Hybrid version: layouts 3 rows	31
HiLinX 1.905	32
Female signal contacts for receptacles	34
Male signal contacts for plugs	36
Special contacts for 3-row hybrid connectors	38
Non keying guides	40
Keying guides / Connector polarization	41
Locking: fixed jacksets, hexagonal turning jacksets & slotted turning jacksets	42
Realignment capability / Mating sequence	44
Signal version: compatibility with the MIL-DTL-55302	45
Signal version: typical arrangements 2 & 3 rows	46
Signal version: layouts 2 & 3 rows	47
Hybrid version: dimensions	48
Hybrid version: layouts	49
Tooling	50

HDAS - The high density monolithic connector

HDAS product range	52
Female signal contacts for receptacles	56
Male signal contacts for plugs	57
Female & Male fittings	58
Realignment capability / Mating sequence	59
Typical arrangements 3 & 4 rows	60
Layouts 3 & 4 rows	61
Typical arrangement 5 rows	62
Layout 5 rows	63
Tooling	64

SMASH - The high density interconnect system for harsh environment applications

SMASH product range	66
Standard technology of contacts	70
Special technology of contacts	71
Standard housings and shells	72

Table of Contents

Special housings and shells/ Mating sequence	73
Typical arrangements & layouts 150 signal contacts	74
Typical arrangements & layouts 300 signal contacts	75
Typical arrangements & layouts 450 signal contacts	76
Typical arrangements & layouts 396 signal contacts	77

SIAL - The hybrid connector for use with thermal clamps

SIAL product range	80
Signal contacts	84
Special contacts	86
Signal modules	88
Hybrid modules	88
Fittings and guiding	89
Keying	89
Realignment capability	89
Mating sequence	89
SIAL signal version typical arrangements	90

SIAL coaxial version typical arrangements	93
SIAL coaxial version layouts	94
Tooling	96

SIHD - The monolithic connector for use with thermal clamps

SIHD product range	98
Female signal contacts for plugs	102
Male signal contacts for receptacles	103
Ground strips	103
Guiding / Keying	104
Mating sequence	104
Realignment capability	104
Fixing accessories	105
SIHD without ground strip typical arrangements	106
SIHD with ground strip typical arrangements	107
SIHD without ground strip layouts	108
SIHD with ground strip layouts	109

127 Series - The proven, reliable, and robust connector

127/HE8 product range	110
Signal contacts	114
Special contacts	116
Female fittings for receptacles	118
Male fittings for plugs	122
Typical arrangement and layout, signal connectors (HE801 & HE804)	126
Typical arrangement and layout, hybrid connectors (HE807)	128
Fittings & contacts compatibility	131
Tooling	134

Other Amphenol Board Level Interconnect

Amphenol Aerospace Operations – HDB ³ / HSB ³ / LRM / VME64x interconnects	136
Amphenol Backplane Systems – VIPER - VITA46, VITA 48, VITA 60 footprint compatible interconnects	139
Amphenol Teradyne Connection Systems – The widest high speed interconnect solutions	140
Amphenol Printed Circuits – Rigid, flexible and rigid-flex printed circuit board capabilities	142

Amphenol in brief

Amphenol is one of the largest manufacturers of interconnect products in the world. The Company designs, manufactures and markets electrical, electronic and fiber optic connectors, coaxial and flat-ribbon cable, and interconnect systems.

The primary end markets for the Company's products are communications and information processing markets, including cable television, cellular telephone and data communication and information processing systems; aerospace and military electronics; and automotive, rail and other transportation and industrial applications.

Amphenol Socapex in brief

Amphenol Socapex is part of Amphenol Corporate. The company has subsidiaries in France, India, China, and in the United States. Amphenol Socapex is a market leader of MIL-DTL-38999 and derived products, high density board level connectors, field bus and rugged Ethernet solutions, harsh environment optical connectors, MIL-DTL-26482 Series I rugged industrial solutions and EN2997 connectors.

Amphenol Socapex is able to meet customer satisfaction through:

- Agile & Lean Organization
- Global Sourcing
- State-of-the-Art Manufacturing
- Custom design capability
- Competitive Independent Workshops

Amphenol Socapex is aware of environmental issues. Indeed, most of our product solutions are compliant with the European RoHS directive concerning electrical and electronic equipment.

Amphenol Socapex Markets

Military & Aerospace markets:

- Military and commercial avionics and airframe: engines, airframes, cockpit, landing gears...
- C4ISR Land: communication systems, radio...
- Ground vehicles
- Marine applications
- Weapons / Munitions
- Space: communications satellites

Industrial markets:

- Oil & Gas: geophysics, drilling, production
- Small Urban Electrical Vehicle
- Mining: surface and underground mining, ...
- Factory Automation: Machine tool, Networks, Field Buses,...
- Railway: Signaling, Ground and On Board Equipments,...
- Homeland security: CCTV (video), access control,...
- Entertainment

Amphenol Socapex Box Capabilities

1

HiLinX Series *(see page 8)*

Unique M55302 modular interconnect. System of interlocking signal, power, fiber optics, and HF modules for dedicated board level mixed solution.

2

HDAS Series *(see page 52)*

Monolithic high density PCB interconnect. Provides higher current rate capability, and extreme withstanding to harsh environments, such as very high temperature and vibrations level.

3

SMASH Series *(see page 66)*

High density rack and panel for rectangular in and out solutions. Possibilities of hybrid inserts, EMI shielding, as well as sealing and rear potting.

4

SMASH Derivated *(see page 66)*

High density rack and panel for rectangular in and out solutions. Possibilities of hybrid inserts, EMI shielding, as well as sealing and rear potting.

5

SIAL Series *(see page 80)*

Modular PCB interconnect, which provides various combinations of both signal and HF contacts inserts.

6

SIHD Series *(see page 98)*

Monolithic staggered grid connector, with floating capability feature.

