

product type designation

Mounting kit for SCALANCE W1788, wall mounting

Mounting kit for SCALANCE W1780 Wall mounting can only be used in connection with SCALANCE W1788/W1788EEC/ W1748 Rugged mounting kit for fastening of SCALANCE W1780 on wall or ceiling; scope of delivery: 1 mounting plate Fixing and retaining screws.

product brand name

SCALANCE

Technical Product Detail Page

<https://l.siemens.com/1P6GK5798-8MW00-0AA0>

mechanical data

material

Stainless steel

color

metallic

design, dimensions and weights

design

1 mounting plate with mounting material

width

188 mm

height

155 mm

depth

17.6 mm

net weight

230 g

design of the screw head / torx

Yes; 4 units: M3x9 (fixing screw), 2 units: M4x16 (locking screws)

standards, specifications, approvals

certificate of suitability

- RoHS conformity

Yes

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates,
