

User Manual  
SKU: ABX00109

## Description

The Modulino® Pixels features **eight LC8822-2020 RGB LEDs** driven by an on-board **STM32C011F4** microcontroller. This setup enables simple I2C connectivity for controlling colorful visual effects, animations, or status indications in a wide variety of projects.

## Target Areas

Maker, beginner, education

## 1 Application Examples

- **Colorful Displays** Create dynamic LED patterns, color indicators, or simple pixel-art displays.
- **Notifications & Alerts** Represent sensor data or status updates (e.g., temperature ranges, motion detection) via color-coded lights.
- **Interactive Installations** Combine with other Modulino® nodes (e.g., Knob or Buttons) to build interactive lighting dashboards or IoT displays.

## 2 Features

- **Eight LC8822-2020 RGB LEDs** providing individually addressable full-color output.
- **STM32C011F4** microcontroller that manages LED control over I2C.
- **3.3V** operation via the Qwiic interface; supports 2.0V–3.6V supply range on the MCU.
- **SWD** header for reprogramming and advanced control.
- Ideal for **lighting effects, progress bars**, or any **multi-color** output in maker projects.

### 2.1 Contents

SKU	Name	Purpose	Quantity
ABX00109	Modulino® Pixels	8x individually addressable RGB LEDs	1
	I2C Qwiic cable	Compatible with the Qwiic standard	1

## 3 Related Products

- *SKU: ASX00027* – Arduino® Sensor Kit
- *SKU: K000007* – Arduino® Starter Kit
- *SKU: AKX00026* – Arduino® Oplà IoT Kit

## 4 Rating

### 4.1 Recommended Operating Conditions

- **Microcontroller supply range:** 2.0V – 3.6V (STM32C011F4)
- **Powered at 3.3V** through the Qwiic interface (in accordance with the Qwiic standard)
- **Operating temperature:** -40 °C to +85 °C

#### Typical current consumption:

- Up to **33 mA per RGB LED** at full brightness \* 8 LEDs (264 mA total), plus ~3.4 mA for the microcontroller. Actual usage depends on brightness and color settings.

## 5 Power Tree

The power tree for the modulino can be consulted below:

## 6 Block Diagram

This module includes an STM32C011F4 microcontroller managing eight LC8822-2020 RGB LEDs. It communicates with the host via I2C by default but can be reprogrammed via SWD for custom functionality.

Modulino® Pixels block diagram

## 7 Functional Overview

The Modulino® Pixels node uses the on-board **STM32C011F4** to handle LED data and provide an I2C interface. Each of the eight **LC8822-2020 RGB LEDs** can be addressed and controlled individually for color and brightness. Advanced users may reprogram the MCU (via SWD) to alter LED control logic or to interface via other protocols.

### 7.1 Technical Specifications

Specification	Details
<b>Microcontroller</b>	STM32C011F4 (handles I2C, LED driving logic)
<b>LEDs</b>	8× LC8822-2020 RGB LEDs
<b>Supply Voltage</b>	3.3 V
<b>Power Consumption</b>	~80 mA
<b>Communication</b>	I2C (Qwiic), SWD (debug/reprogram), optional UART/SPI if reprogrammed

## 7.2 Pinout

### Qwiic / I2C (1x4 Header)

Pin	Function
GND	Ground
3.3V	Power Supply (3.3V)
SDA	I2C Data
SCL	I2C Clock

These pads and the Qwiic connectors share the same I2C bus at 3.3V.

### Additional 1x10 Header (LED & MCU Signals)

Pin	Function
GND	Ground
GND	Ground
3V3	3.3 V Power
RESET	Reset
SWCLK	SWD Clock
SWDIO	SWD Data
TX1	USART Transmit
RX1	USART Receive
D0	Pixels Data Out
C0	Pixels Clock Out

Legend:		Digital	I2C	Other SERIAL		
Power						
Ground						
		Analog	SPI		Analog	
		Main Part		UART/USART		PWM/Timer

Modulino Pixels  
 SKU code: ABX00199  
 Pinout  
 Last update: 18 Jun, 2024

### Pinout Overview

The header can be used to add more LC8822-2020 RGB's LED in a daisy chain configuration. Built-in LEDs open for extension

It also has other I2C interface controller IC pins usable for other purposes or for reprogramming it using its SWD interface. These provide a place to mount header pins if desired.

