

1029CNH 10.1" IP65 Water Resistant, Sunlight Readable, Capacitive Touchscreen LCD Monitor with HDMI, DVI, VGA & AV Inputs

Description

Expanding its product line into previously uncharted territories, Xenarc Technologies Corp. presents the first in its class **10.1" direct sunlight readable, IP65 dust/splash proof, capacitive touchscreen display monitor** with built-in waterproof speakers. The 1,000 NIT rated brightness of this water and dust resistant **10.1" industrial display** makes it ideal for tough outdoor applications under direct sunlight, and also protects from environmental hazards with its IP65 certified casing.

This rugged, heavy duty **10.1" industrial display unit** is available with **Optical Bonding** and an **IP67** rating with the 1029GNH.

The 1029CNH offers all of the innovation and inputs as our 1020 series models along with a **Capacitive touchscreen panel**. **Capacitive sensing** provides a more responsive touch interface than resistive touch. It achieves this by using the capacitance of human skin to detect the proximity or position of the input. Proximity sensing allows the touch interaction to work even if protective glass or coating is used over the display. The **IP65 rating** on the **10.1" industrial display** provides for protection against solid objects and liquids. This **10.1" industrial display monitor** is guaranteed to prevent any amount of dust from entering the device, making it completely dust proof. Further, it is guaranteed to protect from water projected from a nozzle from having any harmful effect.

Why do our ruggedized products outlast others in extreme conditions? Why do our products have a wider temperature range and a wider voltage input range? It is because our mission is to offer our customers the best products for any situation. By utilizing high grade components, this display is perfect for industrial and in-vehicle applications or any other applications where a small, durable, environmentally rugged display is required, including but not limited to:
