

Insertion Tool
070235-0001

Description: The Sure-Seal Connector series features a compact, rugged design with multiple moisture seals, making it ideal for outdoor applications where contaminants pose a risk. Originally developed to meet Department of Transportation (DOT) safety standards for automotive connectors, Sure-Seal connectors are perfect for demanding environments requiring a cost-effective, easy-to-install solution. These sealed connectors exceed DOT standards in shock, vibration, temperature cycling, salt spray, immersion, petroleum resistance, and exposure to industrial gases, all while maintaining low milli-volt drop and minimal contact resistance.

Series	Sure-Seal
Tool Type	Insertion Tool
AWG Size	14- 18 AWG
Material	Metal
Alternate	SS-T-TOOL
Replacement Tip	317-1153-015
Supports	030-2196-000, 031-1267-000