7

127 / HE8 Series *(see page 110)*

Proven legacy product, which meets various worldwide standard. Various features, including a wide range of hardware and locking devices.

8

I/O Cylindrical connectors *(consult us)*

Amphenol Socapex provides cylindrical I/O front panel connectors per various standards, including MIL DTL 38999, Series I,II, and III, HE308, EN3645, VG96912 / EN2997 / MIL DTL 26482 Series I, VG95328. Numerous platings and arrangements available, in addition to unique custom design capabilities (snatch release, rack and panel, high density, PC tail stand-offs, HF contacts, hybrid optical / electrical solutions ...).

9

RJ Field *(consult us)*

Transforms all standard existing RJ45 Cat5e cordset into an environmental connector, without any cabling operation, and without any tool. Other infocom connectors such as USB, USBB, RJ11, RJ12, IEEE1394, MTRJ, LC, can also be rugged with the same concept.

10

Thermal Clamps *(consult us)*

Chassis devices, which both help to dissipate components heating and block the daughter cards into the box slots grooves.

11

12

Printed Circuit Boards for backplanes & daughter cards *(see pages 142 & 143)*

Fabrication capabilities include a wide variety of materials to enable increasing signal speeds, deep microvias, buried, blind and backdrilled vias, sequential lamination, panel sizes from 18" x 24" up to 24" x 54", and layer counts up to 60 with a board thickness of 0.400".

13

Rigid and rigid-flex PCBs *(see pages 142 & 143)*

Rigid-Flex circuit interconnects featuring blind and buried vias, microvias, bookbinder and other cutting-edge technologies including large format panels.

HiLinX

Create the connector you need

Amphenol has engineered a complete range of high & medium density, staggered grid, modular connectors with both 1.905x1.905[.075x.075] & 2.54x2.54 [.100x.100] pitches.

The HiLinX range provides a unique choice of solutions by allowing a mix of various contact types: signal, power, fiber optics and coaxial lines.

The concept

With our HiLinX, build your own connector the way you want it! The HiLinX is a system of modules, metal rails and fittings. Thanks to this modularity, a wide range of contact combinations can be made at the board level. Whatever types of signals required, from power to fiber optics, almost all existing contacts on the market can be adapted to our connector.

Let's maximize the PC board capabilities!

Modularity for custom connector design!

With the HiLinX series, you specify:

- The density of signal contacts
- The type and number of signal contacts
- The type, the number and the position of special contacts
- The guiding, keying or locking system

With the HiLinX series, the design of the connector is up to you!

With HiLinX, feel free to create your own product. Amphenol remains the only provider of both assembly and delivery.

MIL-DTL-55302
/190 to /193

MIL-DTL-55302
/57 to /66, /138, /139

Some HiLinX arrangements are fully compatible with the MIL DTL 55302
(/57 to /66, /138, /139 & /190 to /193 detailed sheets) (see pages 23 & 45).

HILINX 2.54 >>> GENERAL SPECIFICATIONS

MEDIUM
DENSITY

- A unique connector, both hybrid and modular
- Cost effective, easy to install, highly reliable
- More current through each contact
- Greater performance and optimal protection in harsh environments
- Compatible with signal connectors on the market (MIL-DTL-55302/57 to /66, /138, /139)
- 2.54 [.100] staggered grid (1.27 [.050] offset), 2.54 [.100] between rows

Main characteristics

- Medium density: 0.11 cts/mm² [71 cts/inch²]
- From 2 to 3 rows, 10 to 170* signal contacts
- 5 A per signal contact (up to 6A current rating available upon request)
- Press-fit solderless attachment technology and crimp contact available
- Some signal contact versions are 100% compatible with the M55302 /57 to /66, /138 & /139

Female contact

Starclip® female technology: 6 times for better reliability

- 6 contact tines instead of 4
- Excellent mechanical and electrical reliability
- Better resistance to high vibrations
- Improved electrical conductivity
- 100% compatible with other connectors

Material

- Hood: machined brass alloy
- Starclip: CuBe [BeCu], stamped and formed

Plating

- Hood: tin lead or lead free
- Starclip: gold over nickel

Male contact

- **Mating end diameter:** $\varnothing 0.76$ [.030]
- **Contact section** (mating side): 0.45 mm^2 [.0007 in²]
- **Material:** machined brass alloy
- **Plating:** gold over nickel

Materials

- **Guiding devices:** electroless nickel plating over brass CuZn or passivated stainless steel 303
- **Rails:** passivated stainless steel 316L
- **Plastic insert:** thermoplastic LCP, 30% glass-fiber filled

FULL ROUND GUIDES

Standard

- 1 female socket and 1 male pin
- Non keying
- Nickel over brass
- Mating with 65 or 69 keying
- MIL-DTL-55302 PN: X

For receptacle:

65

Reversed

- 1 male pin and 1 female socket
- Non keying
- Nickel over brass
- Mating with 66 or 70 keying

For receptacle:

66

Two male guide pins

- 2 male guide pins
- Non keying
- Nickel over brass
- Mating with 68 or 72 keying

67

Two female guide sockets

- 2 female guide sockets
- Non keying
- Nickel over brass
- Mating with 67 or 71 keying

68

LONG FULL ROUND GUIDES

6.2738 [.247] standard

- 1 female socket and 1 male pin
- Non keying
- For receptacle and straight plug w/o mounting ears
- Nickel over brass
- Mating with 69 or 65 keying
- MIL-DTL-55302/63 & /64 P/N: X

69

6.2738 [.247] reversed

- 1 male pin and 1 female socket
- Non keying
- For receptacle and straight plug w/o mounting ears
- Nickel over brass
- Mating with 70 or 66 keying

70

6.2738 [.247] two male guide pins

- Non keying
- For receptacle and straight plug w/o mounting ears
- Nickel over brass
- Mating with 72 or 68 keying

