Product ID: 6F-USBC-HDMI-4K60-G

Connect USB-C laptops to 4K 60Hz HDMI displays with a single 6ft active adapter cable that delivers stable, high-bandwidth video and audio for professional workspaces.

Avoid costly interruptions in boardrooms, hot desks, and collaboration areas. The gripping HDMI connector resists vibration and strain, helping maintain a secure connection to the display even when cables are frequently connected and disconnected.

Speed up installs with clear markings on the connector that verify the HDMI cables capabilities at a glance. Drive HDR-ready 4K 60Hz video with full 4:4:4 / RGB color and 7.1-channel audio for clear text and visuals. The integrated cable and adapter design reduces signal loss, cuts down on clutter, and removes common failure points.

Roll out instantly with this driverless cable that works on any operating system and all hardware platforms. Deliver uncompressed, high-bandwidth video via the host's native GPU rather than CPU-driven USB video processing, resulting in lower latency, reduced CPU utilization, and more reliable performance, making it ideal for quick installs, conference rooms, and standardized deployments.
