#### Description

L-com's LCCA31066-M3 is a N male to N male low PIM cable using TFT-402-LF coax using Times Microwave components 3 meter and ships same-day. The TFT-5G-402 coax of this N cable uses the PTFE dielectric with a VoP of 76%. These flexible RF cable assemblies are ideal for applications where flexure is required. Our L-com N to N cable assembly has a male to male gender configuration with flexible TFT-5G-402 series coax and operates to 5.8 GHz. The double shield of this N cable is layered by over providing shielding effectiveness greater than 80dB. With passive intermodulation levels better than -160 dBc, our cable assembly design is ideal where low PIM is desired. Times Microwave cable is used in each assembly and TMS components are used to form connections with the super flexible low PIM cable. These cable assemblies are expertly built to satisfy your specific need with high quality Times Microwave Systems manufactured parts.

Custom versions of this N male to N male cable, along with the rest of L-com's other RF assemblies, can also be built and shipped same day. Other available RF cable assembly value added services from L-com include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly. Contact a sales representative for testing or custom RF cable quotes.