71

6.2738 [.247] two female guide sockets

- Non keying
- For receptacle and straight plug w/o mounting ears
- Nickel over brass
- Mating with 71 or 67 guides

HILINX 1.905 >>> GENERAL SPECIFICATIONS

HIGH DENSITY

- A unique connector, both hybrid and modular
- Cost effective, easy to install, highly reliable
- More current through each contact
- Greater performance and optimal protection in harsh environments
- Compatible with signal connectors on the market (MIL-DTL-55302/190 to /193)
- 1.905[.075] staggered grid (0.9525[.0375] offset), 1.905[.075] between rows

Main characteristics

- High density: 0.16 cts / mm² [103 cts / inch²]
- From 2 to 3 rows, 10 to 206 signal contacts
- 3A per signal contact (up to 5A current rating available upon request)
- Press-fit solderless attachment technology available
- Some signal contact versions are 100% compatible with the M55302 /190 to /193.

HILINX 1.905 >>> TECHNICAL SPECIFICATIONS

Dimensional characteristics

- $H = 7.62_{\text{MAX}} [0.300]$
 $A = 5.12_{\text{MAX}} [0.202]$ for 2-row connectors
 $A = 7_{\text{MAX}} [0.276]$ for 3-row connectors
 $B = 5.72 + X [0.225 + X]$ for 2-row connectors
 $B = 7.6 + X [0.300 + X]$ for 3-row connectors
 $X = \text{Board thickness} + \text{hardware thickness}$
 $d = 15.24_{\text{MAX}} [0.600]$
 $e = 1.8 [0.071]$ to $3.4 [0.134]$ or $2.5_{\text{MIN}} [0.098]$ (for YP contacts)

Female contact

Starclip female technology: 6 times for better reliability

- 6 contact times instead of 4
- Excellent mechanical and electrical reliability
- Better resistance to high vibrations
- Improved electrical conductivity
- 100% compatible with other connectors

Material

- Hood: machined brass alloy
- Starclip: CuBe[BeCu], stamped and formed

Plating

- Hood: tin lead or lead free
- Starclip: gold over nickel

Male contact

- **Mating end diameter:** $\varnothing 0.635 [0.025]$
- **Contact section** (mating side): $0.32 \text{ mm}^2 [0.0005 \text{ in}^2]$
- **Material:** machined brass alloy
- **Plating:** gold over nickel

Materials

- **Guiding devices:** electroless nickel plating over brass CuZn or passivated stainless steel 303
- **Rails:** passivated stainless steel 316L
- **Plastic insert:** thermoplastic LCP, 30% glass-fiber filled

HDAS

The high competitive connector

Amphenol reduces the pitch and increases the density of contacts with the brand new HDAS range. 1.905 x 1.905 [.075 x .075] staggered grid pattern, from 3 to 6 rows*.

With its robust and simple design, high density, and high performance to extreme conditions, HDAS is the right connector when installation, cost, and reliability must be considered.

100% cost effective

The press-fit technology allows significant assembly cost reduction on the backplane while ensuring an extreme reliability, even for the thickest motherboards. No more solder joints, pre-baking, or cleaning.

100% optimized

- The guiding/keying devices can be polarized in 6 positions within their own cavities, i.e. 36 keying possibilities per connector.
- The lateral rails on the male connector provide optimal protection to the contacts.
- The mechanical protection of the female contacts is provided per design.

100% performing

- The proven starclip technology of the socket provides a higher current rate, as well as an improved robustness as compare to the traditional technologies.
- LCP material allows all types of soldering processes as well as a higher temperature rating.
- HDAS has surpassed all MIL-DTL-55302 requirements as well as the new demands for military transportation.

HDAS>>> GENERAL SPECIFICATIONS

**HIGH
DENSITY**

- Robust technology
- Dedicated to harsh environment (high temperature and vibration levels)
- The most effective
- 1.905[.075] staggered grid (0.9525[.0375] offset), 1.905[.075] between rows

Main characteristics

- High density: 0.16 cts/mm² [103 cts/inch²]
- 9 sizes from 3 to 6* rows, 50 to 402* signal contacts
- 4.5A per signal contact
- DWV: 750 Vrms
- Press-fit solderless attachment technology available
- Lateral rails to protect male pins from external damage

HDAS >>> TOOLING

MOUNTING OF A STRAIGHT PLUG (YD) ON A BOARD

- Assemble alignment spacers (C and D) with tooth chamfers facing up, then insert positioning pins (E) into holes on spacers.
- Align the connector (A) on the spacers using positioning guide (B).
- Exert slight pressure on the connector so the contact tails pass through the spacer cavities and into the PCB holes
- Remove positioning pins (B and E) and alignment spacers (C and D)
- Exert pressure on the connector until it butts against the board and fasten fixing accessories

Part number

HDAS ODP1 xxx

MOUNTING OF A RIGHT ANGLE (YC) PLUG ON A DAUGHTER BOARD

- Assemble alignment spacers (C and D) with tooth chamfers facing up, then insert positioning pins (E) into holes on spacers.
- Align the connector (A) on the spacers using positioning guide (B).
- Exert slight pressure on the connector so the contact tails pass through the spacer cavities and into the PCB holes
- Remove positioning pins (B and E) and alignment spacers (C and D)
- Exert pressure on the connector until it butts against the board and fasten fixing accessories

Part number

HDAS ODP2 xxx

SMASH

The high density interconnect system for harsh environment applications

The SMASH connector offers extremely high robustness where signal integrity is required. Based on an aluminium shell with 1, 2 or 3 bays, the SMASH connector can house up to 450 contacts, with up to 150 contacts per bay. The chevron grid pattern (1.905 x 1.905 [.075 x .075]) provides high contact density for advanced electronics packaging. The metallic shell is equipped with grounding, guide pins, and keying devices to ensure mechanical reliability.

