
LAN937x AUTOSAR Driver

Author: Brigham Steele
Microchip Technology Inc.

INTRODUCTION

The LAN937x AUTOSAR driver is a software library developed by Microchip. This software library is designed to be integrated into an AUTOSAR ecosystem. The AUTOSAR or Automotive Open System Architecture is used by many components in the automotive industry. Microchip provides an Ethernet switch driver that conforms to the Communication Abstraction layer utilizing the communication and IO drivers.

The LAN937x switch does not have an internal switch management processor, giving users some flexibility to select the right size of processor and operating system for every application.

This document covers a step-by-step procedure for integrating the Microchip AUTOSAR into large AUTOSAR systems.

AUTOSAR DRIVER INTEGRATION FOR THE LAN937X DRIVER

The Microchip software is not a complete AUTOSAR solution. It is only a piece of the larger AUTOSAR ecosystem. To evaluate and test the Microchip LAN937x switch, it needs to be integrated into an AUTOSAR system. Below are the steps for integrating the LAN937x switch into larger AUTOSAR systems.

1. Step 1: Choose an AUTOSAR vendor.

There are many AUTOSAR systems offered by solution vendors. Select the right vendor and solution that fit application needs. The following is a list of known AUTOSAR vendors:

- Elektrobit
- Vector
- Mentor Graphics®

2. Step 2: Choose the processor and operating system supported by the AUTOSAR vendor.

Once the system is selected with the proper development environment, users need to select the appropriate processor that can run the AUTOSAR code. Microchip provides evaluation boards with SPI, MIIM, and RMII™ interface connections to the switch for system prototyping. The AUTOSAR driver code was written specifically for SPI management of the switch.

3. Step 3: Secure the Microchip Switch Driver code.

Microchip issues the source code for the AUTOSAR driver through the local Sales and Support team. It also provides support for AUTOSAR v4.3.1 and 19-11 versions. (See [Note](#).) The source code needs to be integrated into the final AUTOSAR system.

Note: PTP API calls are only supported on versions 19-11.

4. Step 4: Integrate the code into the AUTOSAR system. [Table 1](#) details the API call functions provided.

TABLE 1: API FUNCTIONS

| Function Call Group | API Function Call |
|-----------------------------|-------------------------------------|
| Switch Functional API Calls | EthSwt_Init |
| | EthSwt_SwitchInit |
| | EthSwt_GetSwitchReg |
| | EthSwt_SetSwitchReg |
| | EthSwt_GetArlTable |
| | EthSwt_SetMacLearningMode |
| | EthSwt_GetMacLearningMode |
| | EthSwt_GetSwitchIdentifier |
| | EthSwt_SetForwardingMode |
| | EthSwt_EnableVlan |
| | EthSwt_GetVersionInfo |
| | EthSwt_GetPortMacAddr |
| | EthSwt_SetPortMirrorState |
| | EthSwt_GetPortMirrorState |
| | EthSwt_ReadPortMirrorConfiguration |
| | EthSwt_WritePortMirrorConfiguration |
| | EthSwt_GetBufferLevel |

Note 1: For versions 19-11 only.

2: gPTP functionality is supported at the timestamp level only. The higher-level implementation will need to come from the AUTOSAR application selected.

TABLE 1: API FUNCTIONS (CONTINUED)

| Function Call Group | API Function Call |
|---|--|
| PHY Config API Calls | EthSwt_ReadTrcvRegister |
| | EthSwt_WriteTrcvRegister |
| | EthSwt_SetSwitchPortMode |
| | EthSwt_GetSwitchPortMode |
| | EthSwt_StartSwitchPortAutoNegotiation |
| | EthSwt_GetLinkState |
| | EthSwt_GetBaudRate |
| | EthSwt_GetDuplexMode |
| | EthSwt_GetPortIdentifier |
| Stats API Calls | EthSwt_GetCounterValues |
| | EthSwt_GetRxStats |
| | EthSwt_GetTxStats |
| | EthSwt_GetTxErrorCounterValues |
| Diagnostic API Calls | EthSwt_SetPortTxMode |
| | EthSwt_SetPortLoopbackMode |

NOTES:

THE MICROCHIP WEB SITE

Microchip provides online support via our WWW site at www.microchip.com. This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQ), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at www.microchip.com. Under "Support", click on "Customer Change Notification" and follow the registration instructions.

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or Field Application Engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at: <http://microchip.com/support>

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods being used in attempts to breach the code protection features of the Microchip devices. We believe that these methods require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Attempts to breach these code protection features, most likely, cannot be accomplished without violating Microchip's intellectual property rights.
- Microchip is willing to work with any customer who is concerned about the integrity of its code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable." Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.
