

### **OPT-I-GC+-C**

Radisys® OPT-I-GC+ GPON Compatible OLT SFP C+ Transceiver (1490nmTx/1310nmRx, 2.5Gbps/1.25Gbps, 32dBm, SC, -40 to 85C)

#### **Features:**

- INF-8074 and SFF-8472 Compliance
- Simplex SC Connector
- Single-mode Fiber
- Industrial Temperature -40 to 85 Celsius
- Hot Pluggable
- Metal with Lower EMI
- Excellent ESD Protection
- RoHS Compliant and Lead Free

#### **Applications:**

- x

#### **Product Description**

This Radisys® OPT-I-GC+ compatible SFP transceiver provides 2.4Gbps/1.2Gbps-C+ throughput up to 20km over single-mode fiber (SMF) using a wavelength of 1490nmTx/1310nmRx via a SC connector. It is guaranteed to be 100% compatible with the equivalent Radisys® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

ProLabs' transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S.-made or designated country end products.")

### Absolute Maximum Ratings

| Parameter                  | Symbol           | Min. | Typ.      | Max.              | Unit | Notes |
|----------------------------|------------------|------|-----------|-------------------|------|-------|
| Maximum Supply Voltage     | V <sub>cc</sub>  | -0.5 |           | 4.0               | V    | 1     |
| Storage Temperature        | T <sub>sto</sub> | -40  |           | 85                | °C   | 2     |
| Operating Case Temperature | T <sub>op</sub>  | -40  |           | 85                | °C   |       |
| Data Rate                  | DR               |      | 2488/1244 |                   | Mb/s | 3     |
| Bit Error Rate             | BER              |      |           | 10 <sup>-10</sup> |      |       |

### Notes:

1. For electrical power interface
2. Ambient temperature
3. Downstream/Upstream

### Electrical Characteristics (V<sub>cc</sub>=3.14V to 3.46V, T<sub>c</sub>=- 40°C to 85°C)

| Parameter                      | Symbol               | Min. | Typ. | Max.            | Unit | Notes |

## Pin Descriptions

| Pin | Symbol       | Name/Descriptions                                          | Ref. |
|-----|--------------|------------------------------------------------------------|------|
| 1   | VEET         | Transmitter ground (common with receiver ground)           | 1    |
| 2   | TFAULT       | Transmitter Fault.                                         |      |
| 3   | TDIS         | Transmitter Disable. Laser output disabled on high or open | 2    |
| 4   | MOD_DEF (2)  | Module Definition 2. Data line for serial ID               | 3    |
| 5   | MOD_DEF (1)  | Module Definition 1. Clock line for serial ID              | 3    |
| 6   | MOD_DEF (0)  | Module Definition 0. Grounded within the module            | 3    |
| 7   | RESET        | Receiver Reset                                             | 4    |
| 8   | BPD          | Burst Packet Detect                                        | 5    |
| 9   | RSSI Trigger | RSSI Trigger Signal From Host                              | 6    |
| 10  | VEER         | Receiver ground (common with transmitter ground)           | 1    |
| 11  | VEER         | Receiver ground (common with transmitter ground)           | 1    |
| 12  | RD-          | Receiver Inverted DATA out. AC coupled                     |      |
| 13  | RD+          | Receiver Non-inverted DATA out. AC coupled                 |      |
| 14  | VEER         | Receiver ground (common with transmitter ground)           | 1    |
| 15  | VCCR         | Receiver power supply                                      |      |
| 16  | VCCT         | Transmitter power supply                                   |      |
| 17  | VEET         | Transmitter ground (common with receiver ground)           | 1    |
| 18  | TD+          | Transmitter Non-Inverted DATA in. AC coupled               |      |
| 19  | TD-          | Transmitter Inverted DATA in. AC coupled                   |      |
| 20  | VEET         | Transmitter ground (common with receiver ground)           | 1    |

## Notes:

1. Circuit ground is isolated from chassis ground
2. Disabled:  $T_{DIS} > 2V$  or open, Enabled:  $T_{DIS} < 0.8V$
3. Should Be pulled up with 4.7k – 10k ohm on host board to a voltage between 2V and 3.6V
4. Reset is a LVTTTL input which is used to clear receiver status before receiving the next burst packet
5. BPD is a LVTTTL output. High Level indicates that burst packet is detected by the receiver
6. RSSI Trigger is a LVTTTL input from host for starting ADC of digital RSSI circuit to sample the analog RSSI signal

### Digital Diagnostic Functions

This transceiver supports the 2-wire serial communication protocol as defined in the SFP MSA. Digital diagnostic information is accessible over the 2-wire interface at the address 0xA2. Digital diagnostics for this module are internally calibrated by default. A micro controller unit inside the transceiver gathers the monitoring information and reports the status of transceiver.

**Transceiver Temperature**, internally measured, represented as a 16 bit signed twos complement value in increments of 1/256 degrees Celsius, Temperature accuracy is better than  $\pm 3$  degrees Celsius over specified operating temperature and voltage.

**Transceiver Supply Power**, internally measured, represented as a 16 bit unsigned integer with the voltage defined as the full 16 bit value (0 – 65535) with LSB equal to 100  $\mu$ Volt, yielding a total range of 0 to +6.55 Volts.

**Transceiver TX bias current**, internally measured, represented as a 16 bit unsigned integer with the current defined as the full 16 bit value (0 – 65535) with LSB equal to 2  $\mu$ A, yielding a total range of 0 to 131mA. Accuracy is better than  $\pm 10\%$  over specified operating temperature and voltage.

**Transceiver TX output power**, internally measured, represented as a 16 bit unsigned integer with the power defined as the full 16 bit value (0 – 65535) with LSB equal to 0.1  $\mu$ W. Data is assumed to be based on measurement of laser monitor photodiode current. Accuracy is better than  $\pm 3$ dB over specified temperature and voltage. Data is not valid when the transmitter is disabled.

**Transceiver RX received optical power**, internally measured, represented as a 16 bit unsigned integer with the power defined as the full 16 bit 35 value (0 – 65535) with LSB equal to 0.1  $\mu$ W. Accuracy is better than  $\pm 3$ dB over specified temperature and voltage.

## About ProLabs

Our extensive experience comes as standard. For over 20 years ProLabs has delivered optical connectivity solutions that give our customers freedom and choice through our ability to provide seamless interoperability. At the heart of our company is the ability to provide state-of-the-art optical transport and connectivity solutions that are compatible with more than 100 optical switching and transport platforms.

## A Complete Portfolio of Network Solutions

ProLabs is focused on innovations in optical transport and connectivity. The combination of our knowledge of optics and networking equipment enables ProLabs to be your single source for optical transport and connectivity solutions from 100Mb to 1.6T while providing innovative solutions that increase network efficiency. We provide the optical connectivity expertise that is compatible with and enhances your switching and transport equipment.

## The Trusted Partner

Customer service is our number one value. ProLabs has invested in people, labs and manufacturing capacity to ensure compatible products, and immediate answers to your questions. With Engineering and Manufacturing offices in the U.K. and U.S. augmented by field offices throughout the U.S., U.K. and Asia, ProLabs is able to be our customers best advocate 24 hours a day.