The modularity

Within the standard SEM E form factor, the SMASH connector provides a wide array of signal transmission combinations. Various inserts can be housed within the robust, modular shell while meeting the standard board and chassis formats.

A connector that is adaptable to all types of mounting and soldering processes

The sculptured flex circuit termination of the daughter card connector can accept the thickest boards. No tooling is required as the design provides good alignment to the solder pads of the daughter card.

A connector dedicated to harsh environment

The Starclip technology of the socket contact (with a 6 tine clip) offers high mechanical and electrical reliability, combined with low insertion force. The SMASH connector is ruggedized to meet extreme conditions such as salt spray, vibration, and contact resistance.

Flexibility

From 1 to 3 bays with 150 or 132 signal contacts per bay, the SMASH connector is available in either chevron grid or staggered grid* patterns. It can provide RF, power, and fiber optic solutions with hybrid arrangements. LVDS signals* are also available.

NOTES

SIAL

The hybrid connector for use with thermal clamps

SIAL is a modular high density interconnection system that has the capability to mix signal and coax contacts. The contact technology developed for this connector allows the use of thermal clamps. With 3 sizes of modules, the SIAL connectors provide the arrangement needed, from 18 to 392 contacts. In a staggered grid pattern (2.54 x 1.905 [.100x.075]), this connector houses 5 rows of contacts in a low profile board to board format. Additionally, SIAL connectors provide shielding on both plug & receptacle, which allows the dissipation of all the electrical charge while mating.

The concept

3 standard modules are available with 18, 58 and 98 signal contacts on 5 rows. These allow arrangements up to 392 contacts. The various modules are maintained in a metallic shell, allowing both protection of male contacts on the plug, and a mix of signal and coax modules.

Compatible with the use of thermal clamps

Its standard contact technology, already used in the monolithic SIHD connector, permits the lateral displacement (± 0.25 [.010]) of the pin into the socket without generating any stress on the contact termination on the PCB.

This feature allows the use of thermal clamps to keep the daughter board in position after mating, as well as the dissipation of energy generated by the components on the board from the heat sink (thermal drain) to the cold wall (liquid cooled) or to the chassis. The locking of the thermal clamps provides the lateral movement of the plug into the receptacle. The SIAL allows this lateral displacement of ± 0.25 [.010] without creating stress on the solder joints or on the contact area.

SIAL >>> TECHNICAL SPECIFICATIONS

Dimensional characteristics

L= 22.86[.900] to 231.14[9.100] for signal version
 L= 53.34[2.100] to 180.34[7.100] for hybrid version
 A= 12.1_{MAX} [.476]
 H= 6.41_{MAX} [.252] for plug
 H= 10.26_{MAX} [.404]

Female contact

Cross cavity by Amphenol: lateral displacement compatible

- Cross section of the lateral displacement of the male contact inside the female cavity
- Maintains 2 points of contact
- Allows a ± 0.25 [$\pm .010$] lateral displacement
- No stress on solder joints or on the contact area

Material: beryllium copper (stamped)

Plating:

- Termination: tin lead or lead free
- Active contact area: gold over nickel

Male contact

Mating end size: 0.6 x 1.2 [.047 x .024]

Contact section (mating side): 0.72mm² [.001 in²]

Material: beryllium copper (stamped)

Plating:

- Termination: tin lead or lead free
- Active contact area: gold over nickel

Materials

- **Fixing devices:** anodized aluminium
- **Guiding devices:** passivated stainless steel
- **Polarizing pins:** passivated stainless steel
- **Metallic rails:** passivated stainless steel
- **Plastic inserts:** thermoset DAP, 30% glass-fiber filled

MECHANICAL CHARACTERISTICS

Backoff ¹ (mm)	< 0.8 [.031]
Mating force per contact (N)	0.58 _{MAX}
Unmating force per contact (N)	0.16 < F < 0.58
Durability cycles	500
Sinusoidal vibrations (10 to 2000 Hz) micro discontinuity 2ns	10 g
Random vibrations (10 to 2000 Hz) micro discontinuity 2ns	0.15 g ² / Hz
Shocks micro discontinuity 1ns	100 g

ENVIRONMENTAL CHARACTERISTICS

Thermal shocks (°C)	-55 / +125
Salt Spray (hours)	144* or 96

ELECTRICAL CHARACTERISTICS

Current rating per contacts (A)	3
Insulation resistance (at 500Vdc) (GΩ)	5 _{MIN}
Contact resistance (mΩ)	25 _{MAX}
Dielectric Withstanding Voltage (Vrms)	750
Capacitance between contacts (pF)	1.5 _{MAX}
Service voltage (at 50 Hz) (Vrms)	250

* "C" standard version

¹: When both connectors are fully mated, the backoff is the maximum distance the connectors can be unmated while functioning properly

SIHD

The monolithic connector for use with thermal clamps

The SIHD connector combines excellent electrical performances with high contact density within a robust housing, which can withstand extreme environmental conditions. In addition, the lateral displacement capability allows the use of thermal clamps for heat management, as well as a more relaxed positional tolerance on the backplane. The optional central ground strip provides cross talk protection and permits the routing of differential pairs. Contacts can be repaired and replaced individually.

The ability to include ground strips

- Transmission of high-speed signals made easy by reducing self inductance with the inclusion of central ground strips
- Cross talk and self impedance levels reduced impedance 70Ω to 120Ω
- Capacitance distributed along signal contacts

Compatible with the use of thermal clamps

Its standard contact technology, already used in the SIAL connector, permits the lateral displacement (± 0.25 [.010]) of the pin into the socket without generating any stress on the contact termination on the PCB.

This feature allows the use of thermal clamps to keep the daughter board in position after mating, as well as the dissipation of energy generated by the components on the board from the heat sink (thermal drain) to the cold wall (liquid cooled) or to the chassis. The locking of the thermal clamps provides the lateral movement of the plug into the receptacle. The SIHD allows this lateral displacement of ± 0.25 [.010] without creating stress on the solder joints or on the contact area.

