

## Bourns Releases New AEC-Q200 Compliant, Automotive Grade High Operating Temperature Semi-shielded Power Inductors

### Model SRN8040HA Series

Riverside, California – **TO BE RELEASED JUNE 22, 2023** – Bourns Magnetics Product Line is introducing the new AEC-Q200 compliant, automotive grade Model SRN8040HA Series Semi-shielded Power Inductors. Constructed with a magnetic-silica coating to the perimeter of the inductor winding to provide effective shielding, these inductors release lower magnetic field radiation compared to non-shielded inductors and are a more cost-efficient alternative to fully shielded ferrite-based inductors.

The Model SRN8040HA Series is designed to meet a broad operating temperature range from -40 to +150 °C and features high operating temperature capabilities. These inductors are well suited for DC-DC converters and power supplies in automotive, consumer, industrial, and telecom electronics applications in which higher inductor reliability may be required.

#### Characteristics:

Model Series	Size (mm)	Inductance (μH)	Heating Current $I_{rms}$ (A)	Saturation Current $I_{sat}$ (A)	Operating Temperature (°C)
SRN8040HA	7.9 x 8.15 x 4.2	0.5 - 100	1 - 10	1.3 - 15	-40 to +150

#### Features

- Semi-shielded construction
- High operating temperature
- AEC-Q200 compliant
- RoHS compliant\* and halogen free\*\*
- **AUTOMOTIVE GRADE** 

#### Applications

- DC-DC converters
- Power supplies in automotive, consumer, industrial and telecom electronics
