| Applications |
|--------------|
|--------------|

- Wide net of applications
 - Anywhere existing battleship gray or Eco modular hood/housing applies

| Feature | Advantage | Benefit |
|--|--|--|
| ■ Has four internal screws to mount either a metal frame or insert | ■ Mating compatibility to metal hoods and housings | ■ Customer can partially retrofit old designs. i.e. Can mate new plastic Eco B hood with existing metal bulkhead |
| ■ Rear side assembly with click and mate frame | ■ Can build cable assemblies in a separate location then panel and then simply integrate in final assembly | ■ Improved assembly production flow and throughput |
| ■ Modular production process for thread bushings | ■ Less part numbers to accommodate various gauge requirements | ■ Volume pricing advantage |
