Dual-Monitor Thunderbolt Mini Dock, 4K 60Hz DisplayPort, Driverless Hub for Windows & Mac, Gigabit Ethernet, 1x USB-A (USB 5Gbps), 11in (28cm) Cable

Product ID: TB3DKM2DPL

This certified Thunderbolt 3 docking station is a compact mini dock, delivering essential connections for productivity. The bus-powered dock connects dual 4K DisplayPort displays, Gigabit Ethernet, and one USB-A port and for flexible set up, the attached Thunderbolt cable has an extended length of (11 in./ 28 cm).

Great for editing 4K video or other Ultra HD tasks, this portable Thunderbolt to DisplayPort dock supports 40 Gbps of throughput and 4K resolution at 60Hz on dual DisplayPort monitors, through a single Thunderbolt port. Run resource-demanding applications on two independent displays without draining system resources.

Connect your laptop to:

• 2x 4K DisplayPort (DP) displays (up to 4096 x 2160p @ 60Hz)

At just 2.4" x 4.9" (6.1 cm x 12.4 cm), this dock takes up minimal room on your desk and in your laptop case. The dock's 28 cm (11 inches) attached cable provides extended reach to reduce port/connector strain on MacBooks and laptops on riser stands, or if needed, offers the flexibility to position dock further away from the laptop on your desk.

• 1x USB 5Gbps Type-A port

• 1x Gigabit Ethernet port (with PXE Boot and Wake-on-LAN support)

As many high powered, later generation laptops optimally require more than 100W of power to stay charged, some users prefer to use their laptop's power adapter vs. using their docking stations to keep laptops charged.

This bus-powered TB mini dock is ideally suited for those users, providing full Thunderbolt docking station performance and functionality, while their workstation laptops are separately charged."
