

HDMI CABLE

C-HD21MM10FBK

10ft HDMI 2.1 Black Cable - 8K 60Hz

DESCRIPTION

This is a 10ft black HDMI 2.1 male to male cable. HDMI 2.1 is the high-bandwidth audio/video standard for the latest displays, TVs, and gaming setups, carrying video and audio over a single connection. With up to 48 Gbps of bandwidth, it supports 8K UHD (7680x4320) at 60Hz as well as 4K at high refresh rates, along with advanced HDMI features. It is ideal for driving an 8K display, a high-refresh gaming monitor, or a 4K high-frame-rate TV from a modern gaming console, graphics card, or media device. The single-cable design carries audio and video together for clean installation and remains backward compatible with earlier HDMI equipment. A flexible PVC jacket makes it easy to route at the desk or in an entertainment setup while delivering dependable high-bandwidth signal integrity.

FEATURES

- Connects two HDMI devices with a single male-to-male cable
- Supports Ultra HD 8K resolution at 60Hz (7680x4320)
- Built to the HDMI 2.1 standard with up to 48 Gbps of bandwidth
- Supports HDR, eARC, and Variable Refresh Rate (VRR) for tear-free gaming
- HDCP compliant for playback of protected content
- Backward compatible with 4K and 1080p HDMI displays

APPLICATIONS

- Connect an 8K source to a TV, monitor, or projector
- Drive 4K displays at high refresh rates for console and PC gaming
- Connect a high-performance GPU to an HDMI 2.1 gaming monitor
- Connect a media workstation to a large-format 8K display
