ANDERSON POWER™

Your Best Connection™

Anderson Power is an international leader in high-powered, interconnect solutions. Offering innovative, state-of-the-art electrical power connector solutions, combined with a long-standing reputation for reliable and rugged connectors. Trusted around the world across many markets including: Material Handling, Datacom, Construction, Agriculture, Lawn & Garden and Commercial Industries.

- Touch Safe
- Blindmate
- Latching
- Hot Plug

- Power, Signal & Ground
- Environmentally Sealed
- Wire, PCB & Busbar
- Up to 550A

Power Connector Solutions Catalog 2024-2025

Global Presence

Anderson Power™ has a global distribution network in the following countries along with many others: Argentina, Australia, Belgium, Brazil, Canada, Chile, China, Columbia, Denmark, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Mexico, New Zealand, Norway, Peru, Poland, Portugal, Singapore, Slovenia, South Africa, South Korea, Spain, Switzerland, Thailand, Turkey, United Kingdom, India and United States.

Headquartered in Sterling, MA, Anderson Power Product's facility is ISO 9001 certified and uses automated manufacturing to offer uncompromising quality. Connectors are available through an authorized global distributor network or direct from the factory.

Today, as a result of innovative design and development, we have evolved into a valued supplier for a wide variety of markets including Material Handling / Datacom & Telecom / ConAg / Lawn & Garden / Commercial & Industrial / Energy / Battery Charging and more.

We have established a reputation for high quality products, on-time deliveries, and excellent customer service. As a result of modern manufacturing techniques and rigorous quality control measures, this assures our customers receive the quality products they deserve.

As a global company dedicated to best environmental practice, we have taken steps to meet the RoHS directive for virtually all products. We look forward to the challenges posed by the new technologies of the future and will continue our century long tradition of design excellence and superior customer support to meet customers' needs.

Product Selector Guide

How to Use This Catalog

The information in this catalog is provided in layers to allow you to quickly find the information you are looking for.

Selection Guides are featured at the front of the catalog and at the beginning of each product section to enable quick connector selection by electrical attributes and other features.

A Technical Reference is provided to give important information common to all connectors in this catalog. Answers to common questions, definitions of terminology, and technical charts are all included. Overviews at the beginning of each product main section describe the similarities and call out common features of products within that section.

Specifications and Temperature Charts are shown after the main connector components in each sub-product section to provide detailed technical information (SB® 50, SB® 120, etc).

Tooling Charts are provided at the end of each connector family (SB®, SBS® etc) to quickly identify the correct tooling.

	Powerpole® Connector Family	Multipole Connector Family
Amps (UL) Per Pole	Up to 350	Up to 550

Custom Connector Capabilities

We specialize in the design and manufacture of high current connection systems to meet specific customer needs. Our expertise in high amperage connections, multiple types of contact technology, and molded plastic insulators allow us to provide durable, high power connections that fulfill the project requirements of OEM's.

We look forward to working with OEM's on their manufacturing scale projects to provide connector solutions which our current product portfolio may not satisfy. Marketing, Engineering, Quality, Safety Agency, and Manufacturing teams all contribute through the integrated product development process to create and deliver custom connectors that exceed our customers' needs and meet our high standards.

Contact your local customer service representative or regional sales manager to explore how our custom design and manufacturing capabilities can meet your high volume connection needs.

Product Selection Worksheet

Prior to selecting an interconnect solution, we recommend you gather the following information. This will aid you in quickly identifying the best product for your particular need.

Amps

Continuous _____ Max AMPS _____ Volts
Peak _____ Max AMPS _____ Seconds

Anderson™ Tooling

Why Use of Anderson™ Recommended Tooling is so Important

Our connectors are designed to achieve the highest levels of durability, reliability, and performance as shown on the connector data sheets. Crimp tooling is a critical link between the designed performance of a connector and the realization of that performance by our customers.

As part of the connector design and testing process, we recommend a number of crimp solutions that have proven to deliver the intended connector performance in a process that is repeatable. Only these solutions tested by us are listed in the conditions of acceptability from safety agencies such as UL, CSA, and TUV.

Use of tooling solutions not tested by us can affect not only performance but safety agency approvals. Problems attributable to use of non approved tools include:

Electrical and Thermal

- High electrical resistance.
- Failure to realize designed current and voltage carrying capability.
- Overheating.
- Melting of connector housings.

Mechanical

- Contacts not able to fit inside connector housings.
- Contacts not seated properly in connector housings causing shorts, intermittent circuits, abnormally high or low mating and unmating force, & low retention force of the contact in the housing.

1387G1 & G2 Pneumatic Bench Tools

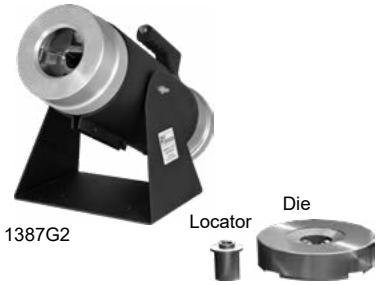
Versatile & heavy duty tools manufactured by Pico Tools, use fixed depth dies and spring bottom locators designed specifically to crimp our contacts. Dies and locators are not interchangeable between the 1387G1 and the 1387G2. These pneumatic full cycle tools operate on clean and dry shop air pressures of 80 – 125 psi (5 – 8.6 BAR). See connector family tooling charts at the end of each section for the specific dies and locators recommended for crimping each contact. Dies and locators are available from Pico Tools for a variety of other terminal types including lugs, insulated terminals, and a variety of turned pin and socket contacts.

1387G1: 12 to 2/0 AWG (4 to 70 mm²)
Pico Tools Model 400-BHD
Compatible with M22520/23
dies and locators

1387G2: 12 AWG to 250 mcm (4 to 120 mm²)
Pico Tools Model: 500-D

1391G1: Foot Pedal Control

1387G1



1387G2

TA0002: Air regulator / filter for pneumatic tools. Keeps air clean and dry for long lasting tool performance. Dial knob adjusts air pressure going to the tool.

TA0002

1391G1

1368 Series Hydraulic Tools

The dieless 4 indent head crimps full cycle until a minimum hydraulic pressure is reached. Good for crimping nearly all our contacts for wire sizes 4 AWG to 4/0, 350 mcm. The dieless system offers a highly flexible crimping system that does not require the purchase of separate dies and locators. Pressure based crimp depth allows these tools to be adapted to a broad range of large wire crimping needs including lugs, ring terminals, and splices.

1368: Hubbell VC7-SP dieless 4 indent tool with attached manual hydraulic pump. Tool includes a custom turret locator for positioning the PP120, PP180, SB® 120, SB® 175, SB® 350 contacts. The innovative design provides two separate crimp positions for the PP180, SB® 175 and SB® 350 contacts. Both the tool and locator ship in black plastic carrying cases.

1368-NL: Manufactured by DMC to our specifications, this 4 indent head with attached manual hydraulic pump offers the same crimping performance as the 1368, but with the cost savings of not having a custom turret locator. Includes black plastic carrying case.

1309 Series Hand Tools

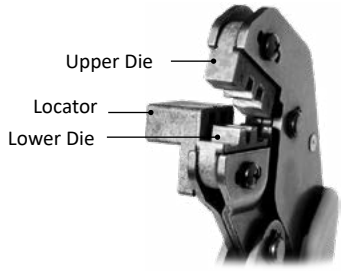
High quality hand tools are designed for crimping 6 to 20 AWG (13.3 to 0.52 mm²) wires for Powerpole®, SB®, SBS®, and SBE® / SBO® connectors. The extra long bright yellow handles provide significant crimping force while minimizing operator fatigue. Full cycle ratchet mechanism makes sure every crimp is fully completed. All tools except 1309G4 include a plastic locator piece that ensures proper positioning of the contacts for crimping.

1309G2: For crimping PP15/45 loose piece strip contacts and individual contacts.
16 to 20 AWG (1.3 to 0.5 mm²)
12 to 20 AWG (3.3 to 1.3 mm²)

1309G3: For crimping PP15/45 loose piece strip contacts from 10 to 16 AWG (5.3 to 1.3 mm²)

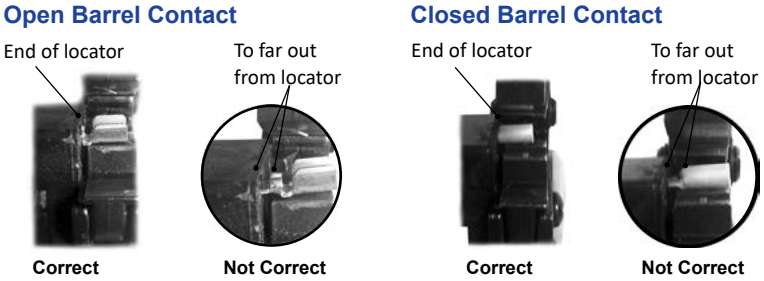
1309G14: For crimping PP15/45 loose piece strip contacts from 10 to 14 AWG (6.0 to 2.1 mm²) including high strand count superflex wires.

Die & Locator Replacement	
Tool	**Kit**
1309G2	1310G2
1309G3	1310G3
1309G14	1310G6
1309G8	1310G8
1309G4	1310G4



1309G8: Includes 1 tool frame with the appropriate dies and locators to make the 1309G2, 1309G3, and 1309G14 tools. Dies and locators are color-coded for easy identification and pairing. This combination allows the entire PP15/45 contact range to be crimped with one tool kit.

1309G4: For crimping PP75, SB® 50, SBE® 80, SBO® 60, and SBS® 50 and 75 power contacts. No locator included, follow crimp positioning specifications in assembly instructions.



PM1000G1 Hand Tool

Versatile 4 indent hand tool with built in multi-position turret locator. Adjustable indenter depth features 0.01 mm adjustment increments to define the perfect crimp depth for wire sizes 10 to 26 AWG (6 to 0.14 mm²). Full cycle ratchet mechanism makes sure every crimp is fully completed. Use to crimp PowerMod® contacts used as auxiliaries in SBS® 75X and the 1x4 auxiliary connector as well as a wide range of other turned contacts including those for Power Drawer® and PPMX.

MIL-SPEC Hand & Bench Tools

Manual hand tools and pneumatic bench tools are available in this tool series. The hand and pneumatic tools

both use the same turret locators designed specifically for Anderson Power™ contacts. The interchangeable nature of the turret locators allow easy upgrades from prototyping to production volumes. All tools feature adjustable indenter depths to cover 12 to 26 AWG (3.3 to 0.25 mm²) capability. Full cycle mechanism makes sure every crimp is fully completed. See tooling charts at the end of each connector section for the appropriate turret locator part numbers.

TM0001: Rugged hand tool is qualified to MIL-DTL-22520/1. DMC Model AF8. Accessories shown are purchased separately.

TP0001: Pneumatic full cycle bench tool operates on clean and dry shop air pressures of 80 to 120 psi (5 to 8.3 BAR). This DMC model WA27F is compatible with optional bench mount and foot pedal control to increase operator speed and efficiency.

TA0001: Foot pedal control for TP0001

TA0002: Air regulator / filter for pneumatic tools. Keeps air clean and dry for long lasting tool performance. Dial knob adjusts air pressure going to the tool.

TA0003: Adjustable bench mount for TP0001

TA0002

TM0001

Press & Applicator Tools

Press and Applicator tooling is available for high volume automated or semi-automated crimp termination of our reeled contacts for up to 10 AWG or 6 mm². All applicators have been designed to meet or exceed UL requirements. See connector family tooling charts at the end of each section for the specific press, air feed kit, and applicator recommended for crimping each contact.

Crimping Technical Reference

Crimping, Soldering, and Assembly Best Practices. Instructions for proper assembly are available for each connector and should be followed. These best practices are for reference only.

Stripping Wire Insulation

Problems with cable harness and connector systems often begin with improper or accidental cutting of wire strands when stripping wire insulation. Each strand is important, and all of them must be included in the contact barrel to avoid unnecessary hot spots during later operation. When removing insulation, position a sharp blade at a right angle and apply a steady controlled pressure cutting only the cable insulation and not the copper wire strands. Wires should be stripped to the lengths specified in the specific connector assembly instruction.

Cleaning Copper Wire

Copper oxide, a non-conductive material accumulates on copper wires exposed to oxygen and moisture. Aged and badly tarnished copper wire needs to be thoroughly cleaned to realize the rated performance of the connector and wire. Heavy oxidation can be scraped off with a stiff wire brush that penetrates the entire bundle and cleans every strand. For light surface oxidation a 3M Scotch Bright™ pad is recommended. The wires are ready for insertion into the contact barrel when they are burnished to their original bright copper finish. Contact barrels are lined with silver or tin plating to assure consistently high conductivity which will be reduced if the barrel is crimped around aged or tarnished wire.

Crimping

Our connectors are designed to achieve the highest levels of durability, reliability, and performance as shown on the connector data sheets. Crimp tooling is a critical link between the designed performance of a connector and the realization of that performance by our customers.

As part of the connector design and testing process, we recommend a limited number of crimp solutions that have proven to deliver the intended connector performance in a process that is repeatable. Only these solutions tested by us are listed in the conditions of acceptability from safety agencies such as UL, CSA, and TUV.

Use of tooling solutions not tested by us can affect not only performance but also safety agency approvals. Problems attributable to use of tools not recommended include:

Electrical and Thermal

- High electrical resistance.
- Failure to realize designed current and voltage carrying capability.
- Overheating.
- Melting of connector housings.

Mechanical

- Contacts not able to fit inside connector housings.
- Contacts not seated properly in connector housings causing: shorts, intermittent circuits, abnormally high or low mating and unmating force, & low retention force of the contact in the housing.

Soldering

The alternative to crimping is to solder all cable strands within the contact barrel. When using an open flame, make sure that you are not in an area where explosive gasses are present. The right proportion of solder is essential if this procedure is employed. Use a quality 60/40 solder (60 percent tin, 40 percent lead) in wire form with a rosin flux core. Cable strands should be separately fluxed with rosin paste, and the contact should be held in a vise with the barrel end facing up. Apply heat to the outside of the barrel while the solder flows in beside the wire strands.

Here are some things to avoid when soldering

A. Don't use too much solder, to the point that it flows out of the contact barrel.
B. Don't allow flux or solder on the outside of the contact. This will interfere with contact mounting within the installation or with the contact connection to a mating connector.
C. Don't overheat and cause excessive solder to "wick" up into the cable and stiffen it. This could interfere with contact flexibility when connectors are mated.
D. Don't solder when contact is in the connector housing. Solder away from the housing and then insert the contact into the housing after it has cooled.

NOTE: Underwriters Laboratories (UL) requires the use of a cable clamp for soldered connections to unsupported wires.

Determining if a Good Crimp Has Been Made

1. Assure the correct wire size and type is used for the specific contact being crimped.

2. Follow the assembly instructions for the connector. Special attention should be paid to wire preparation and stripping.

3. Use the correct application tooling we recommend (tool, die, & locator).

4. Make several crimps for testing, and record crimp dimensions in both "x" and "y" planes.

5. Test the electrical resistance across a mated pair of connectors to the standard of the information provided on the data sheet.
   a. The electrical resistance values should be similar to (or less than) what we publish for that connector in our catalogs. Please see the "Avg. Mated Contact Resistance" on the data sheet for the specific connector.

6. Test the pull out strength per the table to the right.
   a. To achieve the electrical performance published in our literature the pull out values at minimum should meet the UL 486A values for the wire size being used. The first column (lower value) pull out is the minimum per UL486A. The second column is what Anderson Power™ tries to achieve when designing our crimp solutions. Any force within this range is acceptable.

7. If crimps are within electrical and mechanical specifications then the crimp dimensions are suitable to be used as a secondary inspection criteria.

Wire Size AWG or MCM	Lbf Contact Retention Force Range	kgf Contact Retention Force Range
22	8 to 12	3.6 to 5.4
20	13 to 16	5.9 to 7.3
18	20 to 30	9.1 to 13.6
16	30 to 40	13.6 to 18.1
14	50 to 60	22.7 to 27.2
12	70 to 85	31.8 to 38.6
10	80 to 125	36.3 to 56.7
8	90 to 180	40.8 to 81.6
6	100 to 200	45.4 to 90.7
4	140 to 280	63.5 to 127
3	160 to 320	72.3 to 145.1
2	180 to 360	81.6 to 163.3
1	200 to 400	90.7 to 181.4
1/0	250 to 500	113.4 to 226.8
2/0	300 to 600	136.1 to 272.2
3/0	350 to 700	158.8 to 317.5
4/0	450 to 775	204.1 to 351.5
250	500 to 800	226.8 to 362.9
300	550 to 800	249.5 to 362.9

Why Crimp Dimensions are not Suitable as Primary Inspection Criteria

Crimp dimensions are not an adequate or reliable means to evaluate if a good crimp has been made. For this reason they should not be relied upon as a primary inspection method.

When you crimp a contact, the material is forced down to the size of the fully closed die. This die closure on most tools is a fixed dimension. When the die is released, the material (contact and wire) will expand back out when they are no longer restrained by the die. The amount that it expands outwards or "bounces back" is dependant on the resistance or force that the material in the contact and wire places against the crimp die. The

resistance of the material to being formed by the crimp will vary with wire type and stranding, hardness of the metal (both contact and wire), as well as the temperature. It is for this reason that the crimp height is a variable and cannot be relied upon solely to determine if a crimp is good or not.

Crimp Dimensions as Secondary Inspection Criteria

Crimp dimensions should only be used as secondary inspection criteria due to the above variables. These variables make it impossible for us to determine what the correct crimp dimension should be without evaluation of the specific instance. Accordingly harness manufacturers are responsible for determining the appropriate crimp dimensions to be used and only as a secondary inspection method. Crimp dimensions are an acceptable means of short interval inspection for determining homogeneity within a batch provided:

1. Electrical resistance and pull out strength are tested on samples from the batch to ensure the crimp dimensions are indicative of a good crimp.

2. The same tooling is used throughout the batch and operated in the same manner, at the same calibration level.

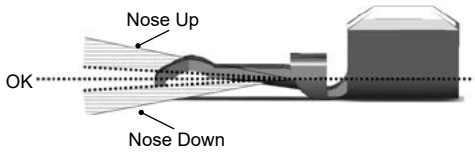
3. The same wire is used throughout the batch. (Wire can vary significantly by factors ranging from class to manufacturer).

4. Assembly instructions are closely followed, especially wire stripping and preparation.

Other Critical Crimp Dimensions

There are other critical crimp dimensions that impact if a crimp is good or not. All contacts are designed to work with a specific crimping solution to minimize the distortion of crimping force on the critical geometries of the contact. If the incorrect crimp solution is used or the correct crimp solution is improperly used, then this will distort the intended geometries of the contact.

The geometry of the contact blade and its relative angle to the crimp barrel must be maintained after the contact is crimped. If these dimensions are not maintained the contact will not latch properly in the housing. This can impact how well the contact is secured in the housing as well as the normal force (measurement of the opposing force that pushes the contacts together) between the mating blades of two mating contacts. The normal force is directly related to the electrical properties of the connector and poor normal force can lead to higher electrical resistance, overheating, and reduced current capability. These geometries can only be assured by using the correct crimp tool, with proper die and locator.



ANDERSON POWER™

Technical Reference

General Application Notes

There are common considerations when using our connectors. Additional considerations may apply based on the particular connector being used, the application, and conditions in which it's being used. This information is intended to provide a basic understanding and is provided for reference only. Connectors should be assembled and used according to the equipment and the manufacturer's instructions, as well as in compliance with local and international electrical codes.

The maximum amperage ratings provided in the specifications are based on use of our recommended assembly tooling and the maximum wire size for the connector being used. Amperage ratings are based on not exceeding the maximum operating temperature of the connector housing, factoring in an ambient temperature of 25°C or 77°F. A wire with an appropriate insulation temperature rating should be selected to meet or exceed the total connector temperature (heat rise + ambient).

As an example: if the maximum operating temperature for a connector operation is 105°C and the ambient temperature is 25°C, the maximum heat rise attributable to the connector is 105°C - 25°C = 80°C. The expected heat rise based on the connector and wire size used can be estimated using the heat rise charts, but should be confirmed by testing in the specific application with the specific wire to be used.

Connector devices are rated or derated by the wiring configuration and the environment. Factors to be considered include: enclosure characteristics, connector housing and wire insulation characteristics, number of wires in an enclosed area such as a raceway or conduit, as well as the ambient temperature.

Underwriter Laboratories Inc. amperage ratings are based on not exceeding the maximum operating temperature of the connector housing. This means connectors can be extremely hot when used at the UL amperage ratings. For this reason UL amperage ratings should only be applied to connectors when they are used inside an enclosure not accessible to untrained persons. Canadian Standards Association ratings are based on not exceeding a 30°C temperature rise above ambient temperatures. For this reason CSA amp ratings are a good point of reference for connectors that are user operated. Anderson Power™ does not recommend exceeding a 30°C temperature rise above ambient temperatures for connections accessible during operation to untrained persons.

How to Read Temperature Charts

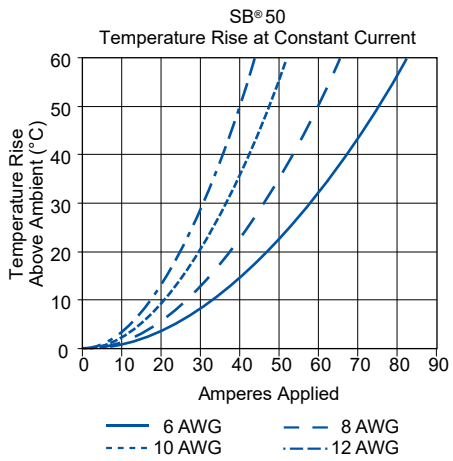
Temperature Rise Charts are Based on a 25° Ambient Temperature

Temperature Rise at Constant Current charts show the associated heat rise as a result of applied current to the connector. An example of the SB® 50 connector Temperature Rise chart is included to follow along with this explanation.

The chart is based on an ambient temperature of 25°C (77°F room temperature). Accordingly if the temperature °C on the Y axis of the chart is at 30°C, the expected total connector temperature would be 55°C.

Separate curves are shown for 6, 8, 10, and 12 AWG wire.
Interpreting the curves, if 50 amps are applied continuously to the connector, the heat rise will be 23°C for 6 AWG, 35°C for 8 AWG, 55°C for 10, and 12 AWG wire is not suitable for this amperage.

Where T = Temperature, heat rise is expressed as a ΔT°C.
T ambient - T (ambient + heat from applied current) = ΔT°C.

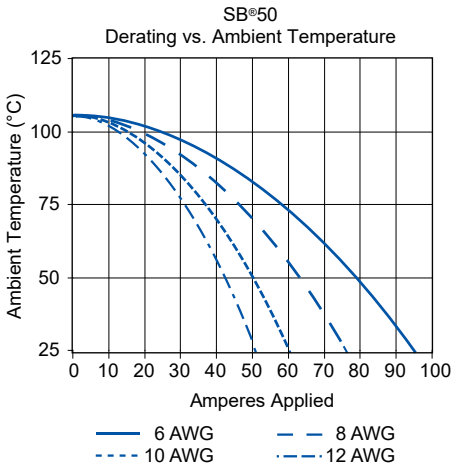


Derating vs. Ambient Temperature Charts

Derating vs. Ambient Temperature charts show the maximum amperage capability of a connector at a given ambient temperature. An example of the SB® 50 connector chart is included to follow along with this explanation.

All data points are based on the maximum operating temperature of the connector, most often 105°C or 221°F. Accordingly if the temperature °C on the Y axis of the chart is at 105°C, there is no amperage capability because the connector housing is already at the maximum operating temperature.

Separate curves are shown for 6, 8, 10, and 12 AWG wire. Interpreting the curves, at a 75°C ambient temperature the maximum amperage capability that can be applied continuously to the connector is: 58A for 6, 46A for 8, 37A for 10, and 31A for 12 AWG.

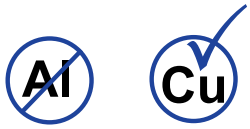


Notes on Temperature Rise Charts

Note that these charts are constructed using calculations based on actual test data. For this reason the chart information may vary slightly from the safety agency ratings. Safety agency ratings and compliance with electrical codes take precedent over these charts. The charts are designed to provide a guideline as to the connectors' capability. Actual results can vary based on the specific wire used, crimp tooling and assembly, as well as the environment the connector is used in.

CSA ratings are based on not exceeding a 30°C temperature rise above ambient or a total temperature of 55°C. This is considered the maximum temperature to safely handle a connector at. UL ratings can be based on the operating temperature limit of the connector. Often for our connectors this is 105°C or an 80°C temperature rise above an ambient temperature of 25°C. To provide a margin of safety, the heat rise charts are limited to a 60°C temperature rise.

Compatible Wires



Our connectors are designed to be crimped or soldered to multi-stranded copper conductor wires only. Alternate conductor materials including aluminum should not be used. Aluminum conductors crimped into our contacts can result in a galvanic reaction occurring between the aluminum wire and the more cathodic metals used in our contacts including copper, tin, silver, and gold. Additionally softer metals like aluminum flow or loosen from crimps much easier than copper.

