

E3K WallySci Bio-Sensing Platform

E3K-COMBO

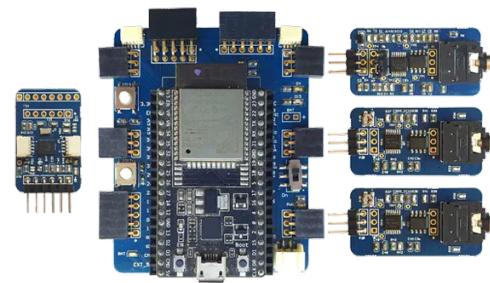

Product Overview

01-13-2023

For the most up-to-date information, visit www.mouser.com or the supplier's website.

Description

Crowd Supply WallySci E3K Bio-Sensing Platform provides an affordable, fully open-source, wireless framework for an intuitive understanding of bio-signals originated from the human heart, muscle, and brain. This platform features various modules, including Wi-Fi and BLE-enabled Data Communication and Processing Unit (DCPU), Electromyography (EMG) sensor, Electrocardiography (ECG) sensor, and Electroencephalography (EEG) sensor. This bio-sensing platform also includes a 9-DoF Inertial Measurement Unit (IMU) to capture motion. Combined with the firmware and data collection software, these modules enable a reliable and high data acquisition rate. The WallySci E3K bio-sensing platform GUI allows configuring each channel and collecting data without requiring coding. The modularity feature of the platform allows the E3K to be configured into a bio-signal acquisition tool.

