

Ethernet

Power over Ethernet (PoE) Powered Device (PD) Surge Protection

Bourns® PortNote® solutions provide protection recommendations for typical port threats.

Solution Products

SM51589PEL

TCS-DL004-250-WH

CDSOD323-T05LC

GMOV-14D500K

5.0SMDJ64A

CD-MBL108S

MH3261-601Y

Request Sample

Objective

Power over Ethernet (PoE) interfaces combine V_{PP} differential signals and nominal 48 V_{DC} power. This solution provides protection for both the data and power signals and is compatible with 10/100/1000 Base-T.

Compliance

ITU-T K.20, K.21, K.45 for Basic levels
Telcordia GR-1089-CORE Issue 7 Port Type 4

Solution

- 1 Quad Transformer: SM51589PEL
- 4 TCS™ High-Speed Protectors: TCS-DL004-250-WH
- 4 TVS Diodes: CDSOD323-T05LC
- 2 Metal Oxide Varistors (GMOVs): GMOV-14D500K
- 1 TVS Diode: 5.0SMDJ64A
- 1 Bridge Rectifier Diode: CD-MBL108S
- 1 Chip Ferrite Bead: MH3261-601Y

Alternate Recommendations

Other PortNote® Solutions:

- Ethernet - ESD Protection
- Ethernet - 10/100 Base-T Power over Ethernet (PoE) PD Unit Protection
- Ethernet - 10/100 Base-T Power over Ethernet (PoE) PSE Unit Protection

Variations of this circuit are available depending on specific design constraints; contact your local Bourns technical representative for more information.

Benefits

The Bourns® TCS™ High-Speed Protector and TVS Diode combination provide robust surge protection without impairing the Ethernet signal. In addition, the transformer offers robust insulation for common mode surge protection.

The schematic here illustrates the application protection and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.
