

PATCH PANELS

C-HDM-1RUEN

HDM Enclosed Series 1RU Rackmount Panel Modular Fiber Chassis Supporting up to Four HDM Cassettes or Adapter Plates

DESCRIPTION

This HDM enclosed series 1RU rackmount panel delivers a robust, high-density fiber management solution for environments that require enhanced protection, organization, and long-term reliability. The panel supports up to four HDM cassettes or adapter plates, enabling multiple connector types and fiber architectures within a single 1RU footprint. When fully populated, the HDM enclosed series supports up to 192 LC ports in 1RU, delivering industry-leading density without compromising cable protection or structural integrity. Designed for environments where fiber security, cleanliness, and durability are critical, the HDM enclosed series combines modular flexibility with a fully enclosed form factor to support evolving network demands.

FEATURES

- High Density, up to 192 LC ports in 1 RU
- Modular Patch Panel and Shuffle system
- Ability to utilize multiple connector types
- Enclosed design for maximum support and protection
- Removable panels for easy access

APPLICATIONS

- Fiber breakout and patching
- Various connector types
- High density applications

Patch Panels Specifications

Rack Mountable	Yes - 19" Frames
Rack Height	1U
Cassette/Adapter Plate Capacity	4
Cassette/Adapter Plate Form Factor	HDM
Material	Steel
Material Finish	Black Powder Coat
Product Dimensions (inches)	1.7 in. x 19 in. x 20.5 in.
UNSPSC Code	43222821
Country Of Origin	China
RoHS Compliant	Yes