SIHD>>> GENERAL SPECIFICATIONS

MEDIUM
DENSITY

- 2.54 [.100] staggered grid (1.27 [.050] offset), 1.905 [.075] between rows
- Lateral displacement capability allowing the use of thermal clamps: $\pm 0.25 [\pm .010]$
- Possibility to have a central ground strip
- Designed for severe mechanical environments
- Low weight

Main characteristics

- Medium density: 0.14 cts/mm² [90 cts / inch²]
- 7 variations: 5 rows from 102 to 390 signal contacts
- 3 A per signal contacts / DWV: 750* Vrms
- Lateral rails to protect the male contact from external damage
- Repairable contacts for easy maintenance

127 / HE8

Proven, reliable and robust connector

The 127 series is a medium-density range of multi-contact plug-in connectors for printed circuit boards. This range of 2.54 [.100] staggered grid, low profile connectors meets the common harsh environmental requirements.

A wide range of fittings and guides, as well as numerous contact terminations, provide more flexibility to PCB designers.

A well-proven technology

- The 127 series uses a 2.54 [.100] staggered grid pitch with 2.54 [.100] between rows. Available in 2 or 3 rows.
- The contact technology is based on the tuning fork and blade concept. Using advanced copper alloys provides optimized electrical conductivity as well as long-term mechanical reliability.

A large choice of attachments on Printed Circuit Boards

- Different styles, from 17 to 144 signal contacts with various terminations: straight, right angled 90°, crimp barrel, solder cup, SMT and wire-wrapping.
- Hybrid patterns, with a combination of 3 to 10 special cavities, permit the usage of coaxial, power contacts, as well as optical termini.

The 127 series connectors are available in 3 different versions: HE801 / HE804 / HE807

This proven range of PCB connectors complies with numerous international standards:

NFC UTE 93424
HE801, HE804 & HE807

BS9525
N0001, F0006, F0007

Fittings (see pages 118 to 125)

Socket	Pin	Description
YC		Right angle PC tail
YL		Long right angle PC tail
T		SMT with metallized terminals
U		SMT double sided
Y		Straight PC tail
YD		Straight PC tail (for HE804 connector only)
W3		Wire wrap connections
Z	ZC	Solder on wire
X1	X**	Crimping tail
Blank		No signal contacts (HE807)

Signal contacts (see pages 114 to 115)

* Asymmetrical arrangements with female contacts always have plug marking. Asymmetrical arrangements with male contacts always have receptacle marking.

** Not available for HE801 and HE807 connectors.

All dimensions are given for information only and are in mm [inch], except as otherwise specified

127 / HE8 >>> TECHNICAL SPECIFICATIONS

Dimensional characteristics

H = 7.9 [.311] for HE801 & HE807 connectors
 H = 6.9 [.272] for HE804 connectors
 A = 6.3 [.248] for 2-row connectors
 A = 8.55 to 8.94 [.337 to .352] for 3-row connectors
 E = 37.5 to 144.2 [1.476 to 5.677]

Female contact

Female tuning fork contact

- Compatible with other technologies

Material

- CuSn9P (blade)

Plating

- Terminations: gold on W3, X & X1 and tin lead or lead free on YD, Y, Z, YC, YL, T & U
- Active contact area: gold over nickel

Male contact

- For HE801 & HE807 connectors
- Contact section: 0.28mm² [.0004 inch²]

- For HE804 connectors
- Contact section: 0.48mm² [.0007 inch²]

- Material: CuZn (blade)
- Plating
 - Terminations: gold on W3, X & X1 and tin lead or lead free on YD, Y, Z, YC, YL, T & U
 - Active contact area: gold over nickel

Materials

- Fittings:** electroless nickel over brass or passivated stainless steel (303 ASTM)
- Plastic insert:** thermoset DAP, 30% glass-fiber filled

MECHANICAL CHARACTERISTICS	HE801	HE804	HE807
Backoff ¹ (mm)	1 _{MAX} [.039]	1 _{MAX} [.039]	1 _{MAX} [.039]
Mating force per contact (N)	1.60 _{MAX}	1.60 _{MAX}	1.60 _{MAX}
Unmating force per contact (N)	0.14 _{MIN}	0.14 _{MIN}	0.14 _{MIN}
Durability cycles	500	500	250
Vibrations (20 to 2000 Hz) micro discontinuity 1μs	10 g	10 g	10 g
Shocks micro discontinuity 1μs	100 g	100 g	100 g
Recommended tightening torques			
- nuts for Ø 2.5mm screws, brass m.N	0.25	0.25	0.25
- nuts for Ø 1.6mm screws, brass m.N	0.15	0.15	0.15
ENVIRONMENTAL CHARACTERISTICS			
Thermal shocks (°C)	-55 / +125	-55 / +125	-55 / +125
Salt Spray hours	96	96	96
ELECTRICAL CHARACTERISTICS			
Current rating per contacts (A)	See derating curve	See derating curve	See derating curve
Insulation resistance (GΩ)	5 _{MIN}	5 _{MIN}	5 _{MIN}
Contact resistance (mΩ)	12 _{MAX}	12 _{MAX}	12 _{MAX}
Dielectric Withstanding Voltage (Vrms)	1 000	1 000	1 000
Capacitance between contacts (pF)	5 _{MAX}	5 _{MAX}	5 _{MAX}
Service voltage at 50 Hz (Vrms)	250	250	250

¹: When both connectors are fully mated, the backoff is the maximum distance the connectors can be unmated while functioning properly

All dimensions are given for information only and are in mm [inch], except as otherwise specified

