DIN rail power supply unit 24 V DC/20 A, primary switched-mode, 1-phase. The SFB technology (Selective Fuse Breaking Technology) can now also be used to trigger standard power circuit breakers reliably and quickly.

Product description

QUINT POWER power supply units – Superior system availability with SFB technology

Compact power supply units of the new QUINT POWER generation maximize the availability of your system. With the SFB technology (Selective Fuse Breaking Technology), six times the nominal current for 12 ms, even the standard power circuit-breakers can now also be triggered reliably and quickly. Faulty current paths are switched off selectively, the fault is located and important system parts continue to operate. Comprehensive diagnostics are provided through constant monitoring of output voltage and current. This preventive function monitoring visualizes critical operating modes and reports them to the control unit before an error can occur.

Commercial data

Item number	2901665
Packing unit	1 pc
Minimum order quantity	1 pc
Sales key	NULL
Product key	CMPQ13
GTIN	4046356623933
Weight per piece (including packing)	3,400 g
Weight per piece (excluding packing)	3,400 g
Customs tariff number	85044095
Country of origin	TH
