## Technical data

### Notes

Notes on operation	The PLC-ATP separating plate should be installed for safe isolation between adjacent modules
Notes on operation	At least one functional insulation against adjacent modules is complied with in the support rail direction. If the application has higher requirements on the insulation (basic or reinforced insulation), then these must be realized through suitable measures (e. g., partition plates).
Notes on operation	This item is intended to be used exclusively as a supplied part for further processing by industry, trade, or other companies with expertise in the field of EMC.