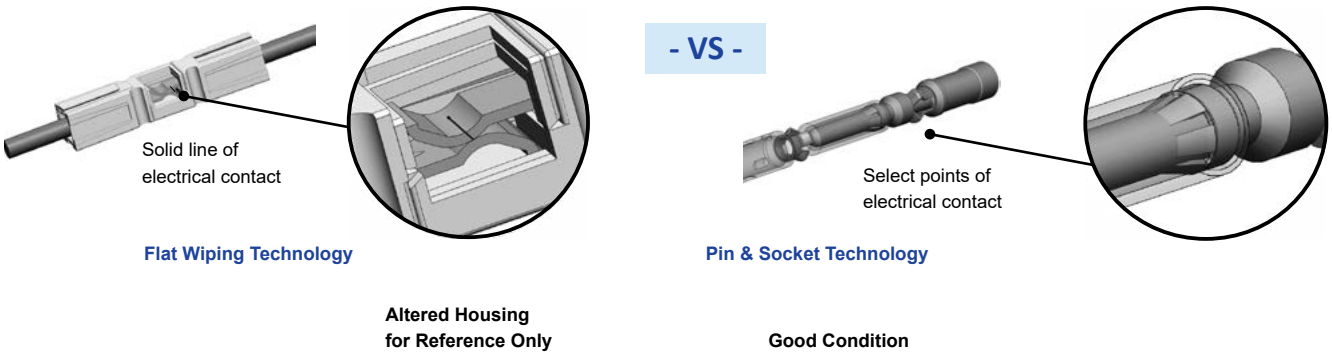
Multi-stranded wire is recommended for all our connectors and is required when crimp terminating wires or when a connector with flat wiping contact technology is used (such as Powerpole® and SB®). Solid wires do not adequately compress and retain in crimp barrels after being crimped. For this reason if solid wire is used, it should be with solder termination only.

Solid wires also do not flex and bend as easily as multi-stranded equivalents and can act as a lever arm and impede or alter the natural state of a flat wiping contact in the housing. This impediment or alteration to the flat wiping contact's natural state can cause intermittency and shorts as well as higher resistance and temperature at a given amperage than is shown in the specifications. Mating and unmating forces may also be impacted.

Different Contact Technologies

Flat Wiping

- Same contacts on the “male” and “female” side reduce inventory costs and increase ease of assembly.
- Low resistance connection has a large conducting surface and a high normal force in comparison to typical pin and socket contacts.
- Sacrificial tip confines damage to non-conducting area when mating or breaking under load.
- Raised surface on the mating side of the contacts secures the connector in the mated condition, limiting the need for latching on outer housings.
- Over wiping design cleans the mating surface when mating and unmating.



Flat Wiping Technology

Altered Housing for Reference Only

Pin & Socket Technology

Good Condition

Pin & Socket

- Different contacts on male and female sides. Female socket contacts are typically more expensive than the simple geometries of the pin contacts.
- Often higher resistance than flat wiping connectors of the same wire size and plating due to the reduced mating surface area and lower normal force. Gold plating often used to compensate and minimize resistance.
- Best for compact connection needs such as signal and low power due to static position in housings and symmetrical shape.
- Socket contacts can catch and hold debris inside the socket body causing mating problems.

Use of Anderson™ Connectors in Applications Exceeding 600V

The approved voltage ratings for our connectors are usually limited by the category under which a safety agency such as UL approves our connector for use. UL typically defers to National Electric Code (NEC) on the voltage limitations for any given device our connector could be used in. For most common applications NEC restricts voltage to a maximum of 600V AC/DC which is what our connector voltage ratings are based on.

To achieve UL 1977 approval for a 600V rating, we test our connectors for dielectric withstanding voltage. The connector is tested at 2 times the rated voltage of 600V plus 1000V or 2200VAC for 1 minute. For applications exceeding 600V, UL / NEC / IEC may require application specific review for creepage and clearance resistance.

Touch Safety & Ingress Protection (IP68)

UL 1977 Section 10.2
Typically required for applications where the connector is external to the end device and operating over 30V or 200A, where wet conditions may be present (600V category).

Testing is performed using a probe that mimics a child's finger. All features of the connector are tested for live parts in the unmated state (no pressure applied). A smaller 3 mm probe is then applied in the mated state to test for live parts. Note that some applications may require the connector to not expose live parts to the 3 mm probe in the mating interface.

IEC 60950
From the standard for Information Technology Equipment Safety, the requirements are harmonized with UL1950. Typically required for commercial and industrial applications where operators may need some degree of protection while accessing or servicing equipment.

Testing is performed using a probe that mimics an adult finger. All features of the connector are tested for live parts in the unmated state with 30 N of force applied to the probe.

IEC 60529
Standard for Degrees of Protection Provided by Enclosures is harmonized with EN 60529.

Protection degree number is assigned to both solids and liquids in that order. For example: a connector with an IP20 rating is protected against fingers, but has no protection against ingress of liquids. We take a conservative approach in rating our connectors against liquid ingress and consider any meaningful water ingress to have a harmful effect.

Protection Degree	Solids (first digit)		Liquids (second digit)	
	Description	Protected Against	Description	Protected Against
0	Not Protected		Not Protected	
1	> 50 mm	Large body part such as back of hand	Vertically dripping water (no harmful effect)	**Duration:** 10 minute **Water:** 1 mm / minute rainfall **Pressure:** N/A
2	> 12.5 mm	Adult fingers or similarly sized objects	Tilted 15 degrees up dripping water (no harmful effect)	**Duration:** 10 minute **Water:** 3 mm / minute rainfall **Pressure:** N/A
3	> 2.5 mm	Typical screw drivers or large wires	Water spray up to 60 degree angle (no harmful effect)	**Duration:** 5 minute **Water:** 0.7 liter / minute **Pressure:** 80 - 100 kN/m²
4	> 1 mm	Small pointy tools and small wires	Water splash from any direction (no harmful effect)	**Duration:** 5 minute **Water:** 10 liter / minute **Pressure:** 80 - 100 kN/m²
5	Dust Protected	Complete physical protection, no functional interference from dust	Water jet from any direction (no harmful effect)	**Duration:** 3+ minute **Water:** 12.5 liter / minute **Pressure:** 30 kN/m² @ 3 m distance
6	Dust Sealed	Complete physical protection and sealed from dust ingress	Strong water jet from any direction (no harmful effect)	**Duration:** 3+ minute **Water:** 100 liter / minute **Pressure:** 100 kN/m² @ 3 m distance
7	N/A		No ingress of water in harmful quantity when immersed up to 1 m depth	**Duration:** 30 minute **Water:** Immersion **Pressure:** 1 m depth
8			No ingress of water in harmful quantity when subject to tests in excess of condition 7	**Duration:** Mfg. specified **Water:** Immersion **Pressure:** 1 + m depth, Mfg. specified

Preventative Maintenance

Damaged connectors, contacts and cables may present hazards, resulting in inefficient battery and charger operation. To avoid these problems, conduct the following maintenance checks at least once annually. If you see any of the following problems, take corrective action immediately.

1. Dirty Connectors

When engaged and disengaged, the contact surfaces of Anderson™ flat wiping connectors "over wipe," thus providing self cleaning action. To ensure the continued benefit of this feature, clean the contact surfaces and lubricate the connectors. Use a "white" lithium grease (not silicone grease), which may be obtained from hardware stores and automotive parts suppliers.

2. Melting Connectors

Connector housings overheat and melt for many reasons. To prevent this:

A. Examine the crimp between cable and contact. Ensure the crimp tooling recommended by Anderson™ has been used. Improper crimping, corrosion, and broken wires result in unnecessary resistance causing the contact to heat up.
B. Check contact surfaces for signs of "pitting" caused by dirt or disengaging connectors under load. One badly pitted contact, particularly in a connector attached to a battery charger, can lead to pitting on surfaces of other contacts. If not corrected, this can result in an epidemic of bad connectors throughout a fleet of electric vehicles and in chargers and batteries.
C. Check to see if batteries are being disconnected while the charger is still on. This causes the contacts to arc at the tips, resulting in progressive pitting and silver removal from tip to crown. If this practice is occurring, it should be discontinued to avoid major repairs in the future.

3. Other Conditions

If any of the following conditions exist, the connector housing, contact and / or cable should be replaced immediately.

A. Housing - Cracks, missing pieces, evidence of excessive heat, discoloration. You may consider replacing the existing housing with a Chemical Resistant equivalent for improved durability against UV rays and common solvents and hydrocarbons.
B. Contacts - Pitting, burns, corrosion, excessive wear and cracked crimp barrels, as shown in image "B".
C. Cable - Exposed copper near housing, cracked cable, peeling or frayed insulation.
D. Handles - Loose attachment and signs of damage as missing or loose hardware and cracked or broken plastic (Handles should be used for connectors that are hard to reach or move).
E. Cable Clamps - Loose attachments, signs of abraded cable jacket, missing or loose hardware. (Cable clamps should be used to relieve strain on unmounted cable).

Frequently Asked Questions

Can I cross mate low and high mating force contacts?
Yes, however this would not be a connection solution we have tested for safety agency approval. Additionally the contacts may wear at an accelerated rate causing the mating cycle rating to be reduced. The mating and unmating force expected would be somewhere in between the high and low mating force specification.

Will the crimp tool I have for standard color-coded lugs, Mil Spec contacts, or another connector manufacturer, work for crimping Anderson™ contacts?
No. Our contacts generally do not conform to standard crimp barrel dimensions used for lugs, Mil Spec contacts, or other connector manufacturers. In some instances Mil Spec tools are approved for crimping contacts with the dies and locators recommended by us. See tooling charts for specific instances, or contact customer service for more information. The tooling recommended by us must be used to ensure the performance designed by us is achieved. Alternate tooling will void our warranties and can affect safety agency approvals.

Can metric sized wires be used with Anderson™ contacts?
Yes. The majority of our crimp tooling recommendations are based on testing and verification we have performed with AWG sized cables. Metric cables of the same or slightly smaller circular mils equivalent to the AWG wire recommended can typically be successfully terminated in our contacts. There is a wire conversion chart under Engineering Reference Section in the catalog that can be used as a reference when converting AWG to mm^2 sizes. The 1368 series crimp tooling has a range taking capability that produces a reliable crimp with metric equivalents of AWG cables. Please contact customer service for metric tooling recommendations for other Anderson™ crimp tools.

Are Anderson™ connectors suitable for use in applications where the voltage exceeds 600V AC/DC?
Possibly. See “Use of Anderson™ Connectors in Applications Exceeding 600V”, or contact Customer Service with further questions.

How do Powerpole® and Multipole connectors stay securely mated without latches?
The proven flat wiping technology used in these connectors features a detent or bump in the contact surface along with powerful stainless steel springs that hold the connectors in the mated position. High mating force contacts have a detent that is raised higher than low mating force contacts. The higher the detent, the more force is required to mate and unmate the contacts. In many applications the detent and spring force is enough to securely hold the connectors in the mated position without the need for latches. Latching shells, clips, or other external devices can be used to secure flat wiping connectors in applications where shock, vibration, or cable strain may overcome the inherent force holding the connectors together.

How does Anderson’s genderless connector design work to make a mated pair?
To make a mated pair of Powerpole® or Multipole connectors simply assemble the connectors closely following the assembly instructions. After each connector half is fully assembled take one half and flip it over. The two halves will mate together. Multi-row Powerpole® assemblies will need to be stacked in mirror images of each other to properly mate the correct circuits. This information is detailed at the beginning of the Powerpole® section.

continued on next page

Genderless Powerpole® and Multipole housings do not have a male(pin) and female(socket) side. For wire-to-wire applications the exact same housings and contacts are used on both sides of the mated pair. If your application calls for wire-to-PCB or wire-to-busbar connections then different contacts and possibly housings will be required on each half (similar to male and female connectors).

May I mate same housing colors but have different size contacts in the housings?
Yes. You may mate the housings together if they have different wire or contact sizes; however, the amperage will derate down to the lowest wire gauge.

Where do I locate information on the crimp tool that is qualified with the housing and contact being used?
Information can be found by going to the data sheet for the product you are using. To find these select the product pages tab at the top of the website; select product category; select learn more; select technical information and choose appropriate data sheet then scroll to last page to find the tooling chart. The chart will show details on which crimp tools are approved for each of the contacts and housings.

What rules should I follow for crimping if I am not using Anderson's recommended tooling?
If you choose not to use approved and tested Anderson Power Products® tooling, then it is recommended you refer and follow the crimp specification guidelines for the product you are using. Crimp specifications can be found under the technical area on the product pages for each product category. The use of tooling not recommended by Anderson Power™ can affect performance and may void the Anderson Power™ product warranty as well as invalidate safety agency approvals or certifications.

Where do I find 3D drawings?
To locate a 3D drawing, select the Learn More button from the connector product you wish to inquire about at the address below, and then select 3D files button. We do not provide 3D drawings of contacts. https://www.andersonpower.com/us/en/ProductPages.html You must be registered on the website and logged in to download a 3D file. If there is not a 3D file on the website for the product you are looking for, please contact tech support for assistance ustechsupport@andersonpower.com

What is the difference between a dust vs boot cover?
Dust covers prevent dirt and dust from entering the mating interface when not connected. Boots provide water, dirt, chemical and UV protection for the connectors in both mated and unmated conditions and are rated for Ingress Protection.

What are finger proof housings? Can I mate them with non finger proof housings?
Finger proof housings add a level of safety to our products. There are ribs on the mating interface that protect against accidental exposure to live contacts and meet UL standards. Finger proof housings should never be mated with non finger proof housings. Forcing these together will cause damage to the housings.

What is the function of reducer bushings with the contacts?
Bushings reduce the inner diameter of the contacts to accept a smaller wire gage. If the wire is too small for the contact being used we may offer a reducer bushing. Reducer Bushings are available to be used with specific contacts. Bushing part numbers can be found on the data sheet for each product. Please note that usage of a bushing with a contact has not been agency tested for approval.

How many volts are your connectors rated for?
Most Anderson Power™ products are rated for 600 volts per UL 1997. Please see specific data sheet for specific ratings.

I need to qualify that the connectors I have are true Anderson Power™ connectors?
The only way to guarantee you have true Anderson Power™ connectors is to purchase from one of our authorized distributors .

Why are the SB®/ SBS® / SBE® / SBX® Connectors color-coded and keyed?
Anderson™ has developed different mechanical keys that coincide with the National Electric code voltage level to prevent incompatible voltages from being cross mated. Note however the mechanical keying and color does not restrict the voltage capability of the connector. Most of Anderson Power™ connectors are rated to 600 volts per UL 1977 (see data sheet for specific ratings).

May I mate connectors together that have low and high mating force contacts?
Yes. However, Anderson Power™ has not tested this for safety regulation approval, and it should be noted that the contacts will wear at an accelerated rate causing the mating cycles to be reduced. Since the user is mating low and high force contacts the mating force would be somewhere in between what is listed for the high and low mating specification.

Should I mate housings together without contacts?
Anderson™ connector housings are designed to be mated only when crimped or soldered contacts are installed within the housing. Please do not attempt to mate the housings unless the contacts are installed. If you attempt to mate the housings without crimped contacts installed, you could damage the housing or spring.

Can I mate Anderson™ housings with a non-Anderson housing?
Only Anderson™ housings should be mated with each other. Mating Non-Anderson parts with Anderson™ products will void UL certifications, warranties, and liability if an incident should occur.

I have connectors that are melting. What might be the cause?
Connectors can show signs of melting for many reasons. Sometimes melting can occur by improper crimping, having damaged or broken wires, use of unapproved tooling, signs of corrosion or in some cases using a connector or wire size not properly sized for your application.

Can I solder contacts instead of crimp?
Yes, soldering can be used as an alternative to crimping. Directions are listed on the assembly document for each connector.

Where do I locate data sheets, drawings, assembly documentation, tooling and crimp specs for each product line?
Please reference the learn more tab on the Product Pages found at the following location.
https://www.andersonpower.com/us/en/ProductPages.html

Where do I locate ROHS and REACH documentation and other certifications?
Please reference the Resource tab on the website. Most certifications can be located there.
https://www.andersonpower.com/us/en/resources.html

Do you have videos of your connectors?
Videos can be found at the following link for Anderson Power™ connectors.
https://www.youtube.com/user/AndersonPowerP

ANDERSON POWER™

Glossary of Terminology

Amp / Ampere - Measurement increment of electric current. Abbreviated as "I".

Applicator - A semi-automatic termination machine consisting of an upper and lower half that is used to crimp contacts onto wire. Used in conjunction with an electrical / mechanical press.

AWG - American Wire Gauge. A standard system for designating wire diameters.

Blindmate - To join two connector halves in a normal engaging mode without visual orientation.

Busbar - Three dimensional constructions enabling electrical distribution of current in power electronic modules. Typically constructed of copper, busbars are most frequently used in power dense applications where the busbar offers a cost or space savings over wire.

Color Coding - A system of identification for terminals housings; and related devices.

Contact Resistance - The electrical resistance of metallic surfaces at their interface in the contact area under specified conditions when carrying a specified test current.

Contact Retention - Minimum axial load in either direction which a contact must withstand while remaining firmly fixed in its normal position within a housing.

Crimp Retention - The axial load which a contact can withstand without separation from the wire.

Crimp Termination - A connection in which a metal sleeve is secured to a conductor by mechanically deforming the sleeve with presses or automated crimping machines, eliminating the need for solder. Not suitable for solid (non-stranded wires).

CSA - Canadian Standards Association, a safety standard writing and testing organization, providing service to Canada, US, Europe and worldwide.

Cycle Controlled - To determine if repetitive on or off conditions result in degrading the contact system which may lead to failures such as "thermal run away".

Detent - A bump or raised section projecting from the surface of a contact for keeping the contact in position relative to another and released by greater force.

Dielectric Strength (Withstanding Voltage) - The highest potential difference (voltage) that an insulation material of given thickness can withstand for a specified time without occurrence of electrical breakdown through its bulk.

Finger Proof - A connector intended for usage external to the end equipment shall have live parts protected against exposure to contact by persons when assembled, installed, and mated as intended, as determined by UL Articulated Probe.

Flammability - The measure of a material's ability to support combustion. Often tested per UL94.

Flat Wiping - The sliding action which occurs when contacts are mated. Wiping has the effect of removing small amounts of contamination from the contact surfaces, thus establishing better conductivity.

Genderless - A connector in which both mating members are exactly alike at their mating face. There are no male or female members, but designs provide correct polarity.

Heat Rise - Temperature rise associated with the electrical load applied to a mated connection.

Hermaphroditic (Genderless) Connector - A connector in which both mating members are exactly alike at their mating face. There are no male or female members, but designs provide correct polarity.

Hot Plug / Hot Swap - Live connector insertion / extractions.

IEC - International Electrotechnical Commission, a standard writing organization that prepares and publishes international standards for all electrical, electronic related technologies.

Insulation Resistance - Ratio of applied voltage to the total current between the two electrodes in contact with a specific insulation.

IP - Ingress Protection, a standard per IEC 60529 for measurement of ingress for solids and liquids into an enclosure.

Locator / Positioner - Device for positioning contacts into crimping dies.

Make-First / Break-Last (Premate) - Sequencing of contact(s) so they engage prior to the main power contacts. Typically used for ground / positive earth / neutral positions as a protective measure against excess currents, short-circuits, and ground faults.

Make-Last / Break-First (Postmate) - Sequencing of contact(s) so that they engage after the main power contacts. Typically used for signal or auxiliary power positions to ensure communications are not started or power circuits switched on until the power contacts are fully engaged.

Mating Force - Force required to join two connector halves in a normal engaging mode.

Modular - Refers to similar parts or modules used as building blocks. A modular connector is one in which similar or identical sections can be assembled together to provide the appropriate connector type or size for the application.

Ohms - Measurement increment of resistance.

Operating Temperature Range - Connector temperature rating established by materials used, plastic, finish, and the base metal. Applying an electrical load will result in a temperature rise that is additive to the operating ambient.

PCB - Acronym for Printed Circuit Board.

Polarization - A technique of eliminating symmetry so that parts may only be mated one way.

Pulse (Surge) Current - Highest instantaneous current that will run.

REACH - The European Community Regulation on chemicals and their safe use. It deals with the Registration, Evaluation, Authorization and Restriction of Chemical substances.

Reducing Bushing - Separate tubular sleeve used to downsize the diameter of a crimp barrel to accept a smaller size wire.

Reeled Contacts - Contacts attached to a feeder strip for use in a high volume crimping tool.

Resistance - The opposition to the passage of an electric current through that element. Abbreviated as “R”.

RoHS - Restriction of Hazardous Substances Directive. The European directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Sacrificial Tip - An area of a contact system that absorbs electric arching to limit damage to the actual mating surface of the contacts.

Self-Wiping - The sliding action which occurs when contacts are mated. Wiping has the effect of removing small amounts of contamination from the contact surfaces, establishing better conductivity.

Spring Loaded - A means of providing contact normal force with the use of a mechanical spring.

Storage Battery - A voltaic battery consisting of two or more storage cells. Energy is accumulated by chemical activity in the charging process and released on demand in the form of electric current.

Strain Relief - A means of termination or installation that reduces the transfer of mechanical stress from the conductor.

Termination - Means of joining contacts to a conductor.

Touch Safe - A connector intended for usage external to the end equipment shall have live parts protected against exposure to contact by persons when assembled, installed, and mated as intended, as determined by UL Articulated Probe.

Turret / Positioner - Device for positioning contacts into crimping dies.

TUV - The TÜV Rheinland Group is provider of technical services that certifies products to standards written by other organizations.

UL - Underwriters Laboratory, a global safety standard writing and testing organization.

Volts - Measurement increment of electric potential. Abbreviated as “E”.

VDE - A German standard writing and testing organization responsible standards and safety specifications covering the areas of electrical engineering, electronics, solar power and information technology.

Watt - Measurement increment of electric power. Abbreviated as “W”.

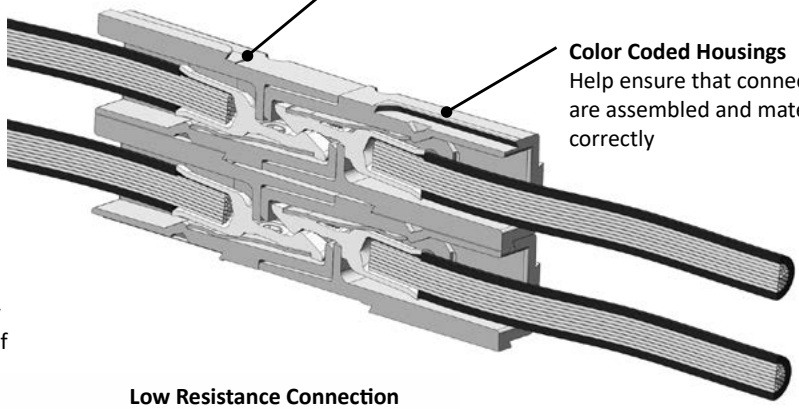
Powerpole® Family

Powerpole® Connectors - PP15 to PP180

This versatile connector series meets a wide range of power connection needs. The Powerpole family offers four housing sizes to accommodate a range of wire sizes in the most compact footprint possible. Powerpole® can handle up to 350 amperes per pole and accommodate wire ranges of 20 to 3/0 AWG (0.75 to 70 mm²). A wide range of colored housing options can be stacked together to create a proven reliable custom connector. These housings can be used with different contacts to create wire-to-wire, wire-to-board, or wire-to-busbar connections. The Powerpole® connector combines high quality materials and a cost effective innovative design to allow powerful versatility.

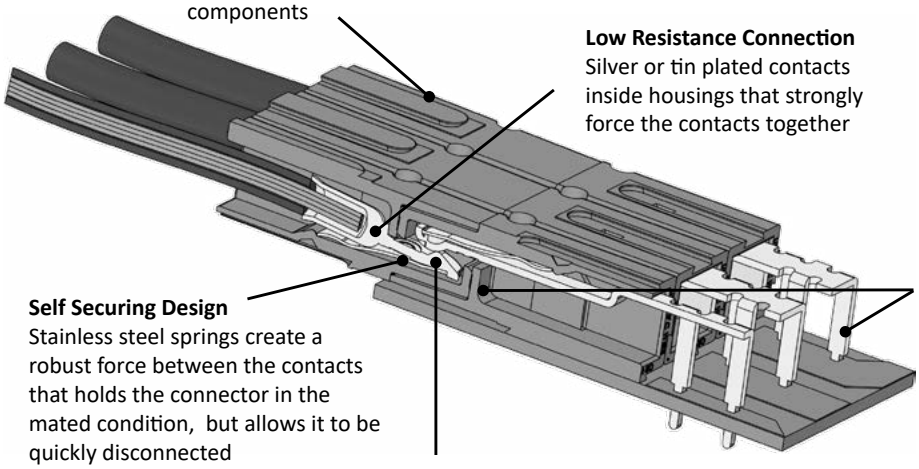
Stackable Modular Housings
Available in four sizes to right size your connection need

Color Coded Housings
Help ensure that connectors are assembled and mated correctly



Genderless Housings
Provide simplified assembly and minimize the number of components

Low Resistance Connection
Silver or tin plated contacts inside housings that strongly force the contacts together



Connection Versatility
Contacts for wire, PCB, or busbar all fit into the same housings

Self Securing Design
Stainless steel springs create a robust force between the contacts that holds the connector in the mated condition, but allows it to be quickly disconnected

Hot Plugging AC or DC
Contacts feature a sacrificial tip that allow high current circuit interrupt

Powerful Versatility

Create Your Own Custom Connector from Durable Proven Components

Powerpole® connectors can be easily customized to each power connection need. Choose from a wide range of colored housings and stack them together into a multiple position connection. Durable silver or tin plated contacts crimp and poke into housings and are available for a broad range of wire sizes. PCB and busbar contacts can also be simply snapped into place using the same housings. Pre-mate ground / power housings and contacts can be used for safety or sequencing and stack along with standard housings.

