties

Storage and shipping temperature:	-40°C to 70°C (-40°F to 158°F)
Operating and installation temperature:	-10°C to 60°C (14°F to 140°F)

standards

Meets or exceeds ISO/IEC 11801, TIA/EIA-568-C.3, TIA-604-5 (FOCIS-10), TIA/EIA-568-C.1, RoHS compliant for OM4 ANSI/TIA-492AAAE, IEC 60793-2-10 Ed 6, TIA 568.3-D, ISO 11801 Ed 3, RoHS compliant for OM5

Restriction of Hazardous Substances (RoHS) Compliance:	All patch cord components meet the requirement of Directive 2002/95/EC

1 – Fiber Product

F = Fiber

2 – Fiber Type

S = OM4+ Signature Core™ Fiber

W = OM5+ Signature Core™ Fiber

3 – Fiber Count

2 = 2-fiber

4 – Cable Type

E = 1.6mm

5 – Jacket Type

L = Low Smoke Zero
Halogen (LSZH)

R = Optical Fiber Non-Conductive
Riser (OFNR)

6 – Connector Type

Q = LC push-pull connector

7 – Connector Variant

1 = Push-Pull Patch Cord

8 – Connector Type

Q = LC push-pull connector

9 – Connector Variant

1 = Push-Pull Patch Cord

10 – Performance/Construction

N = 0.10dB -IL / A-B
(Straight Through)

11 – Connector Variant

N = No variant

12 – Unit of Length

M = Meters

F = Feet

13, 14, 15 – Length

001 – 020m, 025m, 030m
and 035m

001 = 050 Feet for OM5+
Signature Core™

001 = 050 Meters for OM5+
Signature Core™
