## 1. Introduction

This application note describes the features and functions of Cincon's CFM300M series of open frame, switching AC-DC power module. These are highly efficient, reliable, compact, high power density, single output AC/DC power modules. The module is fully protected against short circuit and over-voltage conditions. Cincon's world class automated manufacturing methods, together with an extensive testing and qualification program, ensure that the CFM300M series power module is extremely reliable.

## 2. CFM300M Series Converter Features

- Universal Input Range 90~264Vac
- 3"x 5" Compact Size/CFM300M
- 250W with natural convection @ 220Vac/CFM300M
- 300W with natural convection @ 220Vac/CFM300MXXXC
- Meets EN55011 Class B
- Meets 2MOPP
- Active PFC Meets EN61000-3-2
- High Efficiency Up to 94% Typical
- High Power Density Up to 14.1W/Inch<sup>3</sup>
- Remote Voltage Sense
- PS On/Off Remote Control
- +5V Stand-by Output Power
- 12V fan output
- No load power consumption < 0.3W

### 4. Technical Specifications

(All specifications are typical at nominal input, full load at 25°C unless otherwise noted.)

ABSOLUTE MAXIMUM RATINGS						
PARAMETER	NOTES and CONDITIONS	Device	Min.	Typical	Max.	Units
Input Voltage (Continuous)		All	90		264	Vac
Operating Temperature	See derating curve	All	-40		+80	°C
Storage Temperature		All	-40		+85	°C
INPUT CHARACTERISTICS						
PARAMETER	NOTES and CONDITIONS	Device	Min.	Typical	Max.	Units
Operating Voltage Range		All	100		240	Vac
Input Frequency Range		All	47		63	Hz
Maximum Input Current	100% Load, Vin=100Vac	All			4	A
Leakage Current		All			300	uA
Leakage Current (Enclosure Leakage)		All			100	uA
Leakage Current (Patient Leakage)		All			100	uA
Inrush Current	Vin=240Vac, cold start at 25°C.	All			30	A
OUTPUT CHARACTERISTICS						
PARAMETER	NOTES and CONDITIONS	Device	Min.	Typical	Max.	Units
Output Voltage Set Point	Vin=Nominal Vin, Io=Io .max, Tc=25°C.	CFM300M120/120C	11.4	12	12.6	Vdc
		CFM300M240/240C	22.8	24	25.2	
		CFM300M360/360C	34.2	36	37.8	
		CFM300M480/480C	45.6	48	50.4	
Operating Output Current Range		CFM300M120/120C			25	A
		CFM300M240/240C			12.5	
		CFM300M360/360C			8.34	
		CFM300M480/480C			6.25	
Holdup Time	Vin=115Vac(typ.)	All		20		ms
Output Voltage Regulation						
Load Regulation	10% load to full load	All			±1.0	%
Line Regulation	Vin=high line to low line	All			±0.5	%
Over Current Protection	Hiccup mode(Auto Recovery)	All	130	150	180	%
Over Voltage Protection	Latch mode	CFM300M120/120C		15		Vdc
		CFM300M240/240C		30		
		CFM300M360/360C		43		
		CFM300M480/480C		56		
Over Temperature Protection	The temperature of C37(Auto Recovery)	All			110	°C
Output Ripple and Noise	1. Add a 0.1uF ceramic capacitor and a 10uF aluminum electrolytic capacitor to output. 2. Oscilloscope is 20MHz band width. 3. Ambient temperature=25°C	CFM300M120/120C			120	mVp-p

# CFM300M Series

## Application Note V12 July 2018

### 5. Main Features and Functions

#### 5.1 Operating Temperature Range

The highly efficient design of Cincon's CFM300M series power modules has resulted in their ability to operate within ambient temperature environments from  $-40^{\circ}\text{C}$  to  $80^{\circ}\text{C}$ . Due consideration must be given to the de-rating curves when ascertaining the maximum power that can be drawn from the module. The maximum power which can be drawn is influenced by a number of factors, such as

- Input voltage range
- Permissible Output load (per derating curve)
- Effective heat sinks

#### 5.2 Output Protection (Over Current Protection)

The power modules provide full continuous short-circuit protection. The unit will auto recover once the short circuit is removed. To provide protection in a fault condition, the unit is equipped with internal over-current protection. The unit will operate normally once the fault condition is removed. The power module will go to hiccup mode if the output current is set from 130% to 180% of rated current.

### 6. EMC & Safety

#### ■ Emission and Immunity

EN55011 Class B, IEC61000-3-2, IEC61000-3-3, EN55024, FCC Part 18, IEC61000-4-2, IEC61000-4-3, IEC61000-4-4, IEC61000-4-5, IEC61000-4-6, IEC61000-4-8, IEC61000-4-11,

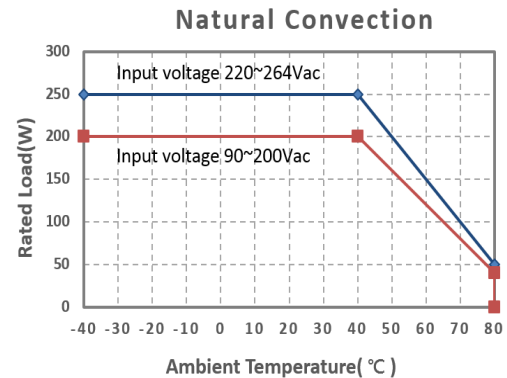

#### ■ Safety (Medical 3.1<sup>rd</sup>)

Class I, IEC60601-1, EN60601-1, UL60601-1

## Application Note V12 July 2018

### 7.2 Test Set-Up

The basic test set-up to measure parameters such as efficiency and load regulation is shown in Figure 1. When testing the Cincon's CFM300M series under any transient conditions, please ensure that the transient response of the source is sufficient to power the equipment under test. We can calculate the

- Efficiency
- Load regulation and line regulation.