How to Create Mating Blocks of Stacked Powerpole® Connectors

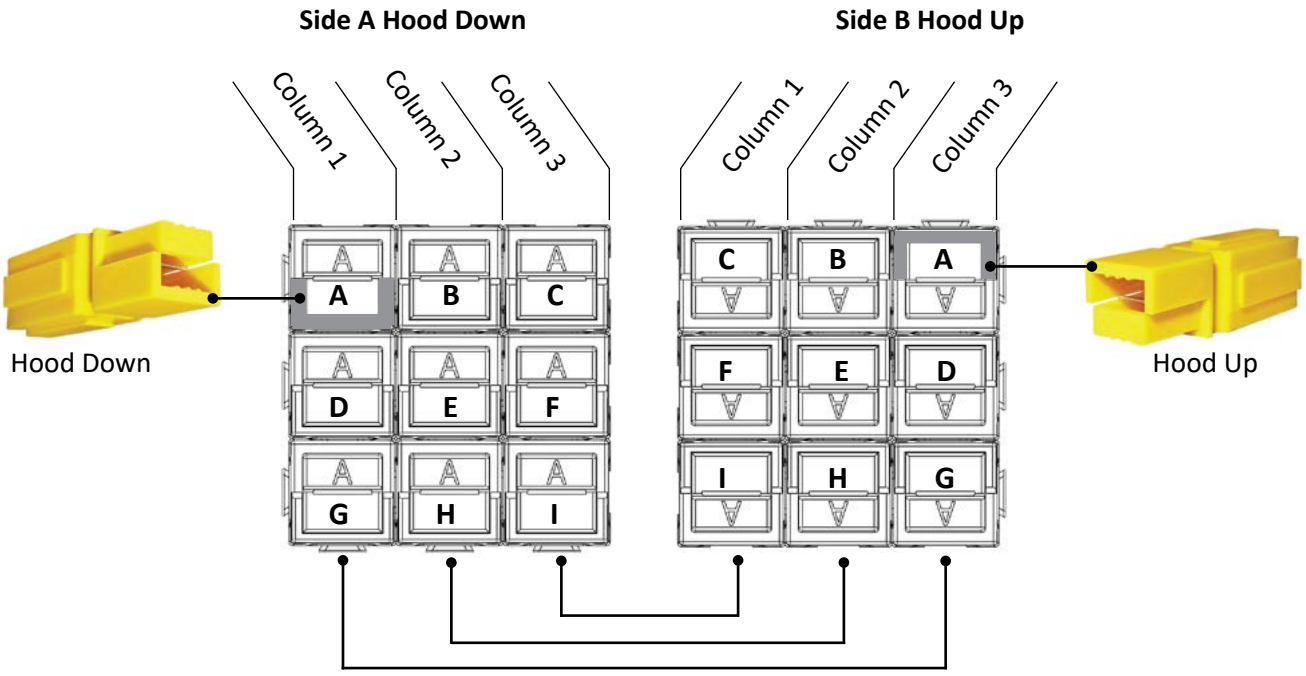
A Single Row Assembly such as the 1x3 shown below will mate to itself. If an assembly has more than one row such as the Two Row Assembly 2x1 shown below, then a different mirror image mating assembly is required.

Single Row Assembly 1x3

Two Row Assembly 2x1

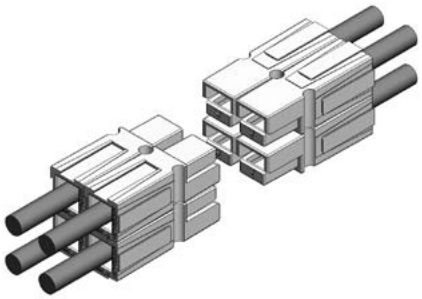
To Create a Mirror Image Mating Assembly

When mating blocks are viewed with their hoods in the respective orientation (down or up), the column position of connectors is unchanged. The rows themselves are mirror images of each other. So in the below example, what is column 1 on side A, is column 3 on side B.

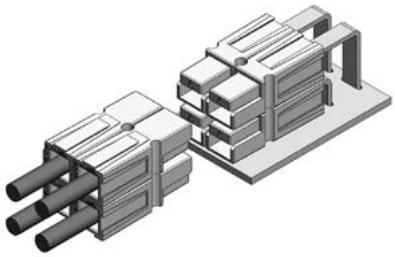


Use the Same Housings for Wire, PCB, or Busbar Connections

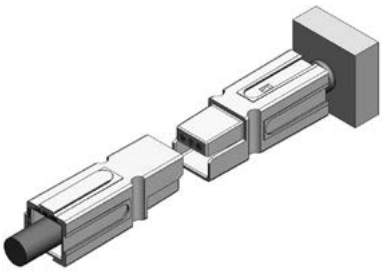
The Powerpole® connection system allows the same housings to hold different contacts for terminating to wire, printed circuit boards, or busbars. See some of the many ways Powerpole® components can be assembled to create a custom connection solution.



Wire-to-Wire



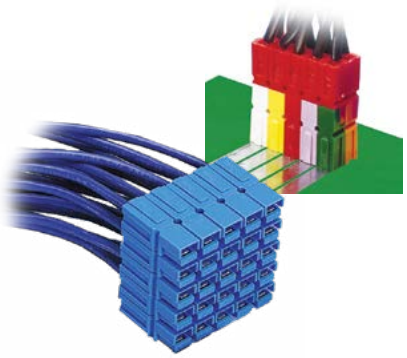
Wire-to-PCB



Wire-to-Busbar

Powerpole® Connectors

PP15/45 - Up to 55 Amps



PP15/45 series are the smallest Powerpole® housings. They can be used for wire-to-wire or wire-to-board applications. Wire sizes from 20 to 10 AWG (0.75 to 6 mm²) offer power capabilities up to 55 amps per pole. Finger proof housings and the ability to incorporate first-mate last-break ground connectors enhance the capabilities of the Powerpole® series.

- **High Power Density**
  Up to 55 amps in a compact footprint
- **Wire-to-Wire & Wire-to-Board Configurations**
  Wire & PCB contacts can be used in the same housings
- **Finger Proof Housings Available**
  Protects against accidental contact with live circuits

PP15/45 ORDERING INFORMATION

PP15/45 Finger Proof Housings

Improved on the original design by adding ribs to mating interface to protect against accidental contact with live circuits. Meets the requirements of UL1977 section 10.2 and is rated IP20. Will not mate with standard housings.

Description	Part Numbers

PP15/45 ULTRASONICALLY BONDED ASSEMBLIES

Assemblies feature housings that are ultrasonically welded to create a one piece connector unit using an Anderson™ special process. After welding, retaining pins are no longer required to secure the stacked housings to each other. This allows Powerpole® 15/45 connectors to be used as a durable one piece connector header. Contact customer service for configurations not shown below.

Powerpole® Pak Connectors

PP15/45

Powerpole® Pak connector shells enclose stacked groupings of PP15/45 sized housings in a durable black shell for a finished connector appearance and additional features. Inline, panel mount, and blindmate configurations are available. Plug shells offer the option of integral latches and strain relief to help secure your connection.

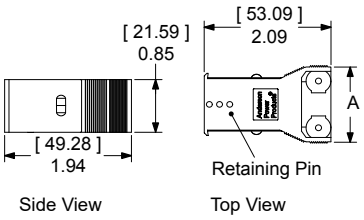
- **Package Groupings of PP15/45 Connectors**
  Provides a finished appearance while protecting the individual connectors with an outer shell
- **Inline, Panel Mount, "T" or Blindmate Configurations**
  Allows one connection system to meet multiple needs
- **Optional Latching and Strain Relief**
  Secures your connection and wires

POWERPOLE® PAK ORDERING INFORMATION - Powerpole® housings and contacts are sold separately

Plug Shell Without Latch

Can mate inline with other plug shells with or without latches, or mate to a panel mount receptacle. For use with all Powerpole® 15/45 connectors only. Cable Clamp and Hardware Pak or Retaining Pins must be ordered separately.

Description	Part Numbers			Dimensions - A - inches	Dimensions - A - mm
Minimum Quantity	1,000	500	25		
Black, 2 to 4 Poles	1461G1-BK	-	1461G1	1.24	31.50
Black, 5 to 6 Poles	-	1461G2-BK	1461G2	1.56	39.62
Black, 7 to 8 Poles	-	1461G3-BK	1461G3	1.87	47.50



NOTE: Retaining pins are used to secure and position Powerpole® housings in one of three positions in plug shells.

Max wire O.D. for 2 to 4 pole plug shells is 0.60 inches (15.2 mm²). For all other plug shells is 0.63 inches (16.0 mm²).

Plug Shell With Latch

Can mate inline with other plug shells without latches, or mate to a panel mount receptacle. For use with Powerpole® wire connectors only. Cable Clamp and Hardware Pak or Retaining Pins must be ordered separately.

Description	Part Numbers			Dimensions - B - inches	Dimensions - B - mm	Dimensions - C - inches	Dimensions - C - mm	Dimensions - D - inches	Dimensions - D - mm
Minimum Quantity	1,000	500	25

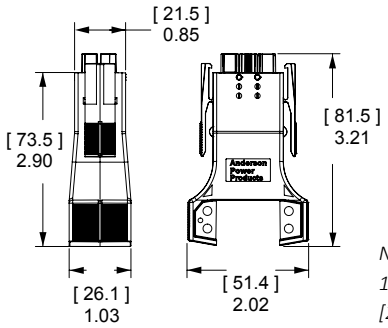
Plug Shell With Latch & Non-Conductive Strain Relief

New 2X3 Powerpole® Pak offers an improved ergonomic shell for easier latch operation as well as a plastic, non-conductive strain relief. The new strain relief can accommodate up to a 6 conductor 10 AWG cable. Can mate to a panel mount receptacle. For use with Powerpole® wire connectors only. Cable Clamp and Hardware Pak or Retaining Pins must be ordered separately. To be used with 115G23 cable clamp only.

Description	Part Numbers	
Minimum Quantity	1,000	25
Black, 5 to 6 Poles	1460G23-BK	1460G23



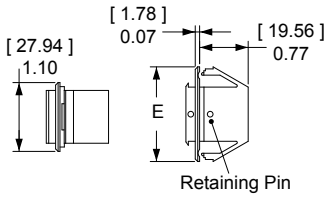
NOTE: Max wire O.D. for 1460G23 is 0.80 inches [20.3 mm²].

Snap-in Receptacle Shell

Mate to plug shells with or without latches, or mate to another panel mount receptacle to create a bulkhead to bulkhead connection. For use with Powerpole® wire or PCB connectors. Order the number of retaining pins for each receptacle as shown below separately.

Description	Part Numbers			Number of Retaining to Order	Dimensions - E - inches	mm	Knock Out Size - Width - inches	mm
Minimum Quantity	1,000	500	25					
Black, 2 to 4 Poles	1470G1-BK	-	1470G1	1	1.50	38.10	1.25	31.75
Black, 5 to 6 Poles	-	1470G2-BK	1470G2	2	1.88	47.75	1.62	41.15
Black, 7 to 8 Poles	-	1470G3-BK	1470G3	3	2.13	54.10	1.88	47.75
Black, 9 to 10 Poles	-	1470G4-BK	1470G4	4	2.44	61.98	2.19	55.63

* Height = (25.4 mm) 1.0 in.

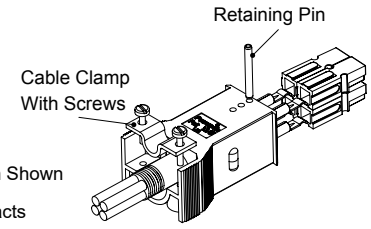


NOTE: Retaining pins are used to secure and position Powerpole® housings in one of two positions in receptacle shells.

Cable Clamp & Hardware Pak

Includes cable clamp, 2 screws, and required amount of retaining pins for each configuration.

Description	Screw Head Type	Cable Type	Part Numbers		
Minimum Quantity			1,000	500	25
2 to 4 Poles	Straight Slot	Bundled	115G1-BK	-	115G1
5 to 6 Poles	Straight Slot	Bundled	115G2-BK	-	115G2
7 to 8 Poles	Straight Slot	Bundled	115G3-BK	-	115G3
9 to 10 Poles	Straight Slot	Bundled	-	115G4-BK	115G4
2 to 4 Poles	Phillips	Bundled	115G7-BK	-	115G7
5 to 6 Poles	Phillips	Bundled	115G8-BK	-	115G8



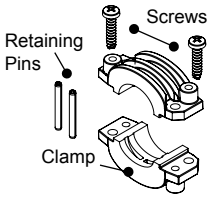
Plug Shell Without Latch Shown

Shell, housing and contacts are sold separately.

Cable Clamp & Hardware Pak

Includes 2 cable clamp halves, 2 screws and 2 retaining pins. To be used with 1460G23 Plug Shell only.

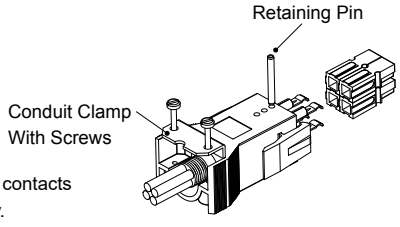
Description	Screw Head Type	Cable Type	Part Numbers	
Minimum Quantity			1,000	25
5 to 6 Poles	Phillips	Bundled	115G23-BK	115G23



Flexible Conduit Clamp & Hardware Pak

Includes cable clamp, 2 screws, and need amount of retaining pins for each configuration.

Description	Part Number
Minimum Quantity	100
2 to 4 Poles	110G10



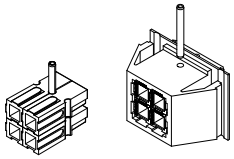
Shell, housing and contacts are sold separately.

Plug Shell With Latch Shown

Retaining Pin for Snap-in Receptacle

Order the number of retaining pins for each receptacle shown in the Snap-in Receptacle Shell ordering information. Pins are also required for the plug side when the Cable Clamp & Hardware Pak is not ordered.

Description	Part Numbers	
Minimum Quantity	1,000	100
Retaining Pin	110G9-BK	110G9

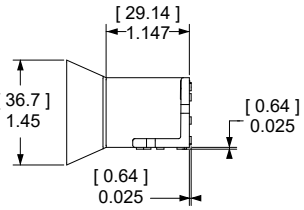


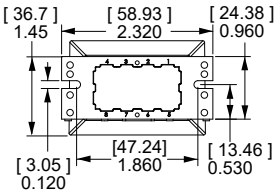
Shell and housing are sold separately.

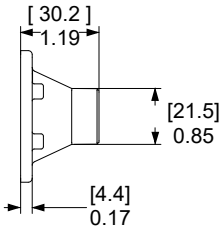
Blindmate Pak Connector

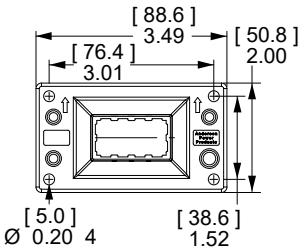
Ideal for panel to panel, bulkhead to bulkhead, or rack mount applications that require the power connector to compensate for up to 0.45 in. (11.43 mm) of misalignment in either axis. Eight positions can be filled with Powerpole® 10 to 45 connectors. The receptacle side can be used with wire or PCB contacts. Hardware bag includes retaining pins.

Description	Part Numbers	
Minimum Quantity	50	25
2x4 Blindmate Plug Shell, Hardware & Pins	-	BMPP10-45P
2x4 Blindmate Receptacle Shell, Hardware & Pins	-	BMPP10-45R
2x4 Blindmate Plug Shell	BMHSG-P	-
2x4 Blindmate Receptacle Shell	BMHSG-R	-
Hardware Bag Plug Side	-	110G50
Hardware Bag Receptacle Side	-	110G51









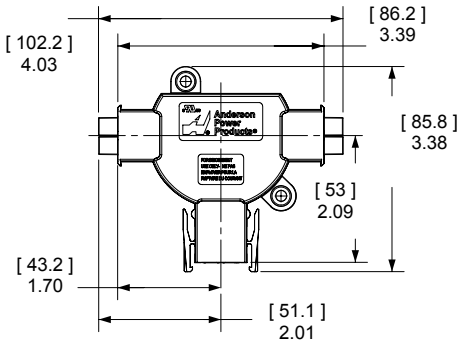
See our innovative MARC Connector that offers straight-on or rotational blindmate capability. MARC holds 6 PP15/45 power contacts and 2 PP15/45 premate ground contacts in a high temperature housing. Visit our website www.andersonpower.com to learn more.

"T" Pak 2 Way Splitter

The Powerpole® "T" Pak connector is a 2 way electrical splitter that splits electrical current from one incoming circuit into two outgoing circuits. The standard configuration is pre-wired for AC 3 phase, 3 wire plus ground configurations. The "T" Pak can also be used for AC single phase plus ground or DC 2 wire plus ground applications by not using either the red or white power positions. "T" Pak is pre-wired from the factory allowing plug and play field installation of modular office and industrial equipment. UL recognition up to 20 amps and 600 volts is achieved when mating Powerpole® Pak plugs with 12 AWG wire.

For OEM manufacturing scale applications, the "T" Pak can be loaded with custom configurations of any of our finger proof, standard, or ground housings and contacts in the PP15/45 series. Contact sales or customer service for additional information.

Description	Part Numbers
Minimum Quantity	80
Assembled "T" Pak	20-01
Mating Plug Shell with Latch 2x2	26-01
Mating Plug Shell without Latch 2x2	27-01



Standard configuration for each side of the T includes (1) each Red, Black, and White Standard PP15/45 Housings & 261G2-LPBK contacts with (1) 45A Green Premate Ground Housing and 1830G1-LPBK contact.

Mating plug shells include (1) each Red, Black, and White Standard PP15/45 Housings & (3) 261G2-LPBK contacts with (1) 45A Green Premate Ground Housing and 1830G1-LPBK contact. Cable clamp & hardware pack also included.

MIL-STD-202	204 Condition A	10g's

NOTE 1: See IEC 60664-1 for working voltage.

NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.

* *No TUV Recognition*

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA rating below a 30°C temperature rise.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

4 - Tested with contact part number 261G2.

5 - Based on 2 housings blocked together.

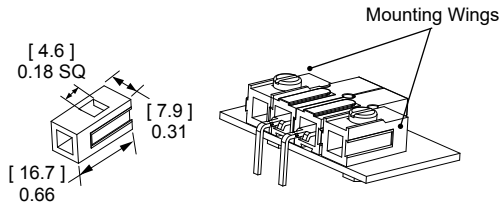
POWERPOLE® 15/45 ACCESSORIES

Mounting Wing

Secure dovetailed Powerpole® 15/45 series housings by passing fasteners through the wings in either a horizontal or vertical orientation. Useful for sheet metal panels, printed circuit boards, and many other mounting surfaces. Fasteners not included.

Description	Part Numbers	
Minimum Quantity	2,500	100
Red	1399G9-BK	1399G9
Blue	1399G8-BK	1399G8



Spacer

Used to separate housings under high power to minimize derating. They are recommended for squaring off a block of Powerpole® 15/45 housings for use in connector shells and mounting clamps. Use a combination of long and short spacers opposite each other in a mated block to add keying features or use two short spacers to avoid interference. Spacers with holes can also be used to fasten the blocked housings to a surface with a fastener.

Description	Part Numbers	
Minimum Quantity	2,500	100
Red, Short w/ Hole	1399G1-BK	1399G1
Red, Long	1399G2-BK	1399G2

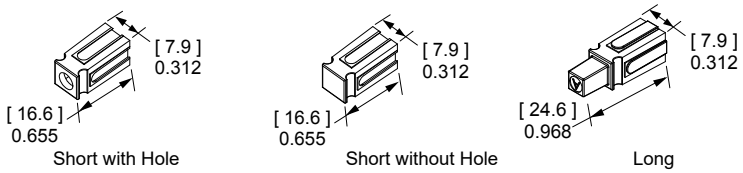
White, Short w/ Hole	1399G14-BK	1399G14
White, Long	1399G17-BK	1399G17



Retaining Pins

Keep stacked Powerpole® 15/45 series housings from separating. Retaining pins are inserted in the circular opening between two housings stacked side by side.

Description	Part Numbers		Dimensions - A - inches	Dimensions - A - mm	Dimensions - B - inches	Dimensions - B - mm

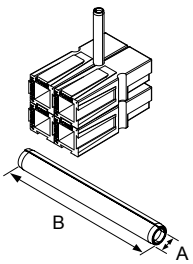
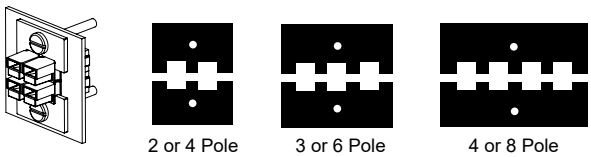
1 Block High	H1507P38	110G16	0.093 / 0.103	2.360 / 2.62	0.250	6.350
2 Block High	111812P5	110G17	0.093 / 0.103	2.360 / 2.62	0.440	11.180



Mounting Clamp

Mounting clamps can be used for fastening a block of Powerpole® 15/45 series housings to a panel. Connector blocks must be a complete square for the clamps to work properly. Fastening hardware not included.

Description	Part Numbers
Minimum Quantity	100 sets of 2
2 or 4 Pole	1462G1
3 or 6 Pole	1462G2
4 or 8 Pole	1462G3



PCB Mounting Staples

PCB staples are soldered into place to secure Powerpole® 15/45 series housings in a horizontal configuration to the board. Reduce strain on soldering joints during mating and unmating.

Part Numbers	H x W	Length	Dimensions - A - inches	mm	- B - inches	mm
Minimum Quantity 100						
114555P1	1 x 1	Short	0.47	12.0	0.28	7.0

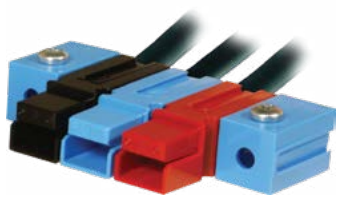
Powerpole® Connectors

PP75 - Up to 120 Amps



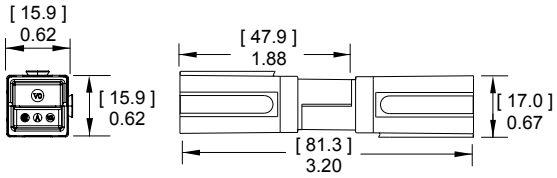
PP75 with Mounting Wings

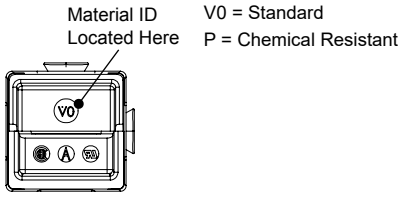
PP75 series Powerpole® housings can be used for wire-to-wire, wire-to-board, and wire-to-busbar applications. Wire sizes from 16 to 6 AWG (1.3 to 13.3 mm²) offer power capabilities up to 120 amps per pole. Locking housings offer the capability to secure Powerpole® housings to each other and to mounting pads. Housings made from chemical resistant (CR) resin withstand industrial solvents better than standard housings.

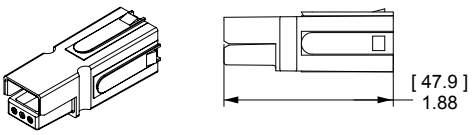
Large Wire Range Accommodates up to 6 AWG (10 mm²) Wire
Reducing bushings allow as small as 16 AWG (1.5 mm²) wire to be used

Wire, PCB, and Busbar Contacts
Allows one connection system to meet multiple needs

Mini-Powerclaw PCB Contacts Minimize PCB Footprint
Removes the PP75 housing from the board side







PP75 ORDERING INFORMATION

PP75 Standard Housings

The second smallest Powerpole® housing can be used with wire contacts up to 6 AWG (10 mm²) as well as PCB and busbar contacts.

Description	Part Numbers	
Minimum Quantity	1,000	100
Red	5916G7-BK	5916G7
Green	5916G6-BK	5916G6
Black	5916G4-BK	5916G4

Orange	5916G14-BK	5916G14
Gray	5916G16-BK	5916G16

PP75 Chemical Resistant (CR) Housings

Has the same form and dimensions of the standard PP75 housing in a chemical resistant PBT / PC blend housing. Suitable for use to -40°C.

Description	Part Numbers
Minimum Quantity	1,000
Red	P5916G7-BK
Black	P5916G4-BK
White	P5916G5-BK
Blue	P5916-BK

PP75 Locking Dovetail Housings

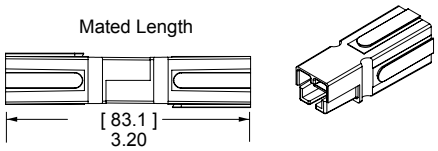
Offers dovetails for stacking housings that have a locking feature to prevent housings separating. Can mate to standard and chemical resistant housings, but cannot be stacked with them.

Description	Part Numbers	
Minimum Quantity	1,000	100
Red	75LOKRED-BK	75LOKRED
Green	75LOKGRN-BK	75LOKGRN
Black	75LOKBLK-BK	75LOKBLK
White	75LOKWHT-BK	75LOKWHT
Blue	75LOKBLU-BK	75LOKBLU
Gray	75LOKGRA-BK	75LOKGRA

PP75 Premate Ground Housings

Offers a first-mate, last-break connection when stacked together with PP75 housings. Stacks together with PP75 standard and chemical resistant housings. Housings are mechanically keyed to prevent cross mating with power positions.

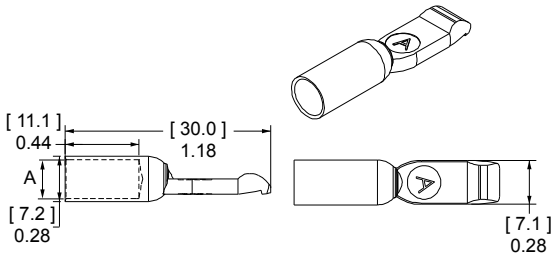
Description	Part Numbers	
Minimum Quantity	1,000	100
Green	5927G6-BK	5927G6



PP75 Silver Plated Wire Contacts

Silver plated contacts offer the best electrical performance and durability up to 10,000 mating cycles. See reducing bushings in accessory section for smaller wires.

