Hospital-grade extension cord connects two devices with 5-15P-HG/5-15R-HG power connectors in a hospital or other medical facility.

Features

Heavy-Duty Hospital-Grade Extension Cord is a Safe Solution for Medical Facilities This hospital-grade power cord is designed for computers, mobile carts, printers, scanners, monitors and other compatible hospital equipment within a healthcare facility and outside patient-care vicinities. It features 14 AWG wire suitable for high power connections, making it a reliable solution for large server applications that require a higher-rated, heavier-gauge cable. The 6-ft. (1.83 m) length allows you flexibility in placing equipment with respect to the power outlet.

Designed and Tested to Strict Hospital-Grade Standards This cord is tested to ANSI/UL 62 and 817 standards, as well as CAN/CSA C22.2 no. 21 and 49 standards, ensuring it's a dependable power solution for hospital environments.

Color-Coded to Avoid Misidentification That Can Cause Costly Downtime This extension cord features a gray SJT jacket and fully molded gray ends. The color-coding allows easy, fast identification in a crowded surge protector and helps prevent the cable from becoming inadvertently disconnected.