The value of efficiency is defined as:

$$\eta = \frac{V_o \times I_o}{P_{in}} \times 100\%$$

Where:

$V_o$  is output voltage

$I_o$  is output current

$P_{in}$  is input power

The value of load regulation is defined as:

$$\text{Load reg.} = \frac{V_{FL} - V_{NL}}{V_{NL}} \times 100\%$$

Where:

$V_{FL}$  is the output voltage at full load

$V_{NL}$  is the output voltage at 10% load

The value of line regulation is defined as:

$$\text{Line reg.} = \frac{V_{HL} - V_{LL}}{V_{LL}} \times 100\%$$

Where:

$V_{HL}$  is the output voltage of maximum input voltage at full load.

$V_{LL}$  is the output voltage of minimum input voltage at full load.

Figure 1. CFM300M Series Test Setup

### 7.3 Output Ripple and Noise Measurement

The test set-up for noise and ripple measurements is shown in Figure 2. Measured method:

Add a 0.1 uF ceramic capacitor and a 10 uF electrolytic capacitor to output at 20 MHz Band Width.

Figure 2. Output Voltage Ripple and Noise Measurement Set-Up

### 7.4 Installation Instruction

The CFM300M & CFM300MXXXC series has four 4mm diameter mounting holes. There are three type installations for CFM300M & CFM300MXXXC. Please use the mounting holes as follows:

Insert the spacer (4mm diameter max.) of 8mm height or more to mount the unit. The vibration specification applies when the unit is mounted on 8mm spacers

# CFM300M Series

## Application Note V12 July 2018

The torque of CFM300M & CFM300M-C as follows:

The torque of output connectors are 3kgf-cm and the connectors mate with round or Y terminal. The maximum outer diameter of the terminals are 6.75mm and the maximum inner diameter are 3.9mm. When locking the round terminal or Y terminal to output connectors, the terminals should not touch other parts to avoid short.

Please allow 4mm side clearance from the components and all side of the PCB. Allow 5mm clearance above the highest parts on the PCB. Be especially careful to allow 8mm between the solder side of the PCB and the mounting surface. If the clearances are not sufficient, the specifications for isolation and withstand will not be valid.

FG should be connected to the earth (ground) terminal of the apparatus. If not, the conducted noise and output noise will increase.

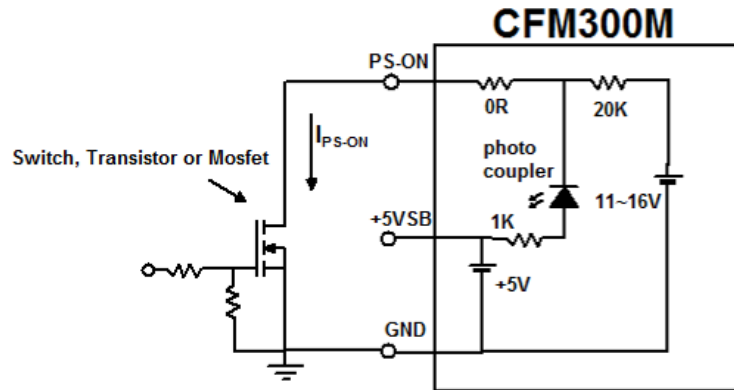

# CFM300M Series

## Application Note V12 July 2018

### 7.5. PS On/Off Remote Control

A PS On/Off remote control is provided in CN4. The PS-ON diagram and control function is shown as follow.

Power On:  $V_{PS-ON} \leq 2V$ ,  $I_{PS-ON} \geq 2mA$

(PS-ON and GND short,  $I_{PS-ON} = 4.5 mA$  typical)

Power Off: Open circuit,  $V_{PS-ON} = 11 \sim 16V$

When the PS On/Off remote control function is not used, connect a short circuit between the PS-ON control and the signal GND

CN4:  
PIN CONNECTION

Pin	Function

4	+5VSB
5	GND
6	PS-ON

# CFM300M Series

## Application Note V12 July 2018

### 7.6. Output Remote Sensing

The CFM300M SERIES converter has the capability to remotely sense both lines of its output. This feature moves the effective output voltage regulation point from the output of the unit to the point of connection of the remote sense pins. This feature automatically adjusts the real output voltage of the CFM300M series in order to compensate for voltage drops in distribution and maintain a regulated voltage at the point of load. The remote-sense voltage range is:

$$[(+V_{out}) - (-V_{out})] - [(+Sense) - (-Sense)] \leq 5\% \text{ of } V_{o\_nominal}$$

If the remote sense feature is not to be used, the sense pins should be connected locally. The +Sense pin should be connected to the +Vout pin at the module and the -Sense pin should be connected to the -Vout pin at the module. A Remote Sensing is provided in CN4

This is shown in the schematic below.
