Plug-in power protective circuit solid-state relay, with signal logic, can be plugged into 4-pos. basic terminal blocks, input: 24 V DC, output: short-circuit-proof, 18 - 36 V DC/4 A

Your advantages

- Feedback in the event of an error
- Safe detection and signaling of a wire break on the load side
- Time-dependent overload shutdown for reliable protection against continuous overloads
- Fast short circuit shutdown with simultaneous current limitation
- After an overload or short-circuit has been triggered, a defined reset of the control voltage must be carried out
- Brief inrush peaks are ignored
