

2-Port Dual-Monitor DisplayPort KVM Switch with Dual View Video Matrix, 4K 60Hz, 4x USB Hub Ports, Hotkey Switching, DP 1.2 Matrix KVM, TAA Compliant

Product ID: P2ADD121D-KVM-SWITCH

The Video Matrix KVM Switch allows you to view one display from each connected computer and switch the keyboard, mouse, and audio device between the selected displays using hotkeys. You can also switch all connected peripherals and both monitors like a standard KVM.

The TAA-Compliant KVM Switch provides BIOS/UEFI control and works with any operating system, including Windows, macOS, and Linux. No software is required, and it is compatible with all hardware platforms such as Intel, AMD, and Apple Silicon.

Switching KVM ports is easy with the front-facing push button, hotkeys, or the included remote selector cable. An audible buzzer provides confirmation, and LEDs offer quick visual port selection status.

The durable design features a steel housing that helps prevent Electro-Magnetic Interference (EMI), enhancing the stability and reliability of the KVM. Its sturdy construction makes it ideal for installation in a variety of environments, and it offers 8kV Air/6kV Contact ESD protection.

Eliminate the need to connect 3.5mm cables from the computers to the KVM by using this KVM switch's built-in USB audio device, which provides 3.5mm audio jacks for both microphone and speakers. This setup simplifies your workspace by integrating audio management directly into the KVM switch.

Developed to improve performance and security, StarTech.com Connectivity Tools is the only software suite on the market that works with a wide range of IT connectivity accessories. The software suite includes:

- Advanced Windows Layout Utility: Setup and save custom windows layouts.
- USB Event Monitoring Utility: Track and log connected USB devices.
