

KEY-PLUG W700 Security, Removable data storage medium for enabling of security features for SCALANCE W700 access points, permits simple device replacement in event of fault and the recording of configuration data;

product type designation	
product type designation	KEY-PLUG W700 Security
Technical Product Detail Page	<a href="https://i.siemens.com/1P6GK5907-0PA00">https://i.siemens.com/1P6GK5907-0PA00</a>
suitability for use	activation of inter-AP blocking
suitability for operation	SCALANCE W780/W770
ambient conditions	
ambient temperature	
• during operation	-40 ... +75 °C
design, dimensions and weights	
width	24.3 mm
height	17 mm
depth	8.1 mm
standards, specifications, approvals / Environmental Product Declaration	
Environmental Product Declaration	Yes
global warming potential [CO2 eq]	
• total	1264 kg
• during manufacturing	0.92 kg
• during operation	0.34 kg
• after end of life	0.0042 kg

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit <a href="http://www.siemens.com/cybersecurity-industry">www.siemens.com/cybersecurity-industry</a> . Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available

and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under [https://www.siemens.com/cert. \(V4.7\)](https://www.siemens.com/cert. (V4.7))