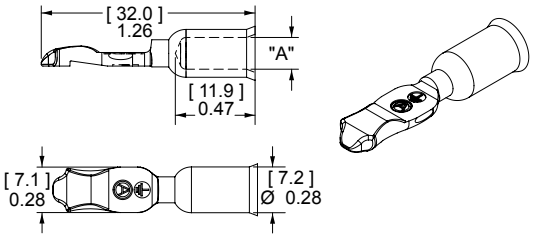
AWG	mm²	Mating Force	Loose Piece Part Numbers		Dimensions - A - inches	mm
Minimum Quantity			1,000	100		
6	13.3	Low	1307-BK	1307	0.22	5.59
6	13.3	High	5900-BK	5900	0.22	5.59
8	8.4	High	5952-BK	5952	0.19	4.83
12 to 10	3.3 to 5.3	Low	5953-BK	5953	0.14	3.56
12 to 10	3.3 to 5.3	High	5915-BK	5915	0.14	3.56



PP75 Premate Ground Wire Contacts

Silver plated contacts for use with the PP75 Premate Ground Housing. Rated to 10,000 mating cycles.

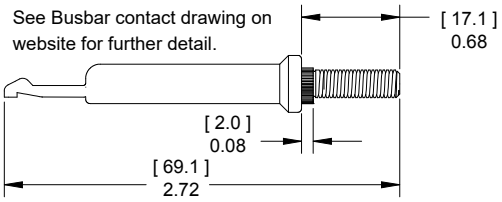
Type	AWG	mm²	Loose Piece Part Numbers		Dimensions - A - inches	mm
Minimum Quantity			1,000	100		
Individual	6	13.3	1875G1-BK	1875G1	0.22	5.59
Individual	8	8.4	1875G2-BK	1875G2	0.19	4.83
Individual	12 to 10	3.3 to 5.3	1875G3-BK	1875G3	0.14	3.56



PP75 Silver Plated Busbar Contacts

Provide a quick disconnect input or output busbar connection. Busbar contacts are for mating with wire contacts only. Part number 75BBS includes lock nuts. Locknuts must be ordered separately for B01915P1.

Type	Thread	Mating Force	Part Numbers		
Minimum Quantity			1,000	20	10
Busbar	10-24	High	B01915P1	-	75BBS
Lock Nut	10-24	-	H1216P8	-	-

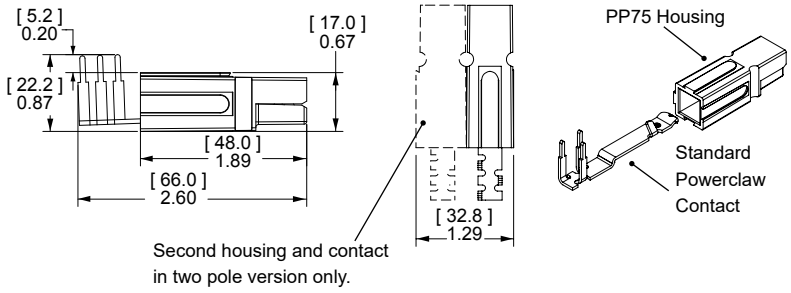


55A Right Angle Standard Powerclaw PCB Contacts

Standard Powerclaw contacts are for use inside a PP75 housing and provide a color-coded right angle connection to the PCB.

Description	Loose Piece Part Numbers	
Minimum Quantity	500	100
Tin Plated	PC5930T-BK	PC5930T
Silver Plated	PC5930S-BK	PC5930S

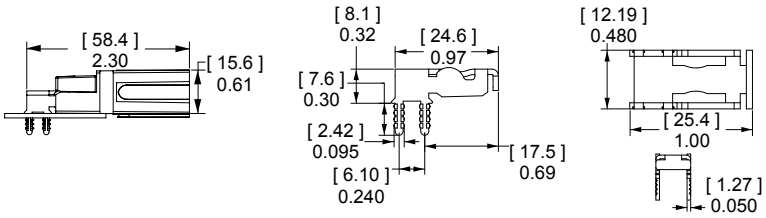
See PCB contact drawing on website for further detail.



55A Right Angle Mini Powerclaw PCB Contacts

Right angle Mini Powerclaw contacts can be used on the PCB edge without a PP75 housing on the PCB side. A self polarizing design only allow PP75 wire housings to mate to PCB contacts one way.

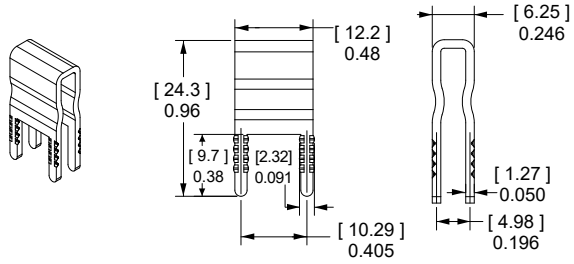
Description	Loose Piece Part Numbers	
Minimum Quantity	1,000	100
Tin Plated	PC5934T-BK	PC5934T
Silver Plated	PC5934S-BK	PC5934S



55A Vertical Mini Powerclaw PCB Contacts

Vertical Mini Powerclaw contacts save space by not requiring a PP75 housing on the PCB side. The guide housing is required for 2 pole applications to provide a polarized connection. (See PP75 accessories).

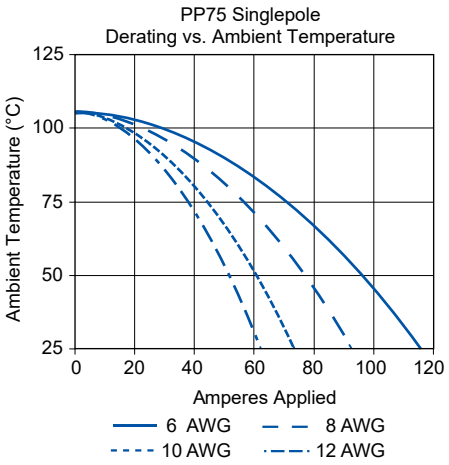
Description	Loose Piece Part Numbers	
Minimum Quantity	1,500	100
Tin Plated	PC5933T-BK	PC5933T
Silver Plated	PC5933S-BK	PC5933S

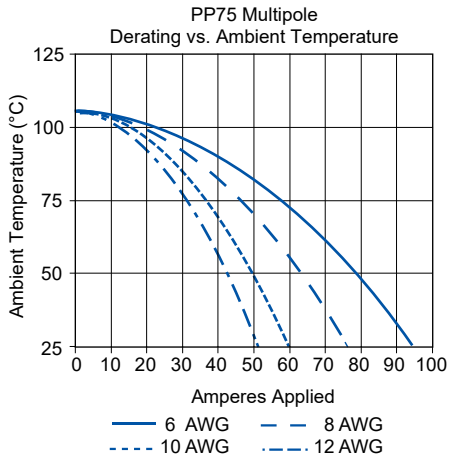


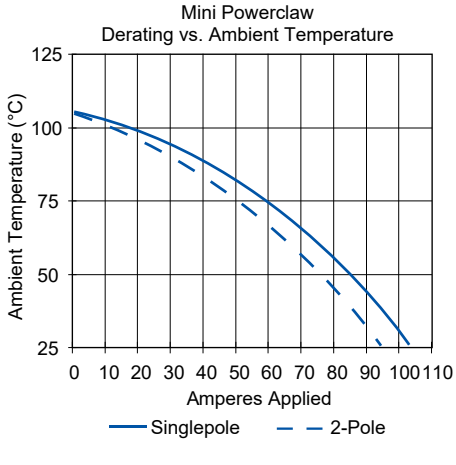
See PCB contact drawing on website for further detail.

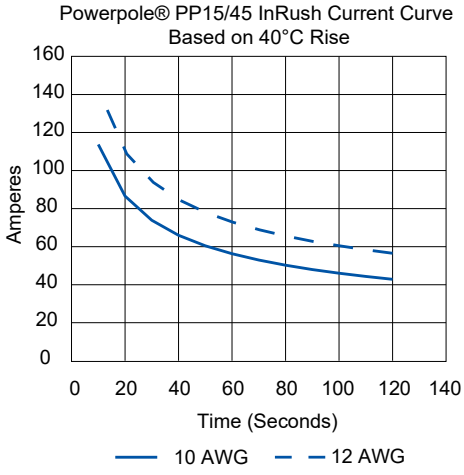
PP75 CONNECTOR TEMPERATURE CHARTS - Temperature rise charts are based on a 25°C ambient temperature.

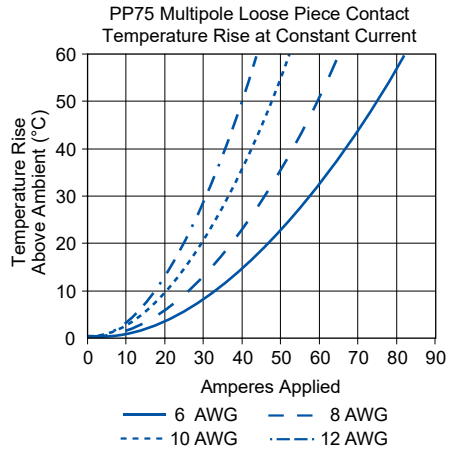
Current - Temperature Derating per IEC 60512-5-2 Test 5B

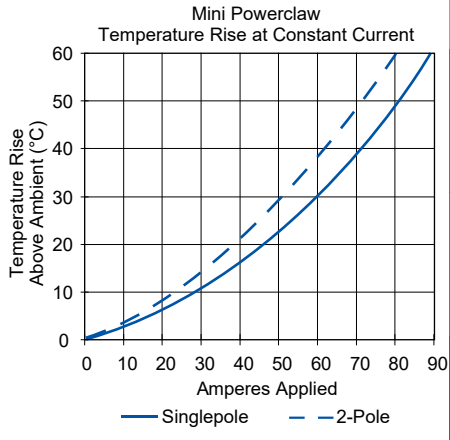












NOTE: Powerclaw charts are based on 8 AWG equivalent copper foil on board side, mated to 6 AWG conductor on wire side.

NOTE 1: See IEC 60664-1 for working voltage.

NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA rating below a 30°C temperature rise.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Without use of spacers to increase creepage and clearance distances.

4 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

5 - Tested with contact part number 5900.

6 - Based on 2 housings blocked together.

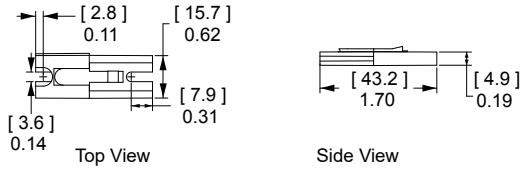
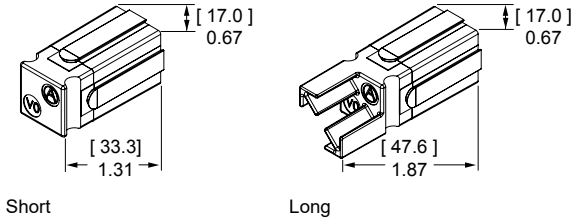
Blue	75LOKSMTBLU-BK	75LOKSMTBLU



Spacer

Use to separate housings under high power to minimize power capability derating due to heat rise. They are recommended for squaring off a block of Powerpole® 75 housings to enable mounting accessories or retaining pins to be used. Combining long and short spacers opposite each other in a mated block adds keying features, or use two short spacers to avoid interference.

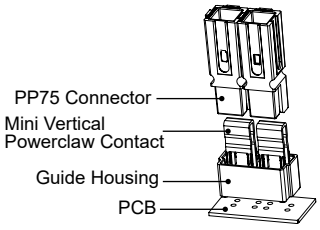
Description	Part Numbers	
Minimum Quantity	1000	100
Red, Short	1399G23-BK	1399G23
Red, Long	1399G21-BK	1399G21



Guide Housings for Vertical Mini Powerclaw Contacts

Prevents polarity being reversed when a two pole PP75 block is mated to vertical mini Powerclaw contacts. Fastening hardware not included.

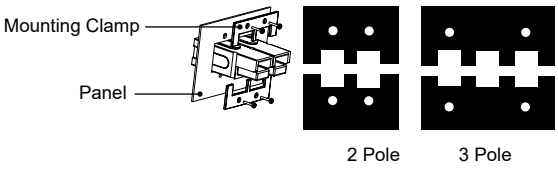
Description	Part Numbers	
Minimum Quantity	1,000	100
Black Guide Housing	PC-HSG-PP-BK	PC-HSG-PP



Mounting Clamp

Mounting clamps can be used for fastening a block of Powerpole® 75 series housings to a panel. Connector blocks must be a complete square for the clamps to work properly. Fastening hardware not included.

Description	Part Numbers
Minimum Quantity	50 sets of 2
2 or 4 Pole	1463G1
3 or 6 Pole	1463G2



Retaining Pins

Retaining pins are used to keep stacked Powerpole® 75 series housings from separating.
Retaining pins are inserted in the circular opening between two housings stacked side by side.
Dimension B is +/- 0.015 in or 0.38 mm.

Description	Part Numbers		Dimensions - A - inches	Dimensions - A - mm	Dimensions - B - inches	Dimensions - B - mm

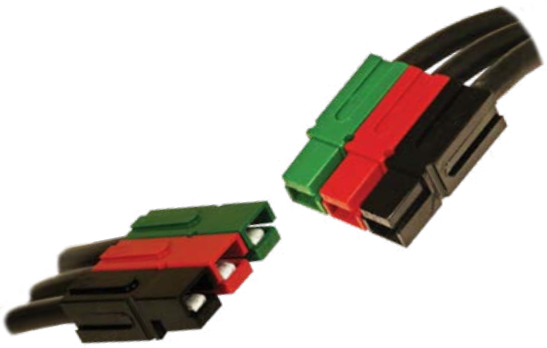
ANDERSON POWER™

Powerpole® Connectors

PP120 - Up to 240 Amps



PP120 series Powerpole® housings are designed to accommodate up to 1/0 AWG (50 mm²) wires and handle high currents up to 240 amps. Reducing bushings allow PP120 to accept down to 8 AWG (10 mm²) wires. Multiple colors of stackable housings combine with low resistance flat wiping technology to offer powerful connection capability.

- **Large Wire Range Accommodates up to 1/0 (50 mm²) Wire**
  Reducing bushings allow as small as 8 AWG (10 mm²) wire to be used
- **Low Resistance Silver Plated Copper Contacts**
  Allows currents up to 240 amps
- **UL Rated for Hot Plugging up to 60 Amps**
  Great for battery or other applications where the ability to interrupt circuits is required

PP120 ORDERING INFORMATION

PP120 Housings

The second to largest Powerpole® housing can be used with wire contacts for up to 1/0 AWG (50 mm²) or busbar contacts.

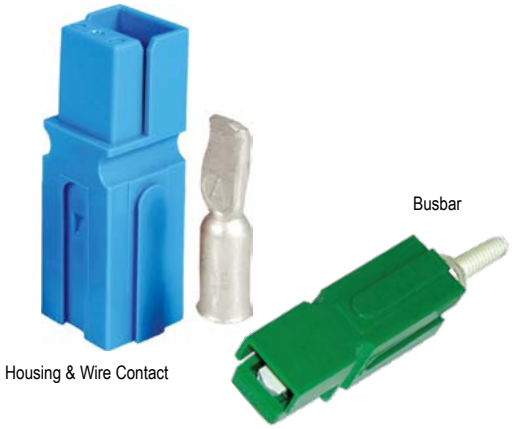
Powerpole® Connectors

PP180 - Up to 350 Amps



PP180 are the largest of the Powerpole® series housings. They are designed to accommodate up to 3/0 (70 mm²) wires and handle high currents up to 350 amps. Busbar contacts are also available for power inputs and takeoffs. Color-coded housings minimize user confusion and the potential of cross mating circuits.

- **Low Resistance Silver Plated Copper Contacts**
  Allows currents up to 350 amps
- **UL Rated for Hot Plugging up to 75 Amps**
  Great for battery or other applications where the ability to interrupt circuits is required
- **Busbar Contacts Work with Standard Housings**
  Provides a hot swappable quick disconnect system for busbar power distribution

PP180 ORDERING INFORMATION

ANDERSON POWER™

Multipole Family

Overview of SBS®, SB® & SBX® / SBO® Main Differentiating Features

SBS® - The "Storage Battery Safety" connector provides a compact connection with a touch safe interface. The newest series of the Multipole connector family continues to add new features and capabilities. Some models offer auxiliary capabilities or ground options.

SB® - Based on the original "Storage Battery" connector that pioneered flat wiping contact technology over a half century ago. Two to three positions in a genderless mechanically-keyed housing suitable for a wide array of power connection applications.

SBX® - The addition of auxiliary positions to the SB® created the "Storage Battery Auxiliary" connector. Up to 8 auxiliary positions allow expanded capabilities for the Multipole family by allowing intelligent power switching, monitoring of battery charge status, and other signal functions to be integrated into a single connector.

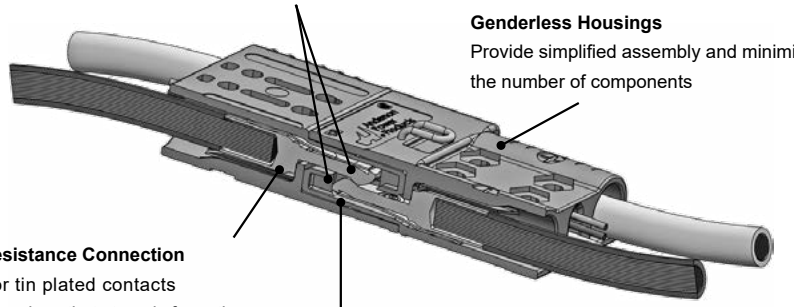
SBE® - By modifying the SBX® housing the "Storage Battery European" connector was created. The SBE® housings are molded from a chemical resistant PBT resin and the SBE® 320 features improved touch safety over the SBX® 350 design.

SBO® - Designed to meet the needs of connecting office equipment, the "Storage Battery Office" connector is molded out of durable PC like the original SB® but incorporates the auxiliary positions of the SBX® in a housing similar to the SBE® 80.

SB® SMART - Designed for applications where storage batteries intelligently interact with the system. Two primary power positions are combined with sixteen auxiliary power / signal positions. This allows one connection to be used to route high power lines, low power lines, and signal circuits.

Hot Plugging AC or DC
Contacts feature a sacrificial tip that allow high current circuit interrupt

Genderless Housings
Provide simplified assembly and minimize the number of components

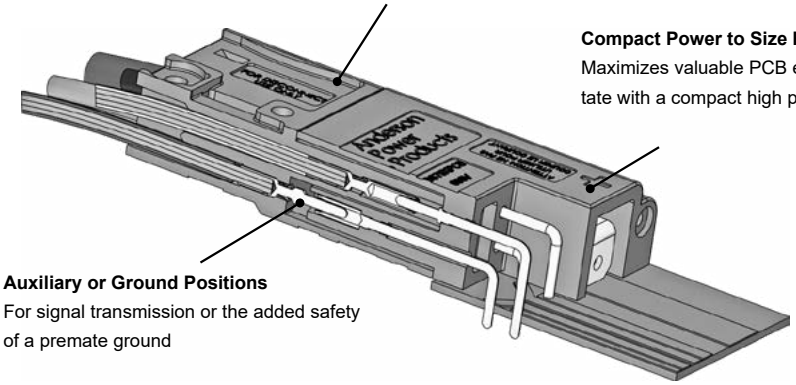


Low Resistance Connection
Silver or tin plated contacts inside housings that strongly force the contacts together

Self Securing Design
Stainless steel springs create a robust force between the contacts that holds the connector in the mated condition

Keyed & Color Coded Housings
Prevents accidental cross mating of circuits

Compact Power to Size Ratio
Maximizes valuable PCB edge real estate with a compact high power design



Auxiliary or Ground Positions
For signal transmission or the added safety of a premate ground

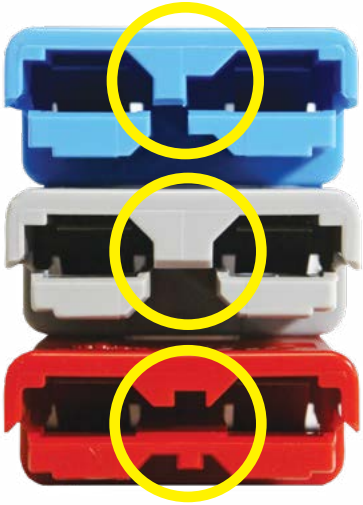
Explanation of Mechanical Voltage Keys

Features molded into the mating interface of the connector housing prevent accidental cross mating of circuits. This molded feature mechanically keys the connection so only housings with the same mating interface can be mated together.

Different mechanical keys can be easily recognized by the color of the housing. This color coding corresponds to a voltage that industrial trucks, batteries, and chargers have adopted as a standard to prevent incompatible voltages from cross mating.

The same mechanical keying and color coding that is so successful for industrial trucks, is also widely used in power electronics applications. UPS systems, power supplies, personal mobility, and alternative energy applications have all used this feature to ensure user safety.

NOTE: Some housings in the SB® 50, SB® 175, and SB® 350 series have different colored housings with a shared mechanical keying feature. Please see the specific data sheet for details.



Recommended Voltage Key Color-Code

Voltage	12V	18V	24V	36V	48V	72V	80V	96V	120V	144V
Color	Yellow	Orange	Red	Gray	Blue	Green	Black	Brown	Purple	White

SBS® Mini Connectors
Up to 52 amps

SBS® Mini Connector series is our smallest DC power connector in the SBS® group. The SBS® Mini securely holds two crimp and poke contacts with sacrificial tips to enable hot swap capabilities on DC circuits. The low resistance contacts accept 20 to 10 AWG (0.52 to 5.3 mm²) wires allowing up to 52 amps of UL rated performance per position.

- **Touch Safe Housing**
  Minimizes potential contact with live circuits
- **Color-Coded Mechanical Key**
  Prevents accidental mating of connectors operating at different voltage levels
- **Compact & Ergonomic Housing**
  Is "user friendly" during connection and disconnection of the system
- **UL Hot Plug Rated to 45 Amps @ 72 Volts**
  Good for applications where the ability to interrupt circuits is required

SBS® MINI ORDERING INFORMATION

SBS® Mini Housing

The smallest SBS® connector has 2 finger proof positions in a polycarbonate housing with an ergonomic grip. The housing securely holds crimp and poke contacts from the popular Powerpole® 15/45 series connectors.

ANDERSON POWER™

SBS® Connectors

Up to 110 amps

SBS® 75G

SBS® 50

SBS® 75X

The patented SBS® connector family is designed to provide high power in a compact ergonomic housing with protection against accidental contact with live circuits. This is of particular importance in applications where DC voltages exceed 30 volts and can be health threatening.

Wire-to-wire and wire-to-board configurations both provide power contacts rated up to 110 amps. The SBS® 75X offers up to 4 mate-last break-first auxiliary power / signal contacts rated up to 20 amps. The SBS® 75G features a third first-mate last-break ground or power contact. All contact positions are rated for circuit interruption (hot plugging).

• Touch Safe Interface
Can safely be used in through panel applications
Minimizes potential contact with live circuits per IEC 60950

• Wire-to-Wire and Wire-to-Board Configurations
Allows one connector to meet multiple needs

• Ground or Auxiliary Positions Integrated into the One Piece Housing
Meets all connection requirements in one compact connector housing

SBS® ORDERING INFORMATION

SBS® 50 Standard Housings

Polycarbonate housings feature 2 positions all finger proof. Genderless design mates with itself. Mechanical keys are color coded.

Description	Part Numbers	
Minimum Quantity	500	50
Red	SBS50RED-BK	SBS50RED

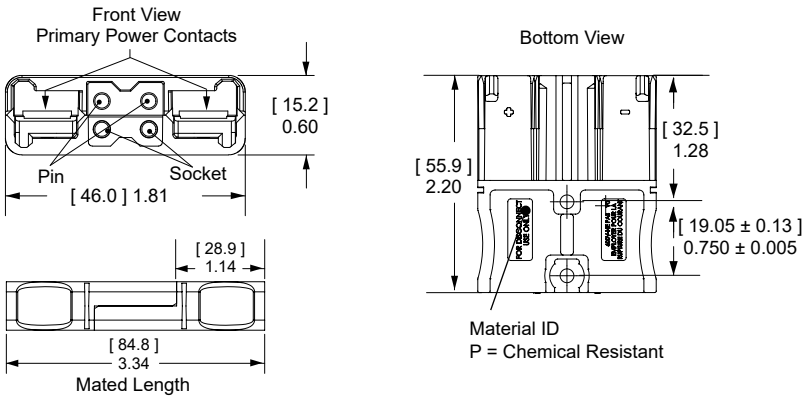
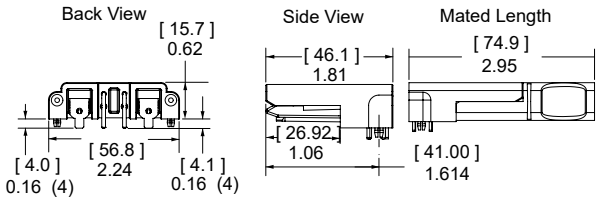
Standard and Chemical Resistant Housing Dimensions



SBS® 75X Assembled PCB Connector

Fully assembled PCB connector is designed to mate with SBS® 75X Wire connector only. All positions are preloaded with contacts including standard mating length auxiliary positions. Press fit board locks help secure the connector to the PCB before and after soldering. Choose between tin or silver contacts.