TYPICAL ARRANGEMENTS

n indicates the total number of signal contacts

Signal contacts on 2 rows without central fitting*

n = 17, 29, 33, 41, 53 or 65

A	6.3 ^{+0.1}
B	(n-1) X 1.27
C	B - 2.54
D	B + 10.16
E	≈ D + 7

Signal contacts on 2 rows with central fittings*

n = 72, 84, or 96

A	6.3 ^{+0.1}
B	(n-4) X 0.635
D	2 X (B + 10.16)
E	≈ D + 7

Signal contacts on 3 rows without central fittings*

n = 80

A	8.94
C	66.04
D	76.3 _{MAX}
E	83.4 _{MAX}
F	3.1

Signal contacts on 3 rows with central fittings*

n = 144

A	8.55 _{MAX}
B	58.42
D	137.16
E	144.36 _{MAX}
F	3.1

Panel drilling*

- Receptacle with A-AD-AT fittings or plug with R-RF-RS-T fittings with male contact W3-ZC-X

- Receptacle with P fitting and female contact W3-Z

D	See above
L	≈ D - 4.6
h	9.5 _{MIN}
R	Ø 5 ± 0.1 ⌀ 0.2

* in mm: 1mm = 0.03937 inch

** The standard version presents a stiffening bar with W3-ZC-Z contacts and no stiffening bar with YC-V-Y-YD-X contacts. Put an A in the part number code to have no stiffening bar on the connector with W3-ZC-Z contacts or a B to have a stiffening bar on the connector with YC-U-Y-YD-X contacts.

All dimensions are given for information only and are in mm [inch], except as otherwise specified

127 / HE8 >>> HE 801 & HE 804**LAYOUTS**

The boards are shown from the connector side.

The drawings show various footprints for connectors with a central attachment on board.

For smaller connectors (17, 29, 33, 41, 53 and 65 contacts), omit the center drilling.

All contacts outputs are equidistant. For daughterboard, the first contact's marking is indicated for reference only.

AMPHENOL AEROSPACE OPERATIONS >>> BOARD LEVEL INTERCONNECTS

BRUSH CONTACT TECHNOLOGY

- Multiple strands of high tensile strength wire bundled together to form brush-like contacts.
- Multiple contact interfaces. By intermeshing two multi-strand wire bundles, an electrical connection is made.
- Provides redundant current paths, 14-70 (points of contact) per mated contact with a gas tight junction
- Very smooth (low friction) interface

HDB³ / HSB³ THE HIGH DENSITY BRUSH SERIES

HDB³ series

This new connector series of brush connectors incorporates an even higher density contact pattern and lower mated height than Amphenol's standard low mating force rectangular connectors. These HDB³ connectors utilize the same durable and reliable B³ brush contact in a tighter .070 inch x .060 inch staggered grid pattern.

- Higher density contact pattern
- Uses less board space
- Allows for shorter mated height
- Provides durability and performance of the brush contact
- Low cost
- Available in mother board, daughter board, Input/Output and stacker style

HSB³ series: high-speed series 3.125 GBS

The HSB³ is a further new development of the higher density HDB³ connector series. The HSB³ offers higher speed as well as higher density.

- Allows data rates up to 3.125Gb/s via 100 ohm matched impedance differential pairs
- Uses partially populated standard HDB³ mother board and daughter board inserts

The HDB³ / HSB³ series serve various markets, including:

Commercial Avionics
& Airframe

Military Avionics & Airframe

C4ISR

Navy

AMPHENOL AEROSPACE OPERATIONS >>> BOARD LEVEL INTERCONNECTS

LRM LINE REPLACEABLE MODULE

Amphenol LRM surface mount connectors meet the high-density needs of today's integrated electronic modules. With its flexibility in design, Amphenol LRM interconnects are capable of meeting the wide variety of user requirements:

- LRM interconnects can be designed in 1, 2, 3 and more bay configurations
- LRM digital (brush) inserts can be combined with inserts for power, fiber optics, RF, high speed and high amperage RADSOK® contacts

Staggered Grid LRM: high contact density in SEM-E form factors

- Digital insert pattern grid is in 8 rows: 0.100 inch spacing along the row with 0.050 inch between rows, rows offset 0.050 inch.
- Typical standard arrangements: 80, 108, 152 or 180 digital brush contacts
- Various shell designs available to accommodate a wide range of PCB/ heat sink
- SMT termination on module connectors, PCB on backplane connectors
- ESD protection
- LVDS differential pair insert available, 100 ohm matched impedance, exceeding 1.2 Gbps available

LRM with Fiber Optics

- High speed fiber optic transmission
- Custom combinations of digital contacts and fiber optic termini
- Insertion losses range from .3dB to <1.5dB
- MIL-T-29504/4, /5, /14 & /15 termini
- MT ferrule arrangements (12 or 24 fiber lines per ferrule)

High-speed LRM: GigaStak, GigaStak-LG, DigiStak & DigiStak-X

These LRMs are designed, or can be configured, to achieve data rates up to 6.25 Gb/s and include all the features of the rugged and reliable staggered grid LRM series.

In addition, the GigaStak and DigiStak series incorporate Amphenol's cStack solderless termination technology.

- Optimized insert through strategic placement of signal and ground contacts
- Perfect balance of impedance control and cross talk mitigation
- 100 ohm matched impedance differential pairs
- GigaStak 6.25 Gb/s
- GigaStak-LG 3.125 Gb/s
- DigiStak & DigiStak-X 3.125 Gb/s
- Standard staggered grid 1.25 Gb/s

The LRM series serve various markets, including:

Military Avionics
& Airframe

Commercial Avionics
& Airframe

C4ISR

Ground vehicles

Space

AMPHENOL AEROSPACE OPERATIONS >>> BOARD LEVEL INTERCONNECTS

RUGGEDIZED VME64X INTERCONNECTS

In a harsh military environment the COTS VME connector interface can fail, negating the ruggedization of the cards. The Amphenol Ruggedized VME64x interconnect has a more rugged interface than standard connectors for improved vibration durability. It meets the needs for a harsh environment connector requiring Level 2 maintenance. The Amphenol Ruggedized VME64x connector mounts to standard VME64x cards and backplanes, but it does not mate to other types of VME commercial connectors.

