

SITOP RED1200/24/48VDC/2X40A

SITOP RED1200 redundancy module input/output: DC 24/48V/80 A Suitable for decoupling two SITOP power supplies with maximal per 40 A output current

| input   |   |
|---|---|
| type of the power supply network  | DC voltage  |
| supply voltage at DC  | 12 ... 48 V   |
| input voltage at DC   | 10 ... 58 V   |
| output  |   |
| voltage curve at output   | Controlled DC voltage   |
| number of outputs   | 1   |
| output voltage at DC rated value  | 24 V  |
| formula for output voltage  | $V_{in} - \text{approx. } 0.6 \text{ V}$                      |
| output voltage  |   |
| • at output 1 at DC rated value   | 24 V  |
| output voltage adjustable   | No  |
| output current  |   |
| • rated value   | 80 A  |
| bridging of equipment   | No  |
| efficiency  |   |
| efficiency in percent   | 97.5 %  |
| power loss [W]  |   |
| • at rated output voltage for rated value of the output current typical | 46 W  |
| • during no-load operation maximum                                      | 0.1 W   |
| safety  |   |
| galvanic isolation between input and output                             | No  |
| operating resource protection class                                     | Class III   |
| protection class IP   | IP20  |
| EMC   |   |
| standard  |   |
| • for emitted interference  | EN 61000-6-3  |
| • for interference immunity   | EN 61000-6-2  |
| standards, specifications, approvals                                    |   |
| certificate of suitability  |   |
| • CE marking  | Yes   |
| • UL approval   | Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 |
| • CSA approval  | Yes; CSA C22.2 No. 62368-1                                    |
| • NEC Class 2   | No  |
| MTBF at 40 °C   | 4 900 000 h   |
| standards, specifications, approvals hazardous environments             |   |
| certificate of suitability  |   |
| • IECEx   | No  |
| • ATEX  | No  |

| <b>additional information</b>  |   |
| other information  | Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)   |
| <b>security information</b>  |   |
| security information   | Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit |

www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