LED extension

### 7.3 Power Specifications

- **Nominal operating voltage:** 3.3V via Qwiic
- **MCU voltage range:** 2.0V-3.6V

### 7.4 Mechanical Information

Modulino® Pixels Mechanical Information

- Board dimensions: 41 mm × 25.36 mm
- Thickness: 1.6 mm ( $\pm 0.2$  mm)
- Four mounting holes ( $\varnothing 3.2$  mm)
  - Hole spacing: 16 mm vertically, 32 mm horizontally

## 7.5 I2C Address Reference

Board Silk Name	Sensor/Actuator	Modulino I2C Address (HEX)	Editable Addresses (HEX)	Hardware I2C Address (HEX)
MODULINO PIXELS	8x LC8822-2020 RGB LEDs	0x6C	Any custom address (via FW config)	0x36

**Note:** Default address is **0x6C**. You can change it via the Modulino® library or custom firmware. A white rectangle on the board silk can be used to record a new address.

*Blank silk for identification*

## 8 Device Operation

By default, this node operates as an I2C target device on the Qwiic bus. The integrated microcontroller receives LED control commands and drives each of the eight LC8822-2020 RGB LEDs. For advanced usage, you may reprogram the microcontroller to add different communication protocols or custom LED driving modes.

Use any 3.3V microcontroller or Arduino board. The official Modulino® libraries facilitate controlling the RGB LEDs with easy I2C commands to set colors, brightness, or special effects. Make sure your power supply can handle the current draw if driving all LEDs at full brightness.

## Certifications

### 9 Certifications Summary

Certification	Status
CE/RED (Europe)	Yes
UKCA (UK)	Yes
FCC (USA)	Yes
IC (Canada)	Yes
RoHS	Yes
REACH	Yes
WEEE	Yes

### 10 Declaration of Conformity CE DoC (EU)

We declare under our sole responsibility that the products above are in conformity with the essential requirements of the following EU Directives and therefore qualify for free movement within markets comprising the European Union (EU) and European Economic Area (EEA).

## 11 Declaration of Conformity to EU RoHS & REACH 211

### 01/19/2021

Arduino boards are in compliance with RoHS 2 Directive 2011/65/EU of the European Parliament and RoHS 3 Directive 2015/863/EU of the Council of 4 June 2015 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Substance	Maximum limit (ppm)
Lead (Pb)	1000
Cadmium (Cd)	100
Mercury (Hg)	1000
Hexavalent Chromium (Cr6+)	1000
Poly Brominated Biphenyls (PBB)	1000
Poly Brominated Diphenyl ethers (PBDE)	1000
Bis(2-Ethylhexyl) phthalate (DEHP)	1000
Benzyl butyl phthalate (BBP)	1000
Dibutyl phthalate (DBP)	1000
Diisobutyl phthalate (DIBP)	1000

Exemptions: No exemptions are claimed.

Arduino Boards are fully compliant with the related requirements of European Union Regulation (EC) 1907 /2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). We declare none of the SVHCs (<https://echa.europa.eu/web/guest/candidate-list-table>), the Candidate List of Substances of Very High Concern for authorization currently released by ECHA, is present in all products (and also package) in quantities totaling in a concentration equal or above 0.1%. To the best of our knowledge, we also declare that our products do not contain any of the substances listed on the "Authorization List" (Annex XIV of the REACH regulations) and Substances of Very High Concern (SVHC) in any significant amounts as specified by the Annex XVII of Candidate list published by ECHA (European Chemical Agency) 1907 /2006/EC.

## 12 Conflict Minerals Declaration

As a global supplier of electronic and electrical components, Arduino is aware of our obligations with regard to laws and regulations regarding Conflict Minerals, specifically the Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502. Arduino does not directly source or process conflict minerals such as Tin, Tantalum, Tungsten, or Gold. Conflict minerals are contained in our products in the form of solder or as a component in metal alloys. As part of our reasonable due diligence, Arduino has contacted component suppliers within our supply chain to verify their continued compliance with the regulations. Based on the information received thus far we declare that our products contain Conflict Minerals sourced from conflict-free areas.

## 13 FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

### FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.
3. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator & your body.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

English: User manuals for license-exempt radio apparatus shall contain the following or equivalent notice in a conspicuous location in the user manual or alternatively on the device or both. This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. this device may not cause interference.

2. this device must accept any interference, including interference that may cause undesired operation of the device.

French: Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. l'appareil n'edoit pas produire de brouillage.
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

#### IC SAR Warning:

English: This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

French: Lors de l'installation et de l'exploitation de ce dispositif, la distance entre le radiateur et le corps est d'au moins 20 cm.

**Important:** The operating temperature of the EUT can't exceed 85 °C and shouldn't be lower than -40 °C.

Hereby, Arduino S.r.l. declares that this product is in compliance with essential requirements and other relevant provisions of Directive 2014/53/EU. This product is allowed to be used in all EU member states.