Features and benefits include:

- Metal shells - mount directly to the standard VME card mounting holes, providing support and protection to the inserts in the module and additional stiffness to the backplane
- The metal shells create a faraday cage around the contacts, preventing ESD (Electrostatic Discharge) into the contacts (module only)
- Robust contact system
- 3 module inserts in one unified shell; each can have different interconnect combinations.
- Thru-hole solder tail or solderless termination is available on the backplane connector.

The ruggedized VME64x series serves various markets, including:

Commercial Avionics
& Airframe

Military Avionics & Airframe

C4ISR

Ground vehicles

AMPHENOL BACKPLANE SYSTEMS >>> BOARD LEVEL INTERCONNECTS

VIPER VITA 46, VITA 48 & VITA 60 FOOTPRINT COMPATIBLE

- High-level vibration and mechanical shock protection
- Condensing moisture resistance
- Ruggedization in packaging
- Scaling from 80 Mbps to over 10 Gb/s while retaining the same VITA 46 platform slot pitch at 20.3mm to 25.4mm.

The VIPER® connector is a shielded, high-density, high speed modular interconnect with press fit terminations. The daughtercard assembly is optimized for differential pair architecture on a 1.8mm x 1.35mm grid. The daughtercard is waferized, and provides single-ended and power wafer options integrated onto a stainless steel stiffener with stainless steel frame and keying elements. The backplane has signal contacts that incorporate highly reliable 4-point-of-contact beam design, and ground contacts which are robust compliant pin & contact fork design.

Key features

MECHANICAL CHARACTERISTICS

Normal force per contact (g)	85
Mating force per contact (g)	35 < F < 45
Unmating force per contact (g)	25 < F < 30
Durability cycles	500
Random vibrations (90 minutes per X, Y and Z axis)	0.6 g ² / Hz
Shocks 11 ms half sine	50 Grms in Y axis 80 Grms in Y and Z axis

ENVIRONMENTAL CHARACTERISTICS

Thermal shocks (°C)	-55 / +125
Temperature life (+125°C, in hours)	1 000

ELECTRICAL CHARACTERISTICS

Data rate (Gbps)	10
Differential impedance (Ω)	100
Differential insertion & return loss	- 5 dB up to 5 GHz (10 Gbps)
Far end & near end crosstalk	- 35 dB & -33 dB up to 8 GHz
Current rating per contacts (A)	1
Current rating per power wafer (A)	12 at 30°C
Insulation resistance (GΩ)	1 _{MIN}
Contact resistance (mΩ)	1 _{MAX}
Dielectric Withstanding Voltage (Vrms)	500

- Fully footprint-compatible with VITA 46 and VITA 48 standards
- Hi-speed: designed for 10+ Gb/s data rate performance
- 100 ohm impedance for differential pair configuration
- ESD protection
- ± 0.520 mm nominal translation in fully mated condition
- Separable interface offering 70 single-ended signals and 63 differential signals

The VIPER series serves various markets, including:

Military Avionics
& Airframe

Commercial Avionics
& Airframe

C4ISR

Ground vehicles

AMPHENOL TERADYNE CONNECTION SYSTEMS >>> HIGH SPEED INTERCONNECTS

BACKPLANE INTERCONNECTS

XCede® 20+ Gbps		- Meets the IEEE 802.3ap v3.2 10GBASE-KR standard with margin - Up to 82 differential pairs per inch (32 differential pairs per centimeter) - Secondary routing channels significantly lower backplane costs 85 and 100 ohm components are readily available in all configurations without the hassle of retooling and requalification
XCede® LC 10 Gbps		- Mates with standard XCede backplane module - Daughtercard wafer designed without resonance damping polymer to optimize cost - Fully compatible with the XCede family of components, including power and guidance - Available in 85 and 100 ohm impedance
eHSD® 10 Gbps		- Meets the IEEE 802.3ap v3.2 10GBASE-KR standard - Fully backwards compatible with VHDM-HSD, delivering up to 10 dB lower crosstalk - Scale existing systems to next generation speeds 25 - 38 real differential pairs per linear inch (10 - 15 real differential pairs per centimeter)
Ventura® 6.25 - 12 Gbps		- High-density, high-performance single-ended connector 12 Gbps differential, 6.25 Gbps single-ended 102 - 178 real signals per inch (40 - 70 signals per centimeter) - Surface mount attach
GbX® 5.0 Gbps		27.5 - 69 differential pairs per inch (11 - 27 differential pairs per centimeter) - Ideal for 4 x 3.125 XAUI links - Full range of proven components (e.g. power, guidance, polarizing) - Robust mechanical design
GbX® U-Series 10+ Gbps		- Enhanced footprint for improved impedance and crosstalk performance - Backplane modules are compatible with all generations of GbX daughtercards - Up to 10 dB crosstalk improvement on actual backplanes
GbX® E-Series 6.25 Gbps		- Enhanced electrical performance - Crosstalk as low as 2% - Backplane module shares the same footprint as standard GbX
GbX® L-Series < 1 Gbps		1.85mm x 1.85mm open pin field version of GbX - Customize signal integrity performance by varying ground-to-signal ratio - Ideal for TTL sense and control and other low-speed data lines
AirMax VS® 2.5 - 6.25 Gbps AirMax VS is a registered trademark of FCI		- Shieldless connector system - Cost-effective interconnect for multi-gigabit applications - Up to 63 differential pairs/inch 3, 4, and 5-Pair standard and reverse gender available
Aptera™ 3.125 - 6.25 Gbps		- Low-profile, high-reliability 2-piece edge-card connector 6.25 Gbps performance differential; 3.125 Gbps single-ended - Low profile construction reduces minimum slot pitch between daughtercards to 10mm (.39") - Right angle and stacker versions available
VHDM-HSD™ 5 Gbps		- Optimized for high-speed differential backplane applications 25 - 38 differential pairs per inch (10 - 15 differential pairs per centimeter) - Modular design enables mix of single-ended and differential signals within the same connector
VHDM® 3.125 Gbps		- Optimized for single-ended, high-density applications 76 - 101 real signals per inch (30 - 40 real signals per centimeter) - Less than 5% crosstalk - Stripline shielding allows 100% of the pins to be used for signals
VHDM® H-Series 6.25 Gbps		- Superior signal integrity - Backwards compatible with the full VHDM product family - design into same slot for fast, easy system upgrades 0.018" (0,045mm) PCB hole for improved performance
VHDM® L-Series < 1 Gbps		- Open pin-field version of VHDM - Fully compatible with the full VHDM product family to optimize cost and performance by mixing high- and low-speed signals on the same connector - Ideal for TTL sense and control and other low-speed data lines
HDM® HDM® Plus < 1 Gbps		- Economical 2mm modular design 75 real signals per inch (30 contacts per centimeter) - Can operate in applications with rise times as low as 500 pico seconds

