Reference Coronavirus COVID-19 update
Date 14 April 2020
Page 1 of 1

HUBER+SUHNER, Inc. is continuing to proactively deal with the impact of the coronavirus pandemic. Our Charlotte facility remains open and in full operation. At the request of local government, all office positions are currently working remotely while the warehouse is fully operational. As we had previously communicated, our Mexico manufacturing facility is again operational at reduced staffing and capacity. We are complying with the local authorities and maintaining operations for Medical and Telecommunication products and customers only.

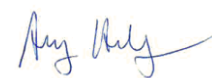

We have been alerted today that our H+S Astrolab facility in Warren, NJ has had a number of personnel test positive for the COVID-19 virus. Additionally, there are several team members in isolation with symptoms. Out of concern for the health and safety of our employees we will be suspending on-site operations at our site in New Jersey for the next two weeks with a planned re-opening date of April 27, 2020.

HUBER+SUHNER continues to be focused on business continuity and trying to minimizing disruptions for all customers globally. Our task force meets daily to adjust to continuing manufacturing and logistic changes at our facilities worldwide. Where possible, we will be shifting manufacturing locations for orders that are impacted by this latest change.

For specific order updates, please contact your CSR or local Account Manager.

We thank you for your patience and understanding during this time of uncertainty. We hope you and your loved ones remain healthy. We thank you for being a part of the HUBER+SUHNER family.

Kind regards,

Andy Hollywood