Description	Part Numbers	
Minimum Quantity	250	100
Black - Tin Contact	-	SBS75XPRBLK-BK
Black - Silver Contact	SBS75XPRSBLK-BK	-

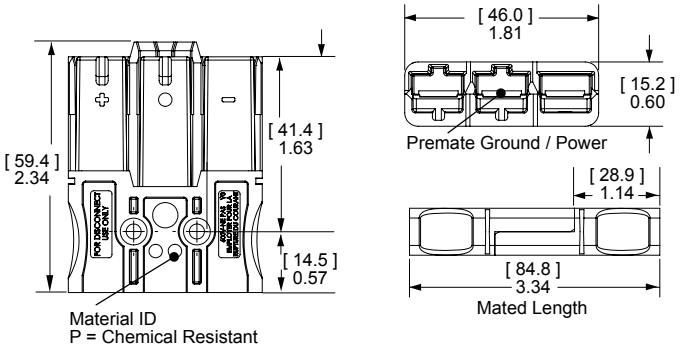


See PCB connector drawing on website for further detail.

SBS® 75G Wire Housings

Polycarbonate housings feature three finger proof positions. The center position can be used for pre-mate power or ground. Genderless design mates with itself, or the PCB connector. Mechanical keys are color-coded. Inquire with customer service for chemical resistant housings.

Description	Part Numbers	
Minimum Quantity	250	50
Blue	SBS75GBLU-BK	SBS75GBLU
Black	SBS75GBLK-BK	SBS75GBLK
Brown	SBS75GBRN-BK	SBS75GBRN
White	SBS75GWHT-BK	SBS75GWHT

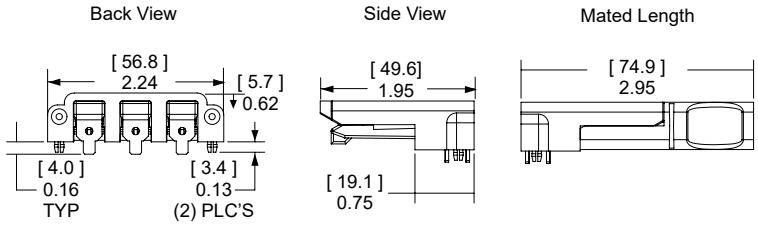


SBS® 75G Assembled PCB Connector

Fully assembled PCB connector is designed to mate with SBS® 75G Wire connector only. Has press fit board locks to help secure the connector to the PCB before and after soldering.

Description	Part Number
Minimum Quantity	100
Black	SBS75GPRBLK-BK

See PCB connector drawing on website for further detail.

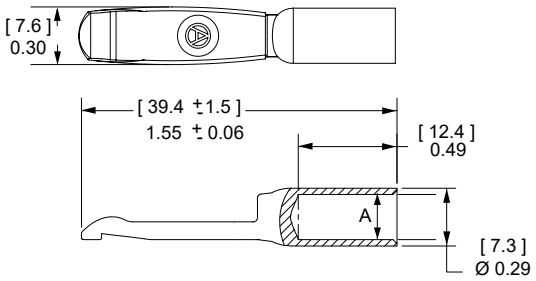


SBS® Silver Plated Primary Power Wire Contacts

Use two silver plated contacts per housing for the best electrical performance and durability up to 10,000 mating cycles. Standard contacts are for use in all primary power positions for SBS® 50, 75X, & 75G wire housings. See reducing bushings in accessory section for smaller wires.

Type	AWG	mm²	Loose Piece Part Numbers		Dimensions - A - inches	mm
Minimum Quantity			1,000	100		
Standard	6	16	1339G2-BK	1339G2 *	0.22	5.60
Standard	8	10	1339G5-BK	1339G5 *	0.19	4.70
Standard	12 to 10	2.5 to 6	1339G3-BK	1339G3 *	0.14	3.50

* Are sold as pairs. 2 contacts ship for every 1 ordered.



SBS® 75G Silver Plated Pre-Mate Wire Contacts

Pre-Mate contacts used for power or ground are for the center Pre-Mate position on the SBS®75G wire housings. See reducing bushings in accessory section for smaller wires.

Type	AWG	mm²	Loose Piece Part Numbers		Dimensions - A - inches	mm

c UL us File No. E26226 CSA Certified File No. LR25154

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA rating below a 30°C temperature rise. EN1175-1 : 1998 + A1 is tested solely to annex A for chemical resistance housings only. To be installed according to the manufacturers instructions.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Auxiliary contacts are available for SBS®75X only. Ground contacts are for SBS®75G series.

4 - SBS® 75X and SBS® 75G PCB connectors are designed to mate only with the wire connector of the same series.

5 - See IEC 60950-1 for working voltage.

6 - Amp ratings are stated per position and based on all positions being fully loaded.

7 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

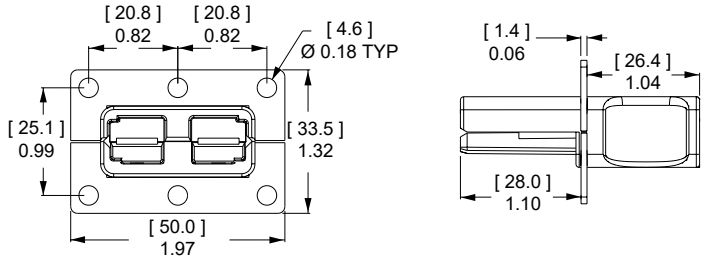
SBS® ACCESSORIES

Mounting Clamp for SBS® 50 *

Mounting clamps can be used for fastening a SBS® 50 series housings to a panel. Fastening hardware not included.

Description	Part Number
Minimum Quantity	20 sets of 2
Panel Mount Bracket for SBS® 50	1466G1

* Torque value 5 (in - lbs) / 0.56 (Nm)

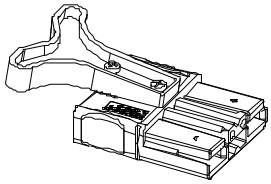


T-Handles for SBS® 50 and SBS® 75X *

The "T" handles make mating and unmating the connector easier. The non-conductive polycarbonate or chemical resistant PBT red plastic material is strong and safe.
(2) Self tapping screws are used to secure the handle to the connector housing.

Description	Part Numbers	
Minimum Quantity	1,000	50
Red "T" Handle + Hardware Bag	-	SBS50-HDL-RED
Hardware Bag (2 Screws)	-	104G17
Red "T" Handle Only	113899P1	-
PBT SBS50 "T" Handle, Red	113899P2	-
#8 x 5/8" Screw (Order 2 Per Handle)	H1120P55	-
PBT SBS® 50 Handle, Red + Hardware	-	PSBS50-HDL-RED

* Torque value 10 (in - lbs) / 1.13 (Nm)

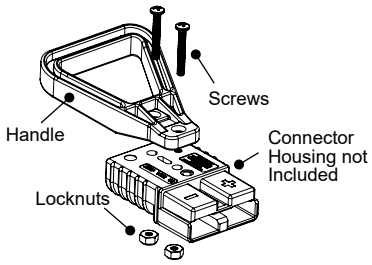


"A" Frame Handle for SBS® 50 and SBS® 75X *

Handle makes mating and unmating the connector easier. The non-conductive gray plastic material is strong and safe. Machine screws and locknuts included.

Description	Part Number
Minimum Quantity	200
Gray "A" Handle & Hardware	997G1

* Torque value 12 (in - lbs) / 1.4 (Nm)

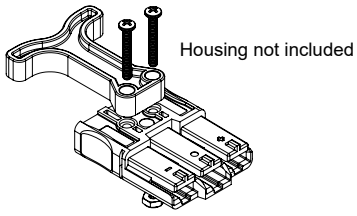


T-Handle for SBS® 75G *

The "T" handle makes mating and unmating the connector easier. The non-conductive red plastic material is strong and safe. (2) Machine screws and lock nuts.

Description	Part Number
Minimum Quantity	50
Red "T" Handle + Hardware Bag	SBS75GHDLRED

* Torque value 10 (in - lbs) / 1.13 (Nm)



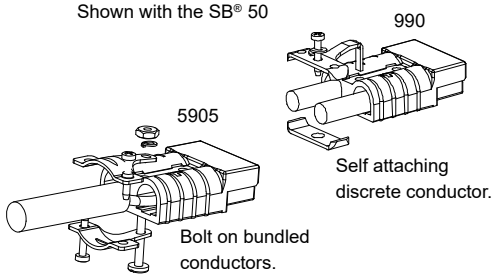
Cable Clamps for SBS® 50 *

Durable metal cable clamps securely hold cables to prevent accidental strain or pulls from dislodging wire or contacts from the housing. Cable clamps are recommended for solder terminated wires. Hardware is included with the cable clamps.

Description	Cable Size AWG or (Inches O.D.) *	Cable Size mm² or (mm O.D.) *	Part Numbers	
Minimum Quantity			500	50
Self Attaching for Discrete Conductor	8 to 6	10	990-BK	990
Self Attaching for Discrete Conductor	12 to 10	2.5 to 4	990G2-BK	990G2
Bolt On for Discrete Conductor	12 to 6	2.5 to 10	990G1-BK	990G1
Bolt On for Bundled Conductor	0.320 to 0.450	4.27 to 11.43	5905-BK	5905

* Torque value 12 (in - lbs) / 1.4 (Nm) *NOTE: For assembly of clamp to housing only*

The given wire O.D. information is an estimate. Cable clamps should be evaluated for performance with the actual wire to be used.

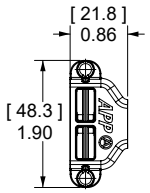


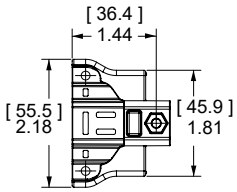
Cable Clamps for SBS® 75X with Integral Handle *

Rugged chemical resistant PBT/ PC plastic cable clamps securely hold cables to prevent accidental strain or pulls from dislodging wire or contacts from the housing. Cable clamps are recommended for solder terminated wires.

Description	Cable Size AWG or (Inches O.D.) **	mm² or (mm O.D.) **	Part Numbers	
Minimum Quantity			100	25
Large Wire Clamp Kit w/ Hardware	12 to 6 (0.39 to 0.60)	4 to 10 (9.9 to 15.2)	PSBS75XCLP1-BK	PSBS75XCLP1
Small Wire Clamp Kit w/ Hardware	12 to 6 (0.34 to 0.55)	4 to 10 (8.6 to 14.0)	PSBS75XCLP2-BK	PSBS75XCLP2

* Torque value 5 (in - lbs) / 0.56 (Nm).
** The given wire O.D. information is an estimate. Cable clamps should be evaluated for performance with the actual wire to be used.





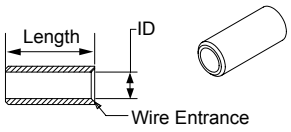
Clamp hardware requires phillips or flat blade screwdriver to assemble.

Silver Plated Reducing Bushings

Use with contact part number 1339G2-BK or 1340G1-BK to allow a smaller wire to be used with the connector. Electrical capability is derated with smaller wire.

Contact Barrel Size AWG	Contact Barrel Size mm²	Wire Size AWG	Wire Size mm²	Dimensions Part Numbers			- ID - inches	- ID - mm	- Length - inches	- Length - mm
Minimum Quantity				3,000	1,000	100				
6	13.3	8	8.4	-	5912-BK	5912	0.18	4.6	0.45	11.4
6	13.3	12 to 10	3.3 to 5.3	5910-BK	-	5910	0.14	3.6	0.47	11.9
6	13.3	16 to 14	1.3 to 2.1	5913-BK	-	5913	0.09	2.3	0.47	11.9

See drawings on website for further detail

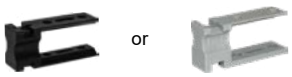


Plastic Cable Clamp

These rugged cable clamps are manufactured out of non-conductive, impact resistant Polycarbonate plastic. The design is simple to assemble, offer versatility by accommodating multiple wire sizes, and a solution for two wire clamping applications.

Description	Part Number	Quantity
* SB50 Plastic Cable Clamp Kit (includes ties and screws), Black	B02644GKIT1	1
* SB50 Plastic Cable Clamp Only, Black	B02644P1	1,000
* SBS50 Plastic Cable Clamp Kit (includes ties and screws), Gray	B02647GKIT1	1
* SBS50 Plastic Cable Clamp Only, Gray	B02647P1	1,000
Wire Ties Used With Both SB50 and SBS50 Clamps 3/16 in x 7 in (4.8mm X 178mm)	H1835P3	1,000
Screws Used With Both SB50 and SBS50 Clamps - M4 X 8mm	H1120P60	1,000

Cable Clamp Kit Includes
1 Clamp, 4 Screws and 1 Cable Tie



** 

* It is important to note that the SB50 and SBS50 Clamps vary to fit the unique features of the SB50 and SBS50

** 1,000 clamps purchased in bulk, requires 4,000 screws

SB® 50 Connectors

Up to 120 amps

Based off the design pioneered by Anderson™ in 1953, the two pole SB® connectors set the standard for DC power distribution and battery connections. SB® 50 connectors feature a one piece plastic housing using stainless steel springs to hold low resistance contacts in place. Wires sizes from 16 to 6 AWG (1.5 to 16 mm²) are held in the smallest of the SB® series housings.

- **Low Resistance Silver or Tin Plated Copper Contacts**
  Allows UL rated currents up to 120 amps
- **UL Rated for Hot Plugging up to 50 Amps**
  Great for battery or other applications where the ability to interrupt circuits is required
- **Wire, PCB, and Busbar Contacts**
  Allows one connection system to meet multiple needs

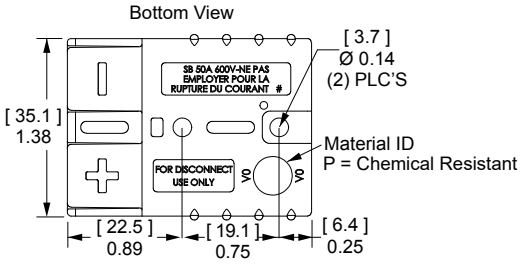
SB® 50 ORDERING INFORMATION

SB® 50 Standard Housings

The smallest SB® housings work with wire contacts up to 6 AWG (16 mm²) as well as PCB, and busbar contacts. Genderless design mates with itself. Mechanical keys are color-coded.

Description	Part Numbers	
Minimum Quantity	500	100
Yellow	992G5-BK	992G5
Orange	992G7-BK	992G7
Red	992G1-BK	992G1
Gray	992-BK	992
Blue	992G4-BK	992G4
Green	992G6-BK	992G6
Black	992G2-BK	992G2

NOTE: SB® 50 Black and Gray housings have the same keying features and can be intermated.

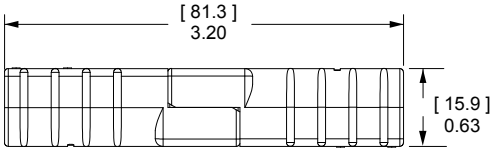


SB® 50 Chemical Resistant Housings

Same features as the Standard SB® 50 but molded in a chemical resistant PBT/PC blend. Suitable for use to -40°C.

Description	Part Numbers	
Minimum Quantity	500	100
Red	P992G1-BK	P992G1
Gray	P992-BK	P992
Black	P992G2-BK	P992G2

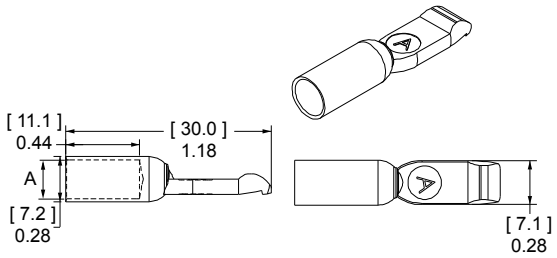
NOTE: SB® 50 Black and Gray housings have the same keying features and can be intermated.



SB® 50 Silver Plated Wire Contacts

Use two silver plated contacts per housing for the best electrical performance and durability up to 10,000 mating cycles. See reducing bushings in accessory section for smaller wires.

AWG	mm²	Mating Force	Loose Piece Part Numbers		Dimensions - A - inches	mm
Minimum Quantity			1,000	100		
6	16	Low	1307-BK	1307	0.22	5.59
6	16	High	5900-BK	5900	0.22	5.59
8	8.4	High	5952-BK	5952	0.19	4.83
12 to 10	4 to 6	Low	5953-BK	5953	0.14	3.56
12 to 10	4 to 6	High	5915-BK	5915	0.14	3.56



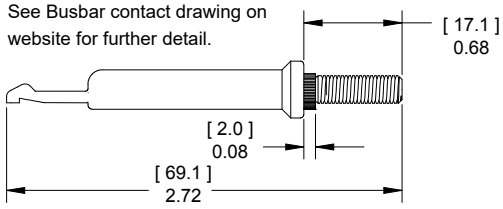
SB® 50 Silver Plated Busbar Contacts

Use 2 busbar contacts per housing to provide a quick disconnect input or output busbar connection. Busbar contacts are for mating with wire contacts only. Part number 75BBS includes lock nuts. Locknuts must be ordered separately for B01915P1.

Type	Thread	Mating Force	Loose Piece Part Numbers	
Minimum Quantity			1,000	20
Busbar	10 to 24	High	B01915P1	75BBS
Lock Nut	10 to 24	-	H1216P8	-

NOTE: Has not been tested by UL.

See Busbar contact drawing on website for further detail.



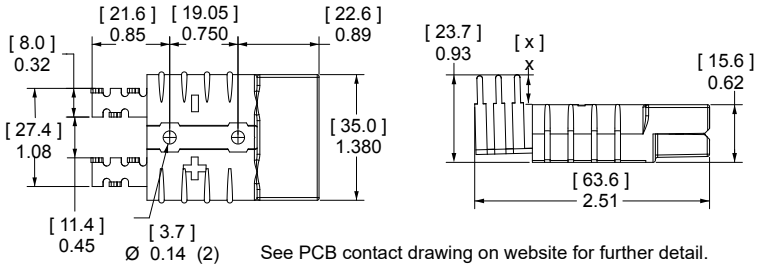
55A Right Angle Standard Powerclaw PCB Contacts

Standard Powerclaw contacts are for use inside a SB® 50 housing and provide a color-coded right angle connection to the PCB.

Description	Loose Piece Part Numbers	
Minimum Quantity	500	100
Tin Plated	PC5930T-BK	PC5930T
Silver Plated	PC5930S-BK	PC5930S

Top View

Side View

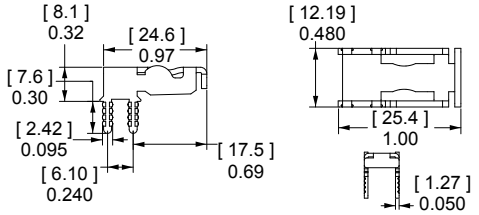


See PCB contact drawing on website for further detail.

55A Right Angle Mini Powerclaw PCB Contacts

Right angle Mini Powerclaw contacts can be used on the PCB edge without a SB® 50 housing on the PCB side. A self polarizing design only allow SB® 50 wire housings to mate to PCB contacts one way.

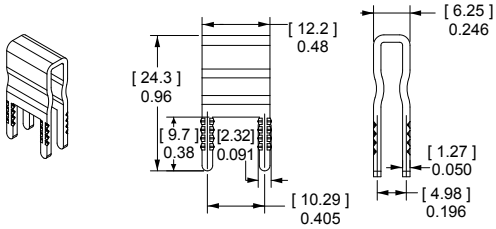
Description	Loose Piece Part Numbers	
Minimum Quantity	1,000	100
Tin Plated	PC5934T-BK	PC5934T
Silver Plated	PC5934S-BK	PC5934S



55A Vertical Mini Powerclaw PCB Contacts

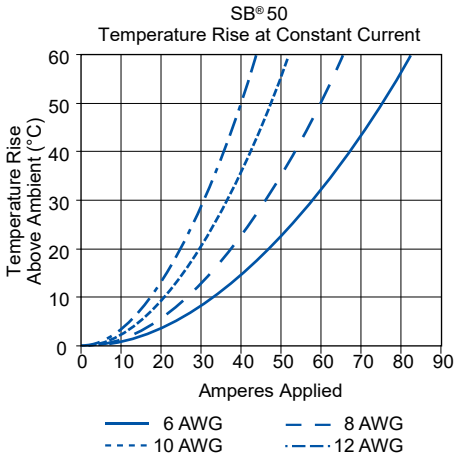
Vertical Mini Powerclaw contacts save space by not requiring a SB® 50 housing on the PCB side. The guide housing is required for to provide a polarized connection. (See SB® 50 accessories).

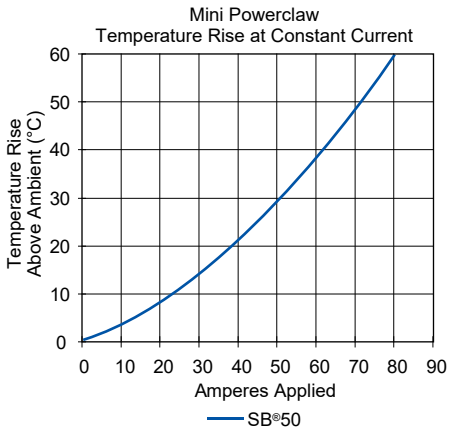
Description	Loose Piece Part Numbers	
Minimum Quantity	1,500	100
Tin Plated	PC5933T-BK	PC5933T
Silver Plated	PC5933S-BK	PC5933S

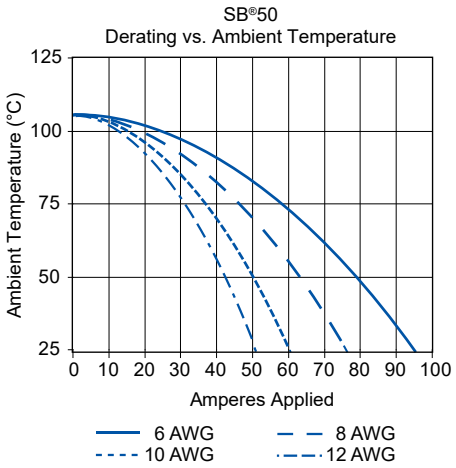


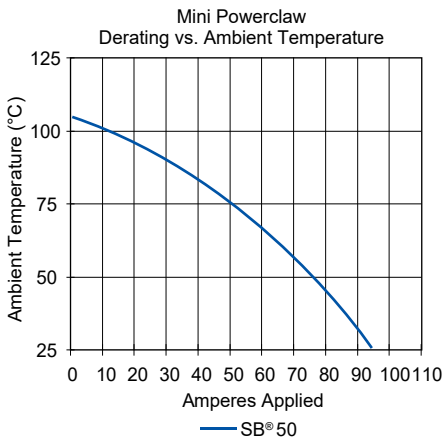
SB® 50 CONNECTOR TEMPERATURE CHARTS - Temperature rise charts are based on a 25°C ambient temperature.

Current - Temperature Derating per IEC 60512-5-2 Test 5B









NOTE: Powerclaw charts are based on 8 AWG equivalent copper foil on board side, mated to 6 AWG conductor on wire side.

NOTE 1: See IEC 60664-1 for working voltage.

NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA rating below a 30°C temperature rise.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

4 - Tested with contact part number 5900.

** UL Rated for 65°C largest wire or cable size.*

ANDERSON POWER™

SB® 120 Connectors

Up to 240 Amps

Like the other Multipole connectors, the SB® 120 offers color-coded mechanically keyed housings. Keys can be used to identify and separate different circuits, or prevent users from accidentally cross mating different voltages. Wires sizes from 10 to 1 AWG (5.3 to 42.4 mm²) are held in the second smallest SB® housing.

- **Extended Range Contacts Expand Wire Size up to 1 AWG (42.4 mm²)**
  Allows UL rated currents up to 240 amps
- **Chemical Resistant Housing Option**
  Extends temperature range down to -40°C, while offering enhanced UV and chemical resistance
- **Panel Mounting Grooves**
  With use of mounting clamps, can be easily mounted through panels

SB® 120 ORDERING INFORMATION

SB® 120 Standard Housings

The second to smallest SB® housings work with wire contacts up to 1 AWG (42.4 mm²) as well as busbar contacts. Genderless design mates with itself. Mechanical keys are color-coded.

Description	Part Numbers	
Minimum Quantity	250	50

ANDERSON POWER™

SB® 175 Connectors

Up to 280 Amps

Wires sizes from 10 to 1/0 AWG (5.2 to 53.4 mm²) fit in the second to largest connector in the SB® series. The 3 pole SB® 175 adds an additional position for power or grounding. All Multipole wire connector housings are genderless and mate to themselves minimizing inventory and assembly complexity.

- **Silver Plated Wire Contacts up to 1/0 (53.4 mm²)**
  Allows UL rated currents up to 280 amps
- **Chemical Resistant Housing Option**
  Extends temperature range down to -40°C, while offering enhanced UV and chemical resistance
- **UL Rated for Hot Plugging up to 100 Amps**
  Great for battery or other applications where the ability to interrupt circuits is required

SB® 175 ORDERING INFORMATION

SB® 175 Standard Housings

The second to largest SB® housings work with wire contacts up to 1/0 AWG (53.4 mm²) as well as busbar contacts. Genderless design mates with itself. Mechanical keys are color-coded. *NOTE: SB® 175 black housing is keyless and can be mated with all other colors.*

NOTE 1: See IEC 60664-1 for working voltage.

NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA rating below a 30°C temperature rise.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

4 - Tested with contact part number 1382.

