Use/Application/Properties

- | | |
|-------------|---|
| Application | <ul style="list-style-type: none">• Machine and device construction, transport and conveyor technology, heating and climate technology• In areas with high concentrations of people or material assets, where corrosive gases need to be avoided in the event of fire• As a monitoring, measurement and control cable for industrial applications• Especially for harsh environments• For installation in energy chains with constant linear movement• Anywhere where electrical interference fields can influence the signal transmission |
| Properties | <ul style="list-style-type: none">• Reduced friction due to very smooth conductor insulation (HGI) for high mechanical loads• High protection against electromagnetic interferences (EMI)• Braided shield optimised for continuous flexing use• Low capacitance, very good electrical properties• Flame-retardant, self-extinguishing• Halogen-free, no corrosive gases• Very good alternating bending strength• Low adhesion, abrasion-resistant, nick-resistant, tear-resistant• Hydrolysis-resistant, microbe-resistant, and rot-resistant• Weathering, ozone and UV resistant (normal lighting conditions)• Industrial and salt water resistant• Excellent coolant and lubricant resistance• Largely resistant to oils, greases, alcohol-free benzines and kerosene• Silicone free |
