

**INTEGRATED ENGINEERED MATERIALS & THERMAL MANAGEMENT SOLUTIONS***Empowering the Next Generation of Innovation****Thermal Sil-Free Plus Grease*****Enterprise Electronics • Power Electronics • Industrial • Transportation**

Sil-Free Plus Grease is a non-silicone thermal grease with the lowest thermal resistance on the market for thin bond line applications. Sil-Free Plus Grease is also extremely durable and will not pump-out, making it ideal for all applications requiring extended life and no degradation.

**FEATURES & BENEFITS**

- High conductivity
- Low thermal resistance
- Non-silicone based
- Non-reactive
- Non-abrasive
- Thixotropic behavior & excellent dielectric properties
- Zero pump-out