ANDERSON POWER™

SB® 350 Connectors

Up to 500 Amps

The SB® 350 is the largest connector in the series with power capabilities up to 500 amps with a 350 mcm wire. Wires ranging from 1/0 to 350 mcm (53.5 to 185 mm²) fit into the one piece housing available in standard PC or a chemical resistant PBT/PC blend. Silver plated wire or busbar contacts minimize electrical resistance while offering supreme durability and reliability.

- **Up to 350 mcm (185 mm²) Wires**
  Allows UL rated currents up to 500 amps
- **Chemical Resistant Housing Option**
  Extends temperature range down to -40°C, while offering enhanced UV and chemical resistance
- **Same Housings Used for Wire and Busbar Contacts**
  Enables color-coded mechanically keyed wire to busbar connections

SB® 350 ORDERING INFORMATION

SB® 350 Standard Housings

The largest SB® housings work with wire contacts up to 350 mcm (150 mm²) as well as busbar contacts. Genderless design mates with itself. Mechanical keys are color-coded. NOTE: SB® 350 Black and Blue Housings have the same keying features and can be intermated.

* Torque value 50 (in - lbs) / 5.6 (Nm)

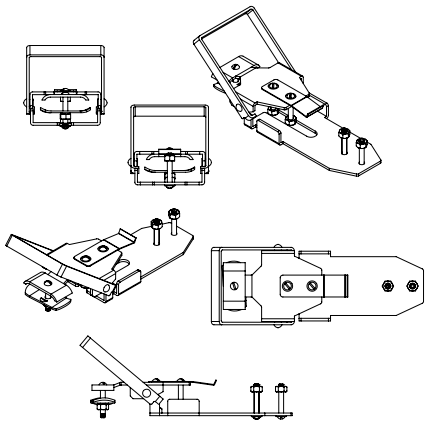
NOTE: For assembly of bracket to housing only

The given wire O.D. information is an estimate. Cable clamps should be evaluated for performance with the actual wire to be used.



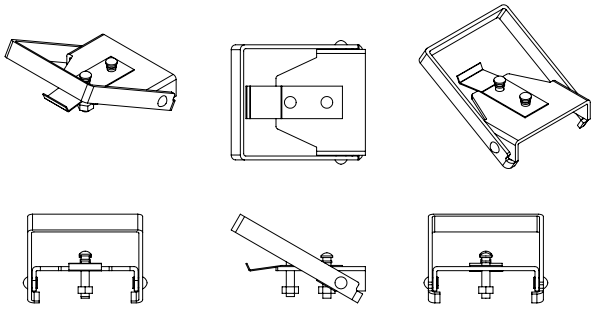
Manual Release Bracket - Locking Side no Cable Clamp *

Works with the Battery side to ease mating and unmating connectors.

Description	Part Number
Minimum Quantity	10
Bracket and Hardware Kit No Clamp Kit	919G1

* Torque value 50 (in lbs) / 5.6 (N - M)

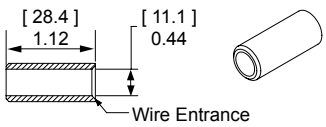
NOTE: For assembly of bracket to housing only



Silver Plated Reducing Bushings: for use with Contact Part Number 907

Use with contact part number 907-BK to allow a smaller wire to be used with the connector. Electrical capability is derated with smaller wire.

Contact Barrel Size AWG	mm	Wire Size AWG	mm²	Part Numbers	
Minimum Quantity				500	100
2/0	67.4	1/0	53.5	5918-BK	5918



Double Stacked Manual Assist Brackets

The robust frames ensure connector alignment and provide the ability to mount the truck/charger bracket assembly. The brackets include an ergonomic handle that reduces the operator effort required for mating and unmating the connectors. This ensures complete engagement of mated pairs reducing the possibility of shorts or disconnects.

SBE® 80 / SBO® 60 Connectors

Up to 80 Amps

SBE® and SBO® connectors build on the capability of the two pole SB® connectors by offering up to 8 auxiliary power / signal contacts along with an IEC 60950 touch safe housing. The center of the main connector features a connector holder for either: two PP15/45, two PPMX, or APP's innovative 1x4 auxiliary connector.

- **Meets EN1175:2020**
- **Touch Safe Interface**
  Minimizes potential contact with live circuits per IEC 60950
- **Up to 8 Last Mate / First Break Auxiliaries**
  Enables intelligent power switching, CAN and interlock loop circuitry, as well as power up to 20 amps per pole
- **Silver Plated Wire Contacts up to 4 (25 mm²)**
  Allows UL rated currents up to 80 amps per pole

SBE® 80 / SBO® 60 ORDERING INFORMATION

SBE® 80 / SBO® 60 Housings

The smallest size of SBE®, X, O style housing. SBE® 80 and SBO® 60 housings of the same Voltage Color-Code can be mated but is not recommended as it invalidates UL approvals for SBO® 60. SBO® 60 housings do not meet EN1175:2020 requirements for industrial trucks.

c UL us File No. E26226

NOTE 1: See IEC 60664-1 for working voltage.
NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.
1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature.
UL rating not to exceed the maximum operating temperature. CNR rating below a 30°C temperature rise. Only SBO® 60 has UL recognition.
2 - Limited by the thermal properties of the connector plastic housing.
3 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.
4 - Voltage capability of SBE® housings is identical to SBO®, but derated to meet EN1175:2020 requirements.

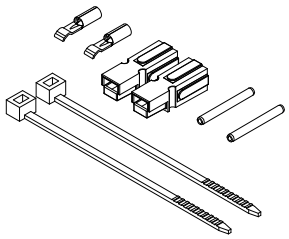
* Torque value 12 (in - lbs) / 1.4 (Nm)

NOTE: For assembly of clamp to housing only

Powerpole® Auxiliary

Powerpole® auxiliary connectors are rated up to 30 amps 600 volts and can be used for auxiliary power, control or sensing. The auxiliary kit includes (1) each black and red Standard Powerpole® housing, (2) contacts, (2) zip cable straps, and (2) retaining pins.



Description	Part Numbers

16 to 12 Contact	1331	-
Retaining Pin	-	-

NOTE: Finger proof PP15/45 housings should not be used for auxiliary contacts.

1x4 Auxiliary Connector

The unique 1x4 auxiliary connector allows up to 4 auxiliary circuits up to 20 amps 200 volts each in SBE®, SBO®, & SBX® housings. The genderless design holds two each of the gold plated pin & socket contacts. This innovation allows the very durable and cost effective design of SBE®, O, X connectors to substitute for DIN 43589-1 applications where 4 auxiliary contacts are required. Multiple pin lengths allow the further benefit of sequencing between circuits. (2) Retaining pins are required to hold the auxiliary housing in place. Auxiliary Kits include (1) Auxiliary Housing, (2) Standard Length Pin Contacts, and (2) Socket Contacts, (2) Retaining Pins and (1) Retaining Clip.

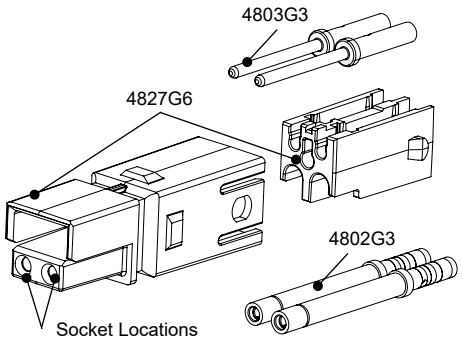
PPMX Auxiliary Connector

The PPMX auxiliary connector allows up to 8 auxiliary circuits to be used in the SBE®, SBO®, & SBX® housings. There are 4 auxiliary circuits per PPMX connector and two PPMX housings fit into the auxiliary port in the main connector housing. Rated up to 7 amps 300 volts per contact, the genderless design holds two each gold plated pin & socket contacts. This innovation allows the very durable and cost effective equipment design of SBE®, O, X connectors to be used for applications requiring up to 8 battery monitoring or vehicle communication circuits. (2) Retaining pins or (1) Retaining clip is required to hold the auxiliary housing in place.

Auxiliary Kits include (1) Auxiliary Housing, (2) Pin Contacts, and (2) Socket Contacts.

Description	AWG	mm²	Part Numbers		
Minimum Quantity			1,000	100	25
PPMX Auxiliary Kit	24 to 20	0.50 to 0.25	-	4850G6	-
1x4 Auxiliary Housing	Contacts Sold Separately		4827G6-BK	-	4827G6

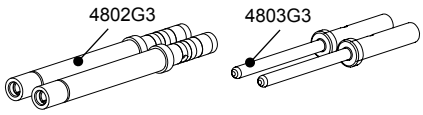
* No extraction tool required for contact removal.



Pin & Socket Contacts for PPMX Auxiliary Connector

Gold plated contacts are ideal for signal or low power use with durability up to 5,000 mating cycles.

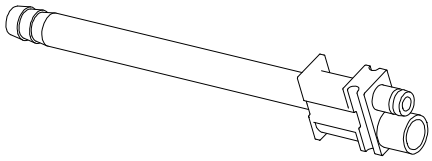
Description	AWG	mm²	Part Numbers	
Minimum Quantity			2,000	50
Pin Contacts	24 to 20	0.50 to 0.25	4803G3-BK	4803G3
Socket Contacts	24 to 20	0.50 to 0.25	4802G3-BK	4802G3



NOTE: Contacts sold individually, not sold as a set of two.

SBE® Air Tubes

Air tubes fit into SBE® housings to allow electrolyte circulation while charging the battery. Genderless tube design allows the same part to be used on both sides. (2) Spriol pins or (2) Retaining Pins are required to hold the air tube in place, both are included in Air Tube Kit.



Description	Part Numbers	
Minimum Quantity	500	25
Air Tube Kit, Black	-	6396G1
Air Tube Only	3-5798P1	-

Retaining Pins

Retaining pins are used to hold accessories in the auxiliary port in SBE®, SBO®, & SBX® housings. Dimension "B" is +/- 0.015 in or 0.38 mm.

SBE® 160 / SBX® 175 Connectors

Up to 280 Amps

SBE® 160

SBX® and SBE® connectors can integrate up to 8 auxiliary power / signal contacts along with the two primary power circuits. SBE® connectors feature an IEC 60950 touch safe housing molded from a chemical resistant PBT / PC blend resin. SBX® are molded from a rugged PC resin and are rated IP20 per IEC 60529.

- **Meets EN1175:2020**
- **Touch Safe Interface**
  Minimizes potential contact with live circuits per IEC 60950 & IEC 60529
- **Up to 8 Last Mate / First Break Auxiliaries**
  Enables intelligent power switching, CAN and interlock loop circuitry, as well as power up to 20 amps per pole
- **Color-coded Mechanical Voltage Keys**
  Like all Multipole connectors, the SBE® and SBX® offer an easy way to identify circuits and protect against cross mating

SBE® 160 / SBX® 175 ORDERING INFORMATION

SBE® 160 / SBX® 175 Housings

The middle size of SBE®, X, O style housing. SBE® housings are molded from a chemical resistant PBT. SBX® housings are molded from PC. SBE® 160 and SBX® 175 housings of the same Voltage Color-Code can be mated (except yellow) but is not recommended as it invalidates UL approvals. SBX® 175 housings do not meet EN1175:2020 requirements for industrial trucks.

c UL us File No. E26226

NOTE 1: See IEC 60664-1 for working voltage.

NOTE 2: Amp ratings are stated per position and based on all positions being fully loaded.

1 - Based on: 105°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling, and a 25°C ambient temperature. UL rating not to exceed the maximum operating temperature. CSA Rating below a 30°C temperature rise.

2 - Limited by the thermal properties of the connector plastic housing.

3 - Use Anderson Power™ recommended tooling only. Alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

4 - Voltage capability of SBE® housing is identical to SBX®, but derated to meet EN1175:2020 requirements.

Powerpole® Auxiliary

Powerpole® auxiliary connectors are rated up to 30 amps 600 volts and can be used for auxiliary power, control or sensing. The auxiliary kit includes (1) each black and red Standard Powerpole® housing, (2) contacts, (2) zip cable straps, and (2) retaining pins. (1) Retaining clip can be Substituted for (2) retaining pins.

Red Powerpole® Housing	1327	-
16 to 12 AWG Contact	1331	-

NOTE: Finger proof PP15/45 housings should not be used for auxiliary contacts.

1x4 Auxiliary Connector

The unique 1x4 auxiliary connector allows up to 4 auxiliary circuits up to 20 amps 150 volts each in SBE®, SBO®, & SBX® housings. The genderless design holds two each of the gold plated pin & socket contacts. This innovation allows the very durable and cost effective design of SBE®, O, X connectors to substitute for DIN 43589-1 applications where 4 auxiliary contacts are required. Multiple pin lengths allow the further benefit of sequencing between circuits. (2) Retaining pins or (1) Retaining clip is required to hold the auxiliary housing in place. Auxiliary Kits include (1) Auxiliary Housing, (2) Standard Length Pin Contacts, (2) Socket Contacts, (2) Retaining Pins and (1) Retaining Clip.

PPMX Auxiliary Connector

The PPMX auxiliary connector allows up to 8 auxiliary circuits to be used in the SBE®, SBO®, & SBX® housings. There are 4 auxiliary circuits per PPMX connector and two PPMX housings fit into the auxiliary port in the main connector housing. Rated up to 7 amps 300 volts per contact, the genderless design holds two each gold plated pin & Socket contacts. This innovation allows the very durable and cost effective design of SBE®, O, X connectors to be used for applications requiring up to 8 battery monitoring or equipment vehicle communication circuits. (2) Retaining pins or (1) Retaining clip is required to hold the auxiliary housing in place.

Auxiliary Kits includes: (1) Auxiliary Housing, (2) Pin Contacts, and (2) Socket Contacts.

SBE® 320 / SBX® 350 Connectors

Up to 550 Amps

SBE® and SBX® connectors can integrate up to 8 auxiliary power/ signal contacts along with the two primary power circuits. Sequencing within auxiliary positions is possible using the 4 pin lengths available in the 1x4 auxiliary connector. SBE® and SBX® offer touch safe housings.

- **Meets EN1175:2020**
- **Silver Plated Wire Contacts up to 350 mcm (185 mm²)**
  Allows low resistance UL rated currents up to 550 amps per pole
- **Up to 8 Auxiliaries**
  Enables intelligent power switching, CAN and interlock loop circuitry, as well as power up to 20 amps per pole. Auxiliaries are all Last-mate/ First-break relative to power contacts.

SBE® 320 / SBX® 350 ORDERING INFORMATION

SBE® 320 / SBX® 350 Housings

The largest size of SBE®, X, O style housing. SBE® housings are molded from a chemical resistant PBT. SBX® housings are molded from PC. SBE® 320 and SBX® 350 housings of the same Voltage Color-Code cannot be mated. SBX® 350 housings do not meet EN1175:2020 requirements for industrial trucks.

IEC 60950	SBE® 320 Only	Pass
IEC 60529	SBE® 320 & SBX® 350	IP20

Note 1: See IEC60664-1 for working voltage

Note 2: Amp ratings are stated per position and based on all positions being fully loaded

1 - Based on 195°C rated or better cable of the largest size. Properly calibrated Anderson Power™ recommended tooling and 25°C ambient temperature

2 - limited by thermal properties of the connector plastic housing

3 - USE Anderson Power™ recommended tooling only. Alternate tools may adversely affect performance of our connectors along with UL and CSA recognition

4 - Voltage capability of SBE® housings is identical to SBX® but derated to meet EN1175-1 requirements

** Refer to assembly instructions for using 300 MCM and 350 MCM wire*

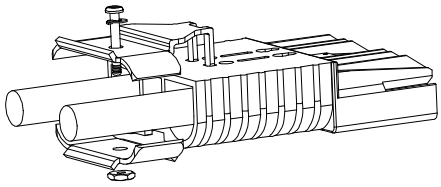
SBE® 320 / SBX® 350 ACCESSORIES

Cable Clamps

Durable metal clamps adapt to a wide range of cable sizes. Cable clamp kit includes clamp top and bottom as well as the hardware bag.

Description	Cable Size Min / Max Inches O.D.	Cable Size Min / Max mm O.D.	Part Number
Minimum Quantity			25
Cable Clamp Kit	0.85 to 0.67	21.6 to 17.1	911G2

The given wire O.D. information is an estimate. Cable clamps should be evaluated for performance with the actual wire to be used.



Handles *

Handles are made out of durable PC plastic. Hardware to attach to connector body included in kits.

Description	Part Numbers

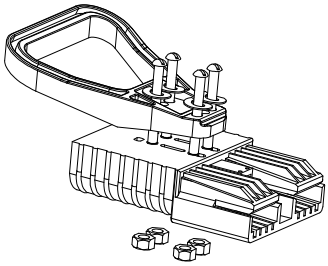
Hardware Bag	-	106G7

* Torque value 50 (in - lbs) / 5.6 (Nm)

NOTE: For assembly of clamps to housing only



Powerpole® Auxiliary

Powerpole® auxiliary connectors are rated up to 30 amps 600 volts and can be used for auxiliary power, control or sensing. The auxiliary kit includes (1) each black and red standard Powerpole® housing, (2) Contacts, (2) Zip Cable Straps, and (2) Retaining Pins. (1) Retaining Clip can be substituted for (2) Retaining Pins.

Description	Part Numbers	
Minimum Quantity	200	25

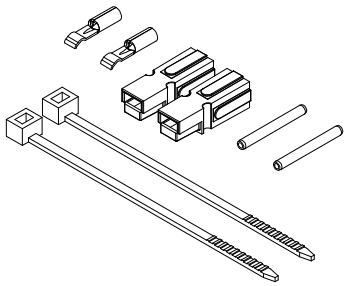
20 to 16 AWG Contact	1332	-

NOTE: Finger proof PP15/45 housings should not be used for auxiliary contacts.



1x4 Auxiliary Connector

The unique 1x4 auxiliary connector allows up to 4 auxiliary circuits up to 20 amps 150 volts each in SBE®, SBO®, & SBX® housings. The genderless design holds two each of the gold plated pin & socket contacts. This innovation allows the very durable and cost effective design of SBE®,O, X connectors to substitute for DIN 43589-1 applications where 4 auxiliary contacts are required. Multiple pin lengths allow the further benefit of sequencing between circuits. (2) Retaining Pins or (1) Retaining Clip is required to hold the auxiliary housing in place. Auxiliary Kits include (1) Auxiliary Housing, (2) Standard Length Pin Contacts, (2) Socket Contacts, (2) Retaining Pins and (1) Retaining Clip.

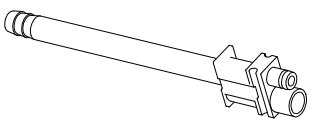
SBE® Air Tubes

Air tubes fit into SBE® housings to allow electrolyte circulation while charging the battery. Genderless tube design allows the same part to be used on both sides. (2) Retaining Pins or (2) Spirol pins are required to hold the air tube in place both are included in Air Tube Kit.

Description	Part Numbers	
Minimum Quantity	500	25
Air Tube Kit, Black	-	6396G1
Air Tube Only	3-5798P1	-



PPMX Auxiliary Connector

The PPMX auxiliary connector allows up to 8 auxiliary circuits to be used in the SBE®, SBO®, & SBX® housings. There are 4 auxiliary circuits per PPMX connector and two PPMX housings fit into the auxiliary port in the main connector housing. Rated up to 7 amps 300 volts per contact, the genderless design holds two each gold plated pin & socket contacts. This innovation allows the very durable and cost effective design of SBE®, O, X connectors to be used for applications requiring up to 8 battery monitoring or equipment vehicle communication circuits. (2) Retaining Pins or (1) Retaining Clip is required to hold the auxiliary housing in place.

Auxiliary Kits includes: (1) Auxiliary Housing, (2) Pin Contacts, and (2) Socket Contacts.

Description	AWG	mm²	Part Numbers

Double Stacked Manual Assist Brackets

The robust frames ensure connector alignment and provide the ability to mount the truck/charger bracket assembly. The brackets include an ergonomic handle that reduces the operator effort required for mating and unmating the connectors. This ensures complete engagement of mated pairs reducing the possibility of shorts or disconnects.

SB® Smart Connector

Up to 230 Amps

Battery

Vehicle Device

Charger

The SB® Smart is designed for applications where storage batteries intelligently interact with the system. Two primary power positions (up to 230 amps each) are combined with sixteen auxiliary power / signal positions (up to 15 amps each) into a single interconnect solution. This allows one connection to be used to route high power lines, low power lines, and signal circuits.

Unique to the SB® Smart is it's selective keyed housings that allow only mating between select connector halves. This prevents motors from mating with chargers, chargers from mating with chargers, or other undesirable connection scenarios.

• Selective Keyed Housings
Unique keying feature only allows intended connector halves to mate

• Power and Auxiliary Contacts
Provides power up to 230 amps plus signal & low power in a single connector

• 16 Last-Mate First-Break Auxiliary Power / Signal Poles
Enables the power connector to also transmit signals for intelligent power switching, battery monitoring, CAN communication, loop circuitry, and other signal or power circuits up to 15 amps

• Sequencing of Auxiliary Contacts
Male auxiliary contacts available in 3 lengths

• Wire and Busbar Connections
Satisfies multiple interconnect needs with one connection solution

• Low Resistance Connection
- Silver plated power contacts are strongly forced together by stainless steel springs
- Gold plated auxiliary contacts ensure signal quality or reliable power

• Hot Plug Capable Contacts
- Power contacts are hot plug capable up to 60A at 120VDC
- Auxiliary contacts are hot plug capable up to 5A at 120VDC

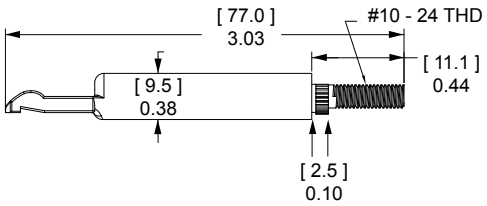
SB® Smart Silver Plated Busbar Contacts

Use 2 busbar contacts per housing to provide a quick disconnect input or output busbar connection. Busbar contacts are for mating with wire contacts only. Part number 120BBS includes lock nuts. Locknuts must be ordered separately for B01997P1.

Type	Thread	Mating Force	Loose Piece Part Numbers			
Minimum Quantity			1,000	300	20	10
Busbar	10 to 24	High	-	B01997P1	-	120BBS
Lock Nut	10 to 24	-	H1216P8	-	-	-

See Busbar contact drawing on website for further detail.



Reducing Bushings

Use with contact part number 1319-BK or 6811G6-BK to allow a smaller wire to be used with the connector. Electrical capability is derated with smaller wire.

Contact Barrel Size AWG	Contact Barrel Size mm²	Wire Size AWG	Wire Size mm²	Part Numbers			Dimensions - ID - inches	Dimensions - ID - mm

ANDERSON POWER™

SBS®X-75A

The SBS®X-75A sealed waterproof connectors come in a multiple of configuration offerings with up to a maximum of 140A of power and the durability of up to 5,000 mating cycles. Positive metal latches help safeguard against accidental disconnects that may be caused by vibration, while the built-in cable clamp allows for strain relief on wires.

The compact sleek high-power design of these environmentally rugged connectors makes them ideal for outdoor applications. The IP68 weatherproof rating ensures that the connector will be free of water for full protection up to 30 minutes at 6 feet in the mated conditions, or with the use of covers in unmated condition.

600 Volts / 140A

5,000 Mating Cycles

Operating Temperature
-20°C to 105°C / -4 °F to 221°F

NOTES:

1 - Current amperage ratings are based on 105°C rated or better cable of the largest wire size using properly calibrated Anderson recommended tooling, and a 25°C ambient temperature, or CSA rating below a 30°C temperature rise. UL rating not to exceed the maximum operating temperature. Connector to be assembled and installed according to the manufacturer's instructions.

2 - Operating Temperatures are limited by the thermal properties of the connector's plastic housing.

3 - Sealed Connector Series offers protection against electric shock for finger safety both in mated and unmated condition. The Sealed SBS®X-75A Connector Series was tested for IP Code 1X-2X per clause 12- & 13 of IEC 60529 , Edition 2.2, issued 2013-8 + Corr. 1:2013-10 + Corr. 2:2015-01. The connector was tested for IP1X and IP2 in mated and unmated condition, which is representative of protection against access to energized parts contained in UL 60950-1 2nd Edition, 2011-12-19 and UL 62368-1 3rd Edition, 2021-10-22.

4 - The Sealed SBS®X-75A Connector Series was subjected to submersion test, covered by UL 50E Standard for Enclosures for Electrical Equipment Environmental Considerations, 3rd Edition, with a pressure equivalent to 6 feet of water and for a duration of 30 minutes for the equivalent IP68 compliance. Note panel mount-to-panel mount configuration has not been tested for ingress protection rating: contact manufacturer to determine if it will work for your application.

5 - 6 position auxiliary housing utilizes PPMX contacts.

6 - It is recommended that for SBS®X-75A, customers use individual discrete wires for power, and jacketed cables for signaling to limit strain on smaller auxiliary wires.

Operating Temperature
-20°C to 105°C / -4 °F to 221°F

* Inquire with Manufacturer or Sales Representative regarding panel mount plug covers

Looking for an ergonomic strain relief for use with our SBS®X-75A series connectors?

Please contact us at Anderson Power for more details.

IP68

Dust - Water - Shock Protection

Step 2: Grommets Sold Separately

To select proper grommet size, you will need to know the outer diameter of jacketed cable for each of the Power and Signal cables. Find your overall power size, then determine appropriate outer dimension for both Power and Signal cables. Not using signal, then select NS grommet that matches your power only size. Panel mount housings do not require grommets.

Power Only
(NS-xxx Parts)

NOTE: Don't see your cable size requirements? Speak to Manufacturer or your local Representative about other options regarding custom grommets.

