

HDMI CABLE

C-HD20MM20FBK

20ft HDMI 2.0 Black Cable - 4K 60Hz

DESCRIPTION

This is a 20ft black HDMI 2.0 male to male cable. HDMI 2.0 is the universal audio/video standard for monitors, TVs, projectors, and streaming devices, carrying high-definition video and audio over a single connection. With up to 18 Gbps of bandwidth, it supports 4K UHD (3840x2160) at a smooth 60Hz along with the full set of HDMI features. It is ideal for connecting a laptop, workstation, mini-PC, gaming console, or media streamer to a 4K display, TV, or conference-room projector. The single-cable design keeps audio and video together for clean, simple installation, and the cable is backward compatible with earlier HDMI equipment. A flexible PVC jacket makes it easy to route behind a desk, on a podium, or through a rack while delivering reliable 4K 60Hz signal integrity.

FEATURES

- Connects two HDMI devices with a single male-to-male cable
- Supports Ultra HD 4K resolution at 60Hz (3840x2160)
- Built to the HDMI 2.0 standard with up to 18 Gbps of bandwidth
- Carries multichannel digital audio and video over a single cable
- HDCP compliant for playback of protected content
- Backward compatible with 1080p HDMI displays

APPLICATIONS

- Connect a 4K source to a TV, monitor, or projector
- Connect a Blu-ray player, console, or streaming box to a 4K display
- Connect a laptop or desktop to a large-format HDMI display
- Drive 4K digital signage from an HDMI media player
