

PATCH PANELS

C-HDM-1RULT

HDM Lite Series 1RU Rackmount Panel Modular Fiber Chassis Supporting up to Four HDM Cassettes or Adapter Plates

DESCRIPTION

This HDM lite series 1RU rackmount panel provides a streamlined, high-density fiber management solution for data center and service provider environments that require efficient access with reduced chassis weight. The panel supports up to four HDM cassettes or adapter plates, allowing multiple connector types and fiber configurations within a single 1RU footprint. When fully populated, the HDM lite series supports up to 192 LC ports in 1RU, delivering high port density while maintaining ease of use. Optimized for environments where weight, accessibility, and simplicity are priorities, the HDM lite series is an ideal choice for standard rack deployments requiring modular scalability without sliding mechanisms.

FEATURES

- High Density, up to 192 LC ports in 1 RU
- Modular Patch Panel and Shuffle system
- Ability to utilize multiple connector types
- Lite design enables access from top of rack with built in support below

APPLICATIONS

- Fiber breakout and patching
- Various connector types
- High density applications

Patch Panels Specifications

Rack Mountable	Yes - 19" Frames
Rack Height	1U
Cassette/Adapter Plate Capacity	4
Cassette/Adapter Plate Form Factor	HDM
Material	Steel
Material Finish	Black Powder Coat
Product Dimensions (inches)	1.7 in. x 19 in. x 15.2 in.
UNSPSC Code	43222821
Country Of Origin	China
RoHS Compliant	Yes