AMPHENOL TERADYNE CONNECTION SYSTEMS >>> HIGH SPEED INTERCONNECTS

ORTHOGONAL INTERCONNECTS

Crossbow™ 20+ Gbps		• XCede® technology optimized for orthogonal midplane architectures • Meets the IEEE 802.3ap v3.2 10GBASE-KR standard with margin • Demonstrated 100 Ohms $\pm$ 5% impedance across an entire link • Less than 1.5 picoseconds in-pair skew • Crosstalk < 1.5% at 50 picoseconds • 4 x 4, 6 x 6, 8 x 8 and 8 x 9 configurations available
------------------------------	---	--

CO-PLANAR INTERCONNECTS

XCede® Co-planar 20+ Gbps		• Right angle male enables co-planar board-to-board or board-to-cable high-speed interconnection • Mates with standard right female daughtercards • Available in 85 and 100 ohm impedance
GbX® Right Angle Male (RAM) 5.0 Gbps		• Enables co-planar board-to-board or board-to-cable high-speed interconnection • Currently available in 2-pair configuration (27 differential pairs per linear inch) • Available in two different heights - standard RAM and extended RAM • High-speed differential and L-Series versions available
VHDM® Right Angle Male (RAM) 3.125 Gbps		• Right angle male enables co-planar board-to-board or board-to-cable high-speed interconnection • 76 - 101 real signals per linear inch (30 - 40 real signals per centimeter) • Grow systems horizontally by creating traditional backplane components in a right angle orientation

MEZZANINE INTERCONNECTS

XCede® Stacker 20+ Gbps		• 4-pair size provides density and mechanical robustness to address increasing I/O counts • Modular construction and guidance options allow optimized connector lengths for each application • Heights available from 15mm up to 44mm • Press fit attachment
NeXLev® 12.5 Gbps		• Enhanced BGA attachment process to increase SMT process yields • 125 micron co-planarity • 57 real signals per linear centimeter (145 signals per inch) • 20 stacking heights from 10-33mm
VHDM® Stacker 3.125 Gbps		• Press fit solution for stacking applications • Route single-ended or differentially • 76 - 101 real signals per inch (30 - 40 real signals per centimeter) • Stacking heights from 18mm and up
Aptera™ Stacker 3.125 - 6.25 Gbps		• Mezzanine solution provides the same electrical performance as standard Aptera • Mates with standard backplane modules • Available in 40mm board-to-board stack heights • Uses proven GbX compliant pin technology
HDM® Stacker < 1 Gbps		• Available in 72 pin and 144 pin signal modules in soldertail or press fit configurations • 75 real signals per inch (30 contacts per centimeter) • 30 Amp power module, end stackable • Stacking heights from 15 to 32mm

HIGH-SPEED CABLE ASSEMBLIES INTERCONNECTS

XCede® Cable Connectors & Assemblies 20+ Gbps		• Ideal for front panel and backplane connections • Provides the same industry leading electrical and mechanical performance as the standard right angle connectors • Available in 2-Pair and 4-Pair configurations • Tightly matched impedance control at cable termination • Wafers are available for 85 and 100 ohm impedance • Supports multiple cable designs ranging from 24 to 30 AWG
---	---	---

AMPHENOL PRINTED CIRCUITS >>> PRINTED CIRCUIT BOARDS CAPABILITIES

RIGID PRINTED CIRCUIT BOARDS

Amphenol Printed Circuits' (APC) capabilities are among the world's broadest and most advanced, delivering consistent quality and reliability for demanding high-bandwidth systems and mission critical applications for more than 25 years. Proven engineering and manufacturing expertise eliminates printed circuit board design obstacles.

APC's North America printed circuit board operation provides tightly controlled processes for prototype through production printed circuit board volumes. The 214,000 square foot New Hampshire facility features state-of-the-art PCB manufacturing equipment and optimized material handling to ensure the highest quality and consistency.

AMPHENOL PRINTED CIRCUITS >>> PRINTED CIRCUIT BOARDS CAPABILITIES

RIGID PRINTED CIRCUIT BOARDS

APC is one of the industry's leading manufacturers of flexible and rigid-flex circuit interconnects. For more than 30 years, APC has been providing quick turn prototypes from initial concept through full production with cutting-edge technologies including interconnects with blind and buried vias, microvias, and bookbinder.

Our assembly centers of excellence, located in Nashua, New Hampshire and Nogales, Mexico are fully ITAR qualified, providing competitive value-added services including SMT, wave and manual through-hole assembly.

APC works closely with our customers to understand their true system requirements. This allows us to deliver the most cost-effective interconnect solutions with up-front engineering and consistent manufacturing techniques. From functional testing and turn-key assembly, APC's commitment to our customers success is what sets us apart in the industry.