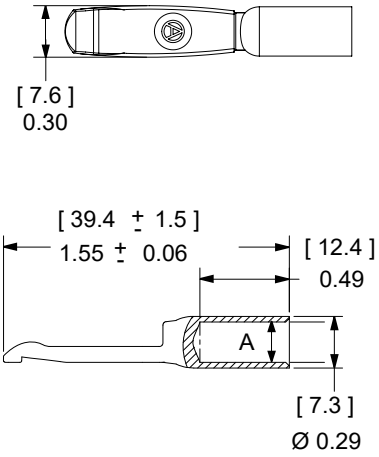
Step 3: Contacts Sold Separately for Power, Ground and Signal

Silver Plated Primary Power Wire Contacts

SBS®X-75A housings use two silver plated contacts per housing for the best electrical performance and durability up to 10,000 mating cycles.

					Diameter - A -	
Description	**AWG**	**mm²**	**Part Numbers - Loose Piece**		**inches**	**mm**
Minimum Quantity			**1,000**	**100**		
Standard	4	25	1339G4-BK	1339G4 *	0.28	7.11
	6	16	1339G2-BK	1339G2 *	0.22	5.60
	8	10	1339G5-BK	1339G5 *	0.19	4.70
	12 to 10	2.5 to 6	1339G3-BK	1339G3 *	0.14	3.50

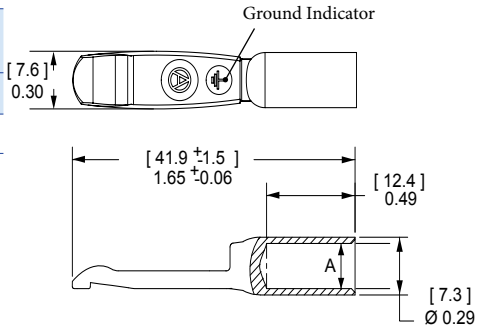
* Are sold as pairs. 2 contacts ship for every 1 ordered.



Silver Plated Pre-Mate Wire Contacts

Pre-Mate contacts used for grounding are for the center Pre-Mate position on the SBS®-X75A wire housings.

					Diameter - A -	
Description	**AWG**	**mm²**	**Part Numbers - Loose Piece**		**inches**	**mm**
Minimum Quantity			**2000**	**50**		
Pre-Mate	6	16	1340G1-BK	1340G1	0.22	5.60
Pre-Mate	8	10	1340G2-BK	1340G2	0.19	4.70
Pre-Mate	12 to 10	2.5 to 6	1340G3-BK	1340G3	0.14	3.50



Pin Contacts for Auxiliary 4 Positions

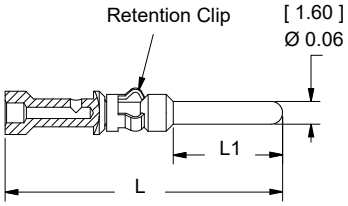
Gold plated contacts are available in 3 lengths to allow sequencing of circuits.

Description	**AWG**	**mm²**	**Part Numbers**
Minimum Quantity			**500**
Standard Length 7.7 mm	16 to 14	1.0 to 1.5	PM16P1416S30
	20 to 16	0.50 to 1.0	PM16P1620S30
	24 to 20	0.25 to 0.50	PM16P2024S30
Pre-Mate 9.3 mm	16 to 14	1.0 to 1.5	PM16P1416A30
	20 to 16	0.50 to 1.0	PM16P1620A30
	24 to 20	0.25 to 0.50	PM16P2024A30
Post-Mate 6.4 mm	16 to 14	1.0 to 1.5	PM16P1416C30
	20 to 16	0.50 to 1.0	PM16P1620C30
	24 to 20	0.25 to 0.50	PM16P2024C30

Auxiliary Pin Contact Lengths

	- L -		- L1 -	
Description	**in.**	**mm**	**in.**	**mm**
Standard Length 7.7 mm	0.77	19.6	0.30	7.7
Pre-Mate 9.3 mm	0.83	21.2	0.37	9.3
Post-Mate 6.4 mm	0.72	18.3	0.25	6.4

See drawings on website for further details.



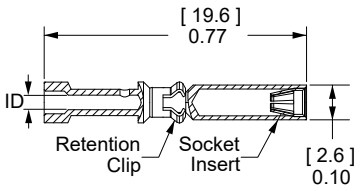
Socket Contacts 4 Position Auxiliary

Selective gold plated contacts offer low resistance and durability up to 10,000 mating cycles.

Description	AWG	mm²	Part Numbers
Minimum Quantity			**500**
Socket Contacts	16 to 14	1.0 to 1.5	PM16S1416S32
	20 to 16	0.50 to 1.0	PM16S1620S32
	24 to 20	0.25 to 0.50	PM16S2024S32

Auxiliary Socket Contacts Crimp Barrel ID

AWG	in.	mm.
16 to 14	0.08	2.1
20 to 16	0.07	1.7
24 to 20	0.04	1.1

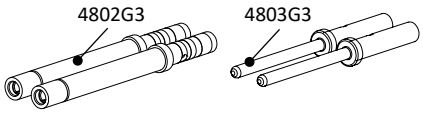


See drawings on website for further details.

Pin & Socket Contacts PPMX 6 Position Auxiliary Connector

Gold plated contacts are ideal for signal or low power use with durability up to 5,000 mating cycles.

Description	AWG	mm²	Part Numbers	
Minimum Quantity			**2,000**	**50**
Pin Contacts	24 to 20	0.25 to 0.50	4803G3-BK	4803G3
Socket Contacts	24 to 20	0.25 to 0.50	4802G3-BK	4802G3



NOTE: Contacts sold individually, not sold as a set of two.

** TP0001 and TM0001 tools require locators to properly position contacts.*

NOTES:

6 - The use of Anderson Power tooling is strongly recommended. The use of alternate tools may adversely affect the performance of our connectors along with UL and CSA recognition.

7 - TP0001 and TM0001 tools require locators TL0001 for Pins and TL0002 for Sockets. The Auxiliary contacts used with wire sizes 14 to 24 AWG (1.5 to 0.50) cannot be properly inserted without the insertion tool. Properly installed Auxiliary contacts of all wire gauges cannot be removed from the housing without the extraction tool. It is highly recommended that inspection tool be used to ensure the auxiliary contacts are seated properly in the housing.

8 - The Signal Housing Extraction Tool must be used in order to remove the signal housing from the main housing should position be inserted incorrectly for mating. See assembly instructions for further information.

3 POLE MINI PL

SPEC Pak®

Sealed Power For Environmental Connections

Marine | Wind Power | Lighting | Transportation | Pumps | Ground Support
Machine Tool | Industrial Automation | Motor | Solar Power | Harsh Environments

3 Position Mini PL SPEC Pak® is a rugged and environmentally sealed (IP68) connector with a manually operated release latch. The 3 Position Mini PL leverages PowerMod® pin and socket contact technology, delivering capabilities up to 22 amps at 600 volts while handling wires from 24 to 12 AWG (0.5 to 2.5 mm²). The 30µ gold plated pins are available in 3 lengths, enabling sequenced contact mating options. These contacts sit inside a UV and flame resistant shells that are touch safe on both sides.

Features

Manual Release Latch
- Prevents accidental un-mating

Pin & Socket Contact Technology
- Gold plated for greater conductivity

3 Pin Lengths Available
- Offers sequencing capabilities

Touch Safe per UL 1977 Sec. 10.2
- Touch safe on both pin & socket sides

Rugged & Environmentally Sealed Shells
- F1 weatherability rating per UL 746C
- V0 flammability rating per UL 94
- IP68, exceeds industry standards

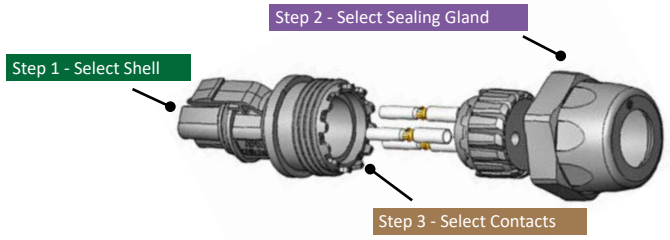
ANDERSON POWER™

| ORDERING INFORMATION |

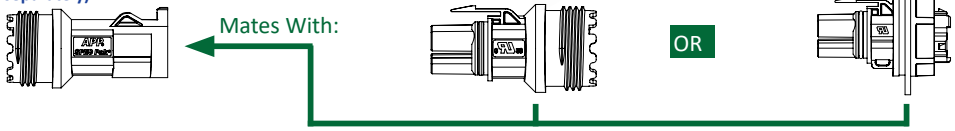
SPEC Pak® Mini PL Series is a highly configurable environmentally sealed connector that can be purchased as component in bulk for volume production, or pre-packaged as a kit. Configuring a connector is an easy three step process.



Step 1: Select Shell

SPEC Pak® Shell Kits (sealing glands & contacts sold separately)

Description	- Part Numbers -
Minimum Quantity	**25 ...**
Male, Receptacle Shell	SK1-019M03
Female, Plug	SK6-019M03
Female, Jam Nut	SK7-019M03
Female, Cover	SK9F-019
Male, Cover	SK9M-019



SK1-019M03
Male Receptacle

SK6-019M03
Female Plug

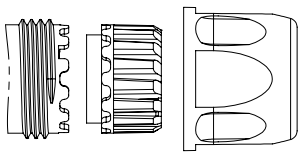
SK7-019M03
Female Panel, Jam Nut

Step 2: Select Sealing Gland

FAQ

Q: Do I need a sealing gland?
A: For IP68 rating, sealing glands are required with SK1-019M03 & SK6-019M03.
A: For splash resistance in the unmated condition, use optional wire sealing grommets with SK7-019M03. (See accessories on page 4).

Q: How do I select the appropriate sealing gland?
A: Identify the number of wires that will be used. Number of wires: _____
Identify the outer diameter (OD) of those wire(s). OD of the wires: _____



Material

Shell	PC
Sealing Grommet	EPDM
Flammability	UL94 V0
Color	Black

Torque Requirements

Hand tighten until snug, using a wrench tighten an additional 1/4 to 1/2 turn.

Wrench Size 22

Mechanical

Operating Temperature
-20° to 105°C
-4° to 221°F

Bundled Cable

Number of Wires	Cable Range Wire Outer Diameter (OD) mm (in)	Part - Numbers -	Connector Kit Designation	
Minimum Quantity		25	.....	
1	3.0 to 4.5 (0.12 to 0.18)	PS1T20-5X	PS	01
1	4.5 to 6.5 (0.18 to 0.26)	PS1T20-7X	PS	02
1	6.5 to 8.5 (0.26 to 0.33)	PS1T20-9X	PS	03
1	8.5 to 10.0 (0.33 to 0.39)	PS1T20-10X	PS	04
1	10.0 to 11.5 (0.39 to 0.45)	PS1T20-12X	PS	05

Discrete Wires

Number of Wires	Cable Range Wire Outer Diameter (OD) mm (in)	Part - Numbers -	Connector Kit Designation	
Minimum Quantity		25	.....	
2	0.75 to 1.5 (0.03 to 0.06)	PS2T20-2X	PM	21
2	1.5 to 2.6 (0.06 to 0.10)	PS2T20-3X	PM	22
3	0.75 to 1.5 (0.03 to 0.06)	PS3T20-2X	PM	31
3	1.6 to 2.6 (0.06 to 0.10)	PS3T20-3X	PM	32
3	4.0 to 4.8 (0.16 to 0.19)	PS3T20-5X	PM	35

Step 3: Select Contacts

FAQ

Q: What should I consider when selecting the contacts?
A: Determine the number of amps (continuous and peak). See temperature charts.
Amps (continuous) _____ at _____ volts & Peak Amps _____ for _____ seconds

Q: Which contacts are used in each shell?
A: Pins are used in SK1-019M03 (male receptacle).
Sockets are used in SK6-019M03 (female plug) & SK7-019M03 (female panel mount, jam nut)

MINI 3 POLE SPEC Pak®

Sealed Power For Environmental Connections

Marine | Wind Power | Lighting | Transportation | Pumps | Ground Support
Machine Tool | Industrial Automation | Motor | Solar Power | Harsh Environments

APP's new SPEC Pak® Mini 3 position connector is a small, IP68 sealed interconnect solution that provides up to 3 contacts and is UL rated to carry up to 22 amps per contact at 600 volts. This connector is ideal for applications requiring power or power and signal combined in a compact environmentally sealed (IP68) package. Contacts are available for wires ranging from 24 AWG to 14 AWG. Contacts are 30µ gold plated to provide low resistance and up to 500 mating cycles. The male contacts are also available in 3 lengths to enable sequencing as required. The connectors meet the UL1977 Sec 10.2 touch safe requirements and have an integral latch to prevent accidental un-mating. The SPEC Pak® Mini 3 connectors are manufactured of durable polycarbonate material and meet UL94 V-0 flame resistance requirements.

Features

• Environmentally Sealed
- IP68 rated
- Passes UL50 Sec. 36

• High Power In Compact Housing
Housings provide up to three contacts rated up to 22 amps at 600 volts

• Touch Safe Housings
Meets UL1977 Sec.10.2

• Integral Latch
Prevents accidental un-mating

• Male Contacts Available In 3 Lengths
Allows sequencing of mating contacts

• Ruggedized Shells
Manufactured of durable polycarbonate that meets UL94 V-0 flammability requirements

MID POWER SPEC Pak®

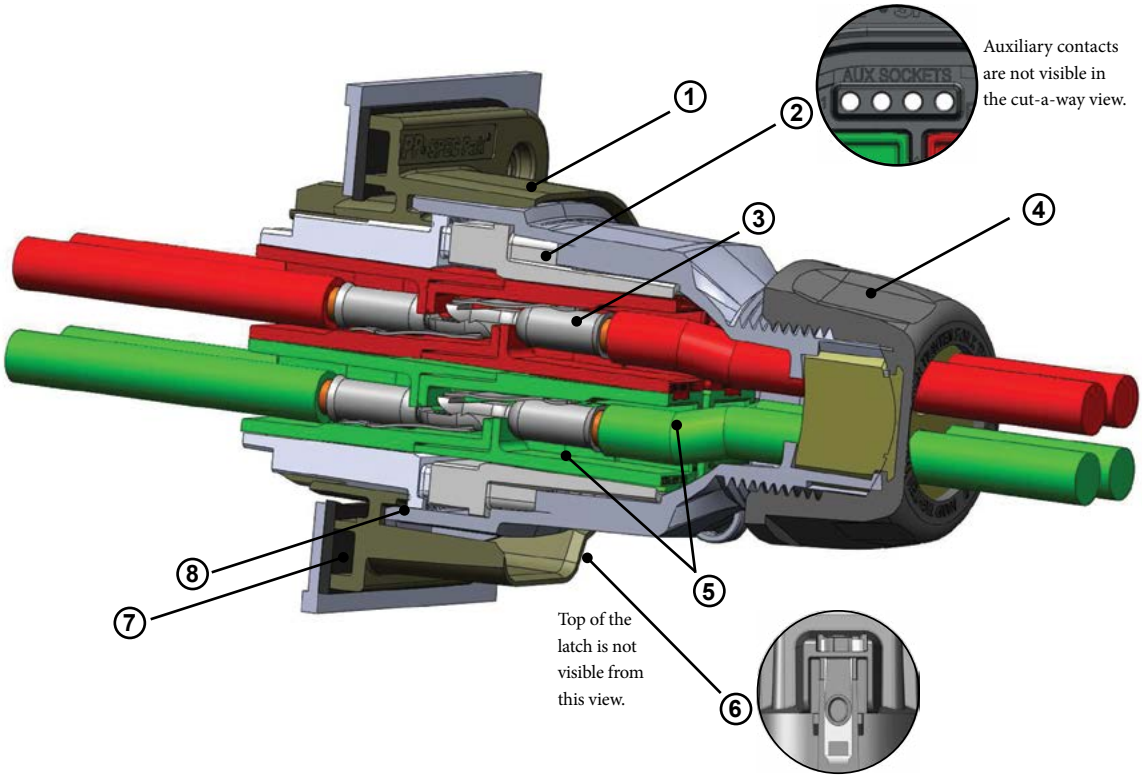
Sealed Power For Environmental Connections

Marine | Wind Power | Lighting | Transportation | Pumps | Ground Support
Machine Tool | Industrial Automation | Motor | Solar Power | Harsh Environments

Rugged and Sealed (IP68) Plugs and Receptacles

The SPEC Pak® Mid Power is rugged and environmentally sealed (IP68). It leverages APP's core Powerpole® flat wiping contact technology, offering power handling capabilities up to 80 amps at 600 volts with signal.

The SPEC Pak® Mid Power shells are highly configurable. They accept up to four Powerpole® 75 (PP75) contacts and housings. They also accept up to 8 pin and socket auxiliary contacts providing the user signal and/or sequencing options. Assembly is made easy though the use of colored Powerpole® housings which can be matched to wire colors. They will accept wire sizes ranging from 12 to 6 AWG [3.3 to 13.3 mm²]. SPEC Pak® Mid Power is highly configurable providing users with a multitude of flexible design solutions in a single interconnect.



1 - Chemical & UV Resistant Ruggedized Shells
- Wire to Wire Configurations
- Wire to Panel Configurations

2 - Auxiliary Contacts for Signal and/or Sequencing (up to 8)

3 - Power Contacts (up to 4)

4 - Sealing Gland to Ensures (IP68) Environmental Seal

5 - Color Coded Powerpole® Housings to Match Wire Colors

6 - Stainless Steel Latches to Prevent Accidental Unmating

7 - IP68 Panel Mount Receptacle Gasket

8 - Sealing O-Ring Ensures (IP68) Environmental Seal

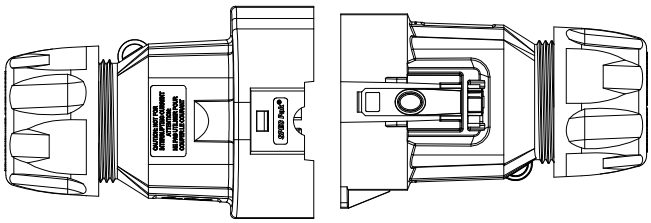
Product Selection Guide

SPEC Pak® is a highly configurable environmentally sealed connector, that can be purchased as components in bulk for volume production, or pre-packaged as a kit. For convenience, follow the steps below to determine component or kit part numbers.

| COMPONENT PART NUMBER GUIDE (FOR COMPONENT BULK PURCHASE) |

Step 1: Select Shell



SK6-076C04
Plug

SK1-076C04
Inline Receptacle

*** Select Shell Style, from page 6.**

SK2-076C04
Panel Mount Receptacle

Step 2: Select Wire Protection

*** Define:**

	Number of Wires	Wire OD
Wires		
- Discrete	_____	_____
- Bundled	_____	_____

*** Select wire protection that will accommodate the number of wires and outer diameter (OD) of the wire used in your application, from page 6.**

*** Wire protection is required for use with inline receptacles and plugs to obtain IP68 seal.**

List Component Part Numbers Here:

| KIT PART NUMBER GUIDE (FOR KITTED CONNECTOR PURCHASE) |

Step 1 - (see page 6)

Shell

SPEC Pak® Series	Shell Color	Shell Style (Select One)	Dash	Shell Size	Insert Arrangment
		1 = Inline Receptacle 2 = Panel Mount Receptacle 6 = Straight Plug 9 = Receptacle Cover 9P = Plug Cover

IEC 61984

Attributes	
AMP Rating AC	60A
Voltage Rating AC	800V AC (operational)
Finger Safety **	IEC 60529
Protection Degree	IP20 Unmated, IP68 Mated
Wire Size Tested	8 AWG
Contact Series Tested	PC08SSN, PP08SGH SC08-SN, SC08-GH
Climatic Testing (Cold, Heat & MFG)	IEC 60512 Test -11j, 11i & 11g
Cycle Life	IEC 60512 Test 9A - 5000 Cycles
Mechanical Strength Impact	IEC 60512 @ 29.5 Inches - dropped 8 times
Temperature Range	-40 to 105°C, -40 to 221°F

Protection Touch Safety with Finger Proof Housings & Wire Contacts	
IEC 60529	IP20 unmated, IP68 mated

* In mated and unmated condition, for standard 8 AWG wire contacts (only)
** Female side unmated

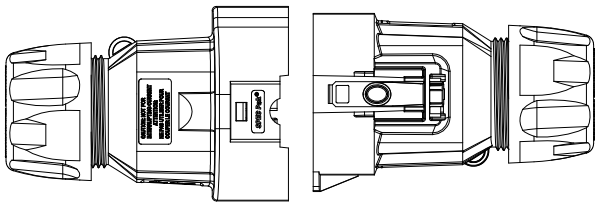
IEC 60950-1	
Creepage / Clearance per IEC 60950-1	9.55 (mated or unmated)
Material Group	IIIa

* In mated and unmated condition, for standard 8 AWG wire contacts (only)
** Female side unmated

ORDERING INFORMATION

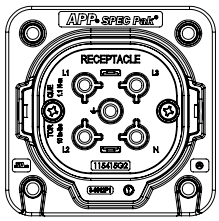
SPEC Pak® is a highly configurable environmentally sealed connector. For convenience, follow the steps below to determine component part numbers.

Step 1: Select Shell



SK1-076D05
Inline Receptacle

SK6-076D05
Plug

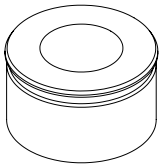


SK2-076D05
Panel Mount Receptacle & Gasket

Description	Part Numbers
Minimum Quantity	25
Inline Receptacle Shell	SK1-076D05
Plug Shell	SK6-076D05
Panel Mount Receptacle	SK2-076D05
Receptacle Cover	SK9-076 (shown on back page)
Plug Cover	SK9P-076 (shown on back page)

• Contact holders are available with multiple keys, please inquire.

Step 2: Select Sealing Gland



* Define:

	Number of Wires	Wire OD
Wires		
- Discrete	_____	_____
- Bundled	_____	_____

* Select wire protection that will accommodate the number of wires and outer diameter (OD) of the wire used in your application.

* Wire protection is required for use with inline receptacles (SK1-076D05) and plugs (SK6-076D05) to obtain IP68 seal.

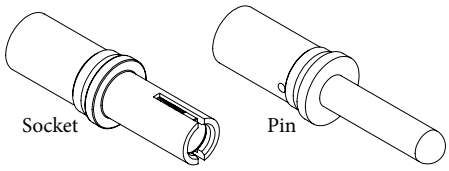
Number of Holes	Cable Range Wire Outer Diameter mm (in)	Sealing Grommet Part Number Only
Minimum Quantity		10
1	20.0 mm - 24.0 mm (0.79" - 0.85")	B02130P7

* For other wire configurations contact manufacturer

Torque Requirements

Hand tighten. Using a 44 mm wrench or strap wrench, tighten an additional 3/4—1 turn (approximately 7.9 Nm (70 in - lb).

Step 3: Select Contacts



* Define:

	Number of Circuits	Wire Gauge
Contacts		
- Power	_____	_____
- Other	_____	_____

Amps (continuous): _____ Max amps at _____ Volts

* Select power and/or ground contacts appropriate for your wire size (AWG or mm²).

- Sockets are used in the receptacles (part numbers SK1-076D05 & SK2-076D05)
- Pins are used in the plug (part number SK6-076D05)
- Solid wires not recommended

Description	Part Numbers
Minimum Quantity	10
Power Drawer® #8 socket crimp, hot plug/ground	SC08-GH
Power Drawer® #8 socket crimp, standard mate	SC08-SN
Power Drawer® #8 pin crimp, hot plug/ground	PP08SGH
Power Drawer® #8 pin crimp, standard mate	PC08SSN

5 POLE MINI PL SPEC Pak®

Sealed Power For Environmental Connections

Marine | Wind Power | Lighting | Transportation | Pumps | Ground Support
Machine Tool | Industrial Automation | Motor | Solar Power | Harsh Environments

5 Position Mini PL SPEC Pak® is a rugged and environmentally sealed (IP68) connector with a secure manual release latch. This compact connector leverages the proven PowerMod® pin and socket contact technology, delivering capabilities up to 23 amps at 600 volts while handling wires from 24 to 12 AWG (0.5 to 2.5 mm²). The 30µ gold plated pins are available in 3 lengths, enabling sequenced contact mating options. These contacts sit inside UV and flame resistant shells that are touch safe on both sides.

Features

Manual Release Latch
- Prevents accidental un-mating

Pin & Socket Contacts
- Gold plated for greater connectivity

3 Pin Lengths Available
- Offers sequencing capabilities

Touch Safe per UL 1977 Sec. 10.2
- Touch safe on both pin & socket sides

Rugged & Environmentally Sealed Shells
- F1 weatherability rating per UL 746C
- V0 flammability rating per UL 94
- IP68, exceeds industry standards

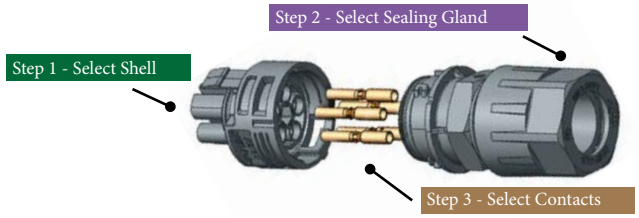
ANDERSON POWER™

| ORDERING INFORMATION |

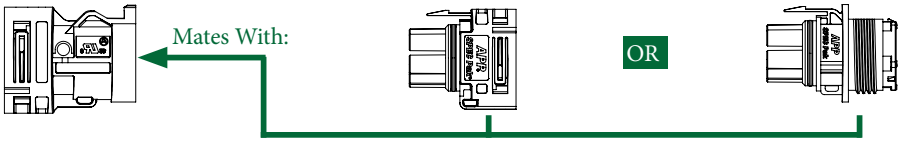
SPEC Pak® Mini PL Series is a highly configurable environmentally sealed connector that can be purchased as components in bulk for volume production, or pre-packaged as a kit. Configuring a connector is an easy three step process.



Step 1: Select Shell

SPEC Pak® Shell Kits (sealing glands & contacts sold separately)

Description	- Part Numbers -
Minimum Quantity	25
Male, Receptacle Shell	SK1-021M05
Female, Plug	SK6-021M05
Female, Jam Nut	SK7-021M05
Female, Cover	SK9F-021
Male, Cover	SK9M-021



SK1-021M05
Male Receptacle

SK6-021M05
Female Plug

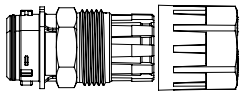
SK7-021M05
Female Panel, Jam Nut

Step 2: Select Sealing Gland

FAQ

Q: Do I need a sealing gland?
A: For IP68 rating, sealing glands are required with SK1-021M05 & SK6-021M05.
A: For splash resistance in the unmated condition, use optional wire sealing grommets with SK7-021M05. (See accessories on page 4).

Q: How do I select the appropriate sealing gland?
A: Identify the number of wires that will be used. Number of wires: _____
Identify the outer diameter (OD) of those wire(s). OD of the wires: _____



Material

Shell	PC
Sealing Grommet	EPDM
Flammability	UL94 V0
Color	Black

Torque Requirements

Hand tighten until snug, using a wrench tighten an additional 1/4 to 1/2 turn.

Wrench Size 24

Mechanical

Operating Temperature
-20° to 105°C
-4° to 221°F

Bundled Cable

5	1.0 to 2.0 (0.04-0.08)	PS5T24-2X	PM	54

Step 3: Select Contacts

FAQ

Q: What should I consider when selecting the contacts?
A: Determine the number of amps (continuous and peak). See temperature charts.
Amps (continuous) _____ at _____ volts & Peak Amps _____ for _____ seconds

Q: Which contacts are used in each shell?
A: Pins are used in SK1-021M05 (male receptacle).
Sockets are used in SK6-021M05 (female plug) & SK7-021M05 (female panel mount, jam nut)

Finger Safety **	IEC 60529
Protection Degree	IP20 Unmated, IP68 Mated
Wire Size Tested	8 AWG
Contact Series Tested	PC08SSN, PP08SGH SC08-SN, SC08-GH
Climatic Testing (Cold, Heat & MFG)	IEC 60512 Test -11j, 11i & 11g
Cycle Life	IEC 60512 Test 9A- 5000 Cycles
Mechanical Strength Impact	IEC 60512 @ 29.5 Inches - dropped 8 times
Temperature Range	-40 to 105°C,-40 to 221°F

PROTECTION
Touch Safety with Finger Proof Housings & Wire Contacts

* In mated and unmated condition, for standard 8 AWG wire contacts (only)
** Female side unmated

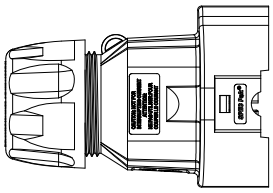
IEC 60950-1	
Creepage / Clearance per IEC 60950-1	9.55 (mated or unmated)
Material Group	IIIa

* In mated and unmated condition, for standard 8 AWG wire contacts (only)
** Female side unmated

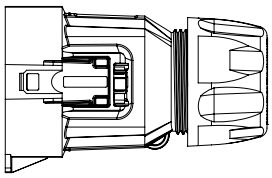
ORDERING INFORMATION

SPEC Pak® is a highly configurable environmentally sealed connector. For convenience, follow the steps below to determine component part numbers.

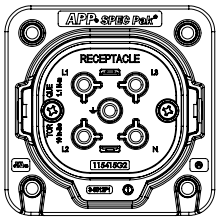
Step 1: Select Shell



PK1-076D05
Inline Receptacle Shell



PK6-076D05
Plug Shell

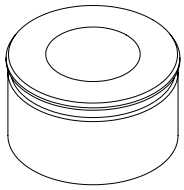


PK2-076D05
Panel Mount Receptacle & Gasket

Description	Part Numbers
Minimum Quantity	25
Inline Receptacle Shell	PK1-076D05
Plug Shell	PK6-076D05
Panel Mount Receptacle & Gasket	PK2-076D05
Receptacle Cover Kit	PK9-076 (shown on back page)
Plug Cover Kit	PK9P-076 (shown on back page)

- Contact holders are available with multiple keys, please inquire.

Step 2: Select Sealing Gland



* Define:

	Number of Wires	Wire OD
Wires		
- Discrete	_____	_____
- Bundled	_____	_____

* Select wire protection that will accommodate the number of wires and outer diameter (OD) of the wire used in your application.

* Wire protection is required for use with inline receptacle shell (PK1-076D05) and plug shell (PK6-076D05) to obtain IP68 seal.

Number of Holes	Cable Range Wire Outer Diameter mm (in)	Sealing Grommet Part Number Only
Minimum Quantity		10
1	20 mm (0.79)	B02266P7

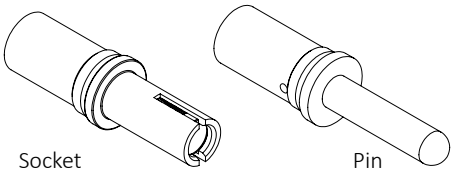
- For other wire configurations contact manufacturer

Wire Test Approval
- Type TC-ER, 8 AWG 5/C sunlight resistant
- Rated minimum 90°C dry: 90°C wet
- 600V with outer diameter of cord 20 mm (0.79)

Torque Requirements

- Hand tighten. Using a 44 mm wrench or strap wrench, tighten an additional 3/4—1 turn.
- 7.9 Nm (70 in- lb)

Step 3: Select Contacts



* Define:

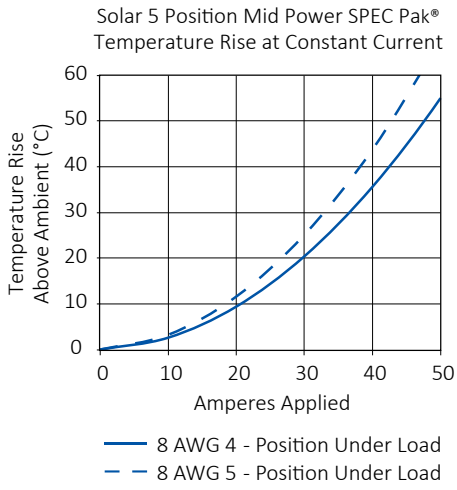
	Number of Circuits	Wire Gauge
Contacts		
- Power	_____	_____
- Other	_____	_____

Amps (continuous): ____ Max amps at ____ Volts

* Select power and/or ground contacts appropriate for your wire size (AWG or mm²)

- Sockets are used in the receptacles (part numbers PK1-076D05 & PK2-076D05)
- Pins are used in the plug (part number PK6-076D05)
- Solid wires not recommended

TEMPERATURE CHART - PER UL 1977



Description	Part Numbers
Minimum Quantity	10
Power Drawer® 8 AWG Socket Crimp, Hot Plug/Ground	SC08-GH
Power Drawer® 8 AWG Socket Crimp, Standard Mate	SC08-SN
Power Drawer® 8 AWG Pin Crimp, Hot Plug/Ground	PP08SGH
Power Drawer® 8 AWG Pin Crimp, Standard Mate	PC08SSN

6 Pole Mini SPEC Pak®

50A Sealed Connector

IP68

Dust - Water - Shock

- E-Mobility • Lawn / Garden Equipment • Agricultural / Construction
- Material Handling / Automation • Industrial / Commercial

ANDERSON POWER™

6 Pole Mini SPEC Pak®

The 6 Pole Mini SPEC Pak® waterproof connectors come in configurations of wire to wire or wire to panel mount offerings with up to a maximum of 50A of power and the durability of up to 10,000 mating cycles. The bayonet latch with locking identifications help safeguard against accidental disconnects that may be caused by vibrations, while the compression nut offers additional strain relief protection on wire cables. The compact sleek high-power design of these environmentally rugged connectors makes them ideal for outdoor applications including E-Mobility, Lawn and Garden, Power Equipment, Commercial and Industrial applications. Rated to IP68 with protective features to ensure that the connector will be free of water and dust in the mated conditions. Covers offer general finger proof IP20 protection in unmated conditions of connectors.

600 Volts / 50A

10,000 Mating Cycles

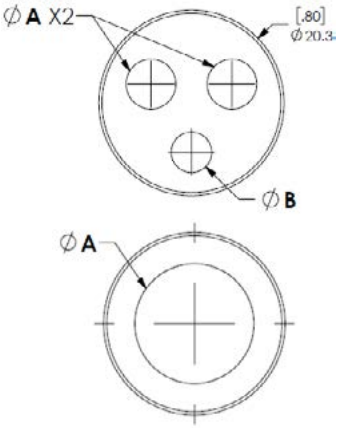
E-Mobility Applications

Step 2: Select Sealing Grommet

To select proper grommet size, you will need to know the outer diameter of discreate power jacket diameters as well as the outer diameter of the jacked signal cables. Find your overall power size, then determine appropriate outer dimension for Signal cables.

Part Number	Identifier Mark	Number of Holes	Discrete Power Jacket (Diameter Range)		Jacketed Signal (Diameter Range)	
			ØA		ØB	
			INCH	MM	INCH	MM
D-220-180-SP	D-A	3	.220 to .240	5.59 to 6.10	.180 to .200	4.57 to 5.08
D-220-220-SP	D-B				.220 to .240	5.59 to 6.10
D-240-180-SP	D-C		.240 to .260	6.10 to 6.60	.180 to .200	4.57 to 5.08
D-240-220-SP	D-C				.220 to .240	5.59 to 6.10
J-530-SP	J-A	1	.530 to .550	13.46 to 14	N/A	N/A



Step 3: Select Contacts for Power and Auxiliaries

6 Pole Mini SPEC Pak housings use two silver plated power contacts and up to 4 signal contacts per housing for the best electrical performance and durability up to 10,000 mating cycles.

Power Contacts			
Part Numbers	Description	AWG	mm^2

A SERIES

Battery Connector for Industrial Vehicles

• Up to 400A • Meets or Exceeds EN1175:2020 • cURus Rated • RoHS Compliant
• Acid & Impact Resistant • Industrial Applications

ANDERSON POWER™

A SERIES BATTERY CONNECTOR

The Anderson™ family of A Series Battery Connectors are expertly designed for ease of use and incorporate an innovative contact carrier to simplify assembly. The A Series connectors include standard 80, 160, and 320 sizes. Robust design and materials offer superior performance. All materials chosen are RoHS compliant and selected to ensure years of reliability in adverse industrial environments. These attributes make the A Series connectors the ideal choice for a wide range of industrial applications in Material Handling, Battery Charging, Utility Vehicles, Motive Power, and Sweepers/Scrubbers amongst many others.

KEY ATTRIBUTES

Safety Agency Approvals

EN1175:2020

c UL us File No. E26226

Voltage Keying

A series connectors offer keys for Dry-Cell, Wet-Cell, and Universal applications coded for 24/36/48/72/80 and 96 volts DC applications.

Sturdy Advanced Polymer Housings

Provide superior resistance to impact, acid and temperature extremes.

Silver Plated Copper Contacts

Provide excellent conductivity and superior mating cycle performance.

E-Series

Euro Battery Connector / Euro-Batteriestecker

Connectors for Industrial Vehicles / Stecker Für Industriefahrzeuge

- *Up to 400A • Meets or Exceeds EN1175:2020, VDE 0623-589 • RoHS Compliant*
- *Acid & Impact Resistant • Industrial Applications*

- *Bis zu 400A • Erfüllt oder übertrifft EN1175:2020, VDE 0623-589 • RoHS-konform*
- *Säure-und schlagfest • Industrieanwendungen*

ANDERSON POWER™

EURO BATTERY CONNECTOR

The Anderson™ family of Euro Battery Connectors (EBC) are expertly designed for ease of use and incorporate an innovative contact carrier to simplify assembly. The EBC connectors include the industry standard 80, 160, and 320 sizes, all in accordance with VDE 0623-589. Design and materials offer performance that meets or exceeds all the requirements of EN1175:2020. All Materials chosen are RoHS compliant and selected to ensure years of reliability in adverse industrial environments. These attributes make the EBC connectors the ideal choice for a wide range of industrial applications in Material Handling, Battery Charging, Utility Vehicles, Motive Power, and Sweepers/Scrubbers amongst many others.

KEY ATTRIBUTES

Safety Agency Approvals
EN1175:2020 c US File No. E26226

Meets VDE 0623-589, completely compatible with DIN 43589-1
Offers interface compatibility for housings, contacts and air tubes.

Voltage Keying
EBC connectors offer keys for Dry-Cell, Wet-Cell, and Universal applications coded for 24/36/48/72/80 and 96 volts DC applications.

Sturdy Advanced Polymer Housings
Provide superior resistance to impact, acid and temperature extremes.

Silver Plated Copper Contacts
Provide excellent conductivity and superior mating cycle performance.

NOTE: All auxiliary contacts regardless or wire size are rated to a Min 20 amps when tested to EN1175:2020 testing requirements.
•EN1175:2020 allows for maximum temperature rise = 65°C (above 25±5°C ambient)
•CNR allows for maximum temperature rise = 30°C
•USR allows for total temperature (based on min. 25°C ambient) = 75°C

1+2+6+7+8	Female Housing with Contact Holder ****Lower Pilot Aux Holder, Cable Clamp w/ screws- (Red Key)- Individual Pack	E80500-0509		E16500-0509		E32500-0509	

*Lower pilot auxiliary contacts use the same housing location as air tubes so they can not be used together
**Universal yellow coding key is only used on male connectors
***EBC 160 and EBC 320 handles work with both the EBC 160 and EBC 320 series connectors
****No lower pilot auxiliary holder required on EBC 80 size connectors

EURO-BATTERIESTECKER

Die Euro-Batteriestecker (Euro Battery Connectors, EBC) der Anderson™-Familie wurden fachkundig mit dem Ziel der einfachen Bedienbarkeit konzipiert und weisen einen innovativen Kontaktträger auf, der die Montage vereinfacht. Die EBC-Stecker liegen in den industriellen Standardgrößen 80, 160 und 320 vor, die alle der Norm VDE 0623-589 entsprechen. Design und Materialien bieten Leistungsmerkmale, die alle Anforderungen der Norm EN1175:2020 erfüllen oder übertreffen. Alle ausgewählten Materialien sind RoHS-konform und wurden so ausgewählt, dass jahrelange Zuverlässigkeit in schwierigen Industrieumgebungen gewährleistet wird. Dank dieser Attribute sind die EBC-DIN-Stecker die richtige Wahl für eine breite Palette an industriellen Einsatzmöglichkeiten bei Materialhandhabung, Batterieaufladung, Nutzfahrzeugen, Antriebstechnik, Kehrmaschinen und vielen weiteren Anwendungen.

HAUPTMERKMALE

Sicherheitszertifizierungen
EN1175:2020 c UL us File No. E26226

Erfüllt VDE 0623-589, völlig kompatibel mit DIN 43589-1
Bietet Schnittstellenkompatibilität für die Gehäuße, die Kontakte und die Luftadapter.

Spannungscodierstifte
EBC-Stecker bieten Codierstifte für Trockenzellen-, Nasszellen und universelle Anwendungen, die für DC-Anwendungen mit 24/36/48/72/80 und 96 Volt codiert sind.

Stabile, moderne Polymer-Gehäuse
Bieten überragenden Widerstand bei Schlag-, Säure- und Temperaturbelastungen.

Versilberte Kupferkontakte
Bieten hervorragende Leitfähigkeit und überragende Steckzyklen.

Verpackung:
Einzelpackung (Kits) – alle Komponenten für einen vollständigen Anschluss werden zusammen in Einzelpackungen in einer Schachtel verpackt.
Großverpackung (Kits) – alle erforderlichen Komponenten werden nach Teilenummer getrennt in einer Schachtel/Kiste verpackt.

Griffe:
EBC 80 wird mit dem flachen T-Griff geliefert • EBC 160 wird mit dem flachen Griff geliefert • EBC 320 wird mit dem hohen Griff geliefert.

Saf-D-Grid®

AC / HVDC Global Power Connection Solutions

- *Carrying DC or AC Current up to 32A and 600V*
- *Footprint of an IEC 620 C13/14*
- *Meets International Safety Requirements for Hazardous, Low Voltage Applications*

ANDERSON POWER™

SAF-D-GRID®

Anderson Power™ has lead the connector industry in development of DC power connection solutions since the introduction of the SB® electrical connector in 1953. Saf-D-Grid® builds on the proven contact technology used in SB® and Powerpole® connectors by offering features required for connecting Direct Current (DC) for higher voltage DC or hybrid AC/DC systems.

The Saf-D-Grid® Plug and Receptacle

- Connect devices carrying DC or AC current up to 30A and 600V in the footprint of an IEC 620 C13/C14 and is the only connector system at this size which is UL rated for disconnect up to 400V and 30A
- Meets International safety requirements for hazardous, low voltage applications including UL 950 and IEC 60950
- Enables greater power density by allowing up to 40A and 600V DC or AC within the same space of the IEC 320 C13/14 system that is limited to 10A and 250 VAC
- Saf-D-Grid® 400V series targets DC applications but is also rated for AC current with a single keying configuration
- Saf-D-Grid® 300V series targets AC applications but is also rated for DC current and has multiple mechanical keys

First Mate, Last Break Ground Contact
- Provides the safety of an earthing path before engagement of the power contacts.

Integral Latch
- Connectors cannot be accidentally unmated, preventing unwanted power loss to critical equipment.

Hot Plug Rated
- The connectors are rated for current interruption for both electronic (capacitive) and electrical (resistive) loads.

Touch Safe / Shock Protection
- Minimizes the risk of personal contact with a hazardous voltage. Passes UL & IEC finger probe (plug & receptacle) and 3mm probe tests (receptacle).

Arcing Protection
- Housings contain the arc if connectors are mated or unmated while under load minimizing risk to personnel.

Integral Latch
- T-Latch Straight Plug

First Mate, Last Break Ground Contact - Ultra Short Receptacle

Saf-D-Grid® doesn't discriminate. It makes the power connection safely and efficiently in systems using AC or DC. It enables better usage of space by providing more voltage and more current than similar sized IEC 60320 connectors safely and efficiently.

For locations where renewable and alternative energy sources are necessary to maintain system uptime, Saf-D-Grid® keeps the power on. Designers choose a manufacturer that has made power connections for over a hundred years.

Saf-D-Grid® from Anderson Power Products®

NOMINAL PERFORMANCE CHARACTERISTICS		
	Saf-D-Grid® 400V	**Saf-D-Grid® 300 VAC**

No IEC 61984 Approvals for 2002N, 2002V, 2005N & 2005V Series Receptacles

- UL1977 ratings are for recognized components under UL1977 file # E26226. Ratings may vary once the final listing category is considered. Do not exceed maximum operating temperature of connector or wire insulation. Ratings are based on an ambient temperature of 25˚C.
- CNR - indicates investigation to Canadian National Standards, C22.2 No. 182.3.
- UL817 recognized or listed cord sets under UL file number E 343569.
- IEC 61984 certification
- ***"Disconnect Only"*** indicates the devices are not for interrupting current.
- ***"Current Interrupt"*** indicates the devices have been investigated for the interruption of current.
- Anderson Power™ assembly tooling is required for UL, CSA & other safety agency compliance. Use of unapproved tooling will void connector warranty.

Why Anderson Power™

Anderson™ is a provider of mid to high power connectors for both AC and DC applications. Since 1877, Anderson™ has been synonymous with reliable products and has been the chosen power connection for material handling equipment for 40 years. Today, the lessons learned from those demanding applications have propelled our products into a wide number of industries from rail to data communications.

Anderson Power™ is a subsidiary of IDEAL® INDUSTRIES, INC., a global enterprise with companies serving technicians and workers across a wide range of industries, from electrical to construction to aerospace to automotive.

CUSTOM CONFIGURATIONS AVAILABLE

The needs of every system are different. If you don't see a configuration that fits your application, contact inside sales to see if a customized offering can address your specific requirements.

Anderson™ will use reasonable efforts to include accurate and up-to-date content in the data sheet. All product information contained in the data sheet including ordering information, illustrations, specifications, and dimensions, are believed to be reliable as of the date of publishing, but is subject to change without notice. Anderson™ makes no warranty or representation as to its accuracy. Content in the data sheet may contain technical inaccuracies, typographical errors and may be changed or updated without notice. Anderson™ may also make improvements and/or changes to the products and/or to the programs described in the content at any time without notice. Current sales drawings and specifications are available upon request.

35 amp Power Drawer®
Connector

Anderson Power Products new line of power drawer series connectors gives our customers more selections than ever to meet their power connector needs. These cost effective, mixed power and signal drawer connectors are manufactured using the same high quality standards that have made APP a leader in the power connector industry for years. The drawer series can be used for a wide range of drawer-type applications such as rectifiers, mainframe computers, telecommunications, and network equipment. If power and signal is required, let Anderson Power Products be "Your Best Connection."

FEATURES

- **Industry Standard Contacts**
  Allows for cross mating with competitive product
- **Wide Selection of Contact Termination**
  Provides the designer a wide variety of packaging options
- **First-mate and Last-mate Capability**
  Grounds and powers the system before mating of signal circuits
- **Integral Guide Pins**
  Corrects misalignment during blind mating

MARC

Multi Axial Rotational Connector

The Multi Axial Rotational Connector "MARC" features 8 Powerpole® contacts integrated into a blindmate housing. The connector is designed to blindmate from 2 rotating axis or straight on. The two row, horizontally oriented connector uses our industry leading flat wiping contacts. The MARC is rated to 29 amps per circuit and can be configured with 8 standard length contacts or 6 standard length and 2 pre mate, multi-purpose contacts, which can function as ground, power or signal. The rugged connector is UL listed and rated up to 10,000 mating cycles. The dielectric is a chemically resistant PBT plastic. APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

- **Rotational Blindmate Error Correction**
  Enables blindmating from 2 independently rotating axes with .100" of error correction
- **Sequential Mating**
  Can be configured with up to 8 power and signal or 6 power and signal circuits and 2 pre mate contacts
- **Rugged and Durable**
  - The connector is rated up to 10,000 mating cycles
  - Constructed of chemically resistant PBT plastic
- **Interchangeable Genderless Design**
  Makes assembly quick and easy and reduces number of parts stocked

Open	20 to 16 SF*	0.52 to 1.5	Low	200G2L-LPBK	200G2L

K* - For #10 AWG class K stranded wire or smaller. For larger wires use superflex contacts.

SF*- Indicates wires with high stranding such as Super Flex.

45A Premate Ground Wire Contacts

Tin or silver plated contacts are rated for ground or power. Hand crimp tools are available for loose piece contacts. Reeled contacts can be used with high volume press and applicator crimp tooling. Tin contacts are rated for up to 1,500 mating cycles. Silver contacts are rated up to 10,000 mating cycles.

Type	AWG	mm²	Mating Force	Loose Piece - Part Numbers -	Reeled Part - Numbers -

Power Clip® Dual Pole
Connector Series

The Anderson Power Products Dual Pole Power Clip is designed as a low cost interconnection between two perpendicular power bus bars. The product's high performance contacts offer low voltage drop and superior amperage carrying capability. There is no mating connector to the Dual Pole Power Clip as it accepts a solid .125 inches or 3mm thick nickel or gold plated rectangular bus bar tab.

The product is often used in "N+1" rectifier, power supply and switching power supply applications. The Dual Pole Power Clip's design enables the connector to be blind mated in the deepest racks.

The Dual Pole design allows for mating to a two pole laminated bus bar or double sided PSB tab. This will allow for feed and return with one single socket.

The Dual Pole Power Clip is recognized to UL1977 and CSA standard C22.2 and is rated for up to 300 amps continuous service.

FEATURES

• High 300A Current Rating
Small size provides dense power packaging

• Mates with .125 inches or 3mm flat Bus Bar Blade
Simplifies construction and lowers cost

• Blind Mating Design
Allows greater vertical chassis manufacturing tolerances

• UL and CUR Recognized
Product safety and electrical performance has been verified to the highest standards

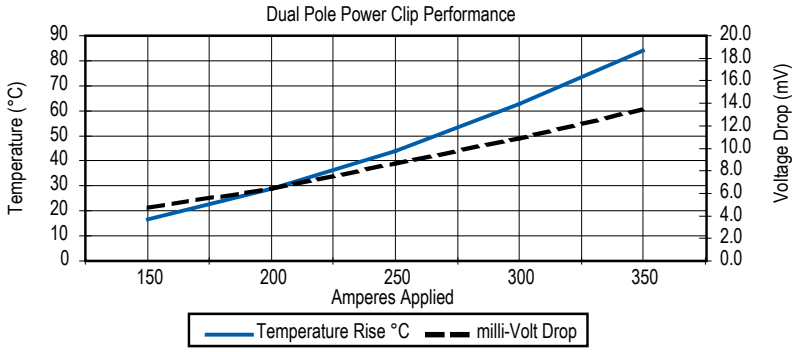
TEMPERATURE CHART



The graph shows the Dual Pole Power Clip electrical performance in terms of temperature rise and voltage drop at currents from 150A to 350A. The set up for the test consisted of the following:
• Six Power Clips were mounted on a bus bar that was 0.25 x 1.75 x 6.0 inches in diameter.
• The test samples were connected in series using 1/0 AWG wire attached to a 1" long and .125" thick nickel plated mating blades.