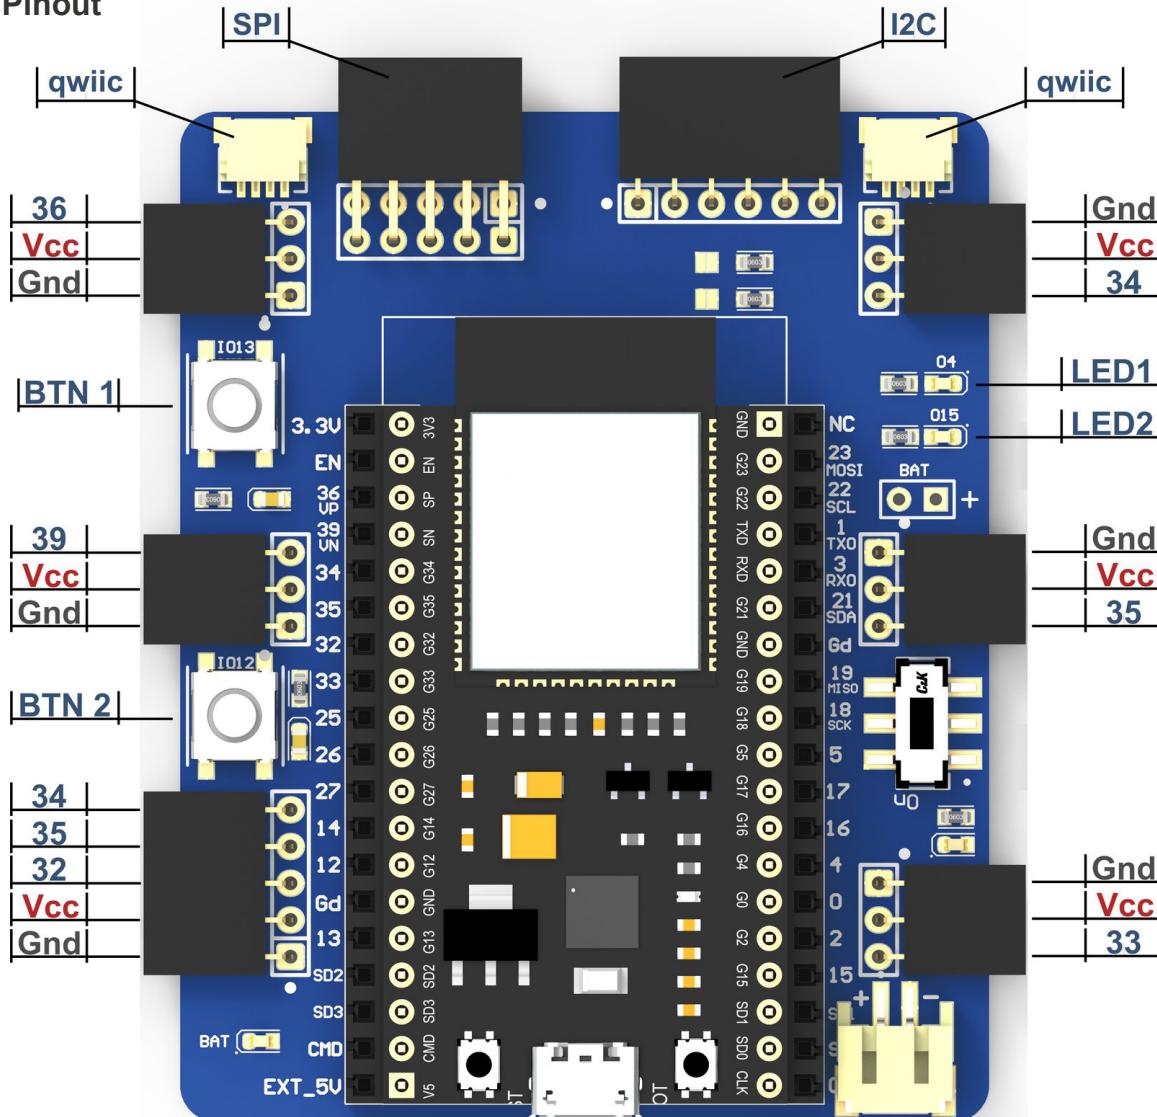

The WallySci E3K bio-sensing platform supports widely used communication protocols like UART, I²C, and SPI and provides ten GPIO pins, six analog pins, and two DACs. All the ports are based on Commercial Off-The-Shelf (COTS) connectors pre-soldered on the boards. This platform is ideal for developing healthcare or wearable device.

Features

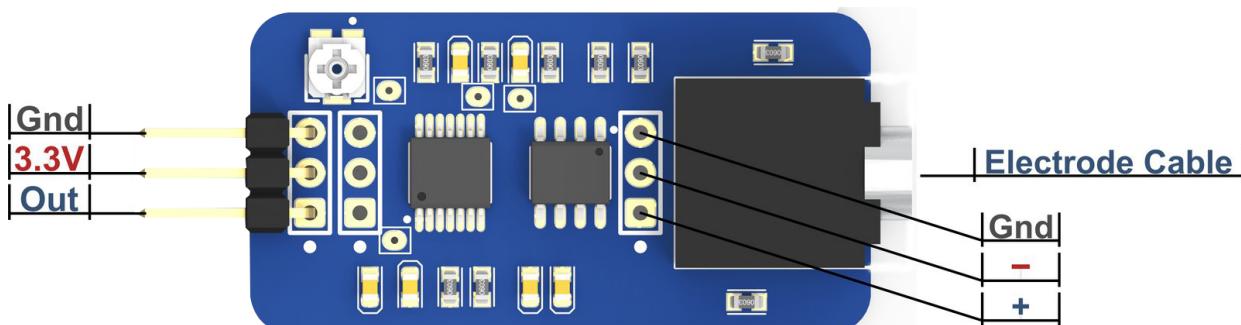

- Modules:
 - Wi-Fi and BLE enabled Data Communication and Processing Unit (DCPU)
 - Electromyography (EMG) sensor to capture muscle movements
 - Electrocardiography (ECG) sensor to capture heart signals
 - Electroencephalography (EEG) sensor to capture brain activity
 - 9-DoF Inertial Measurement Unit (IMU) to capture motion
- Interactive Graphical User Interface (GUI)
- Communication protocols supported:
 - UART, I²C, and SPI
 - 10x GPIO pins
 - 6x analog pins
 - 2x DACs
- Impressive Signal-to-Noise Ratio (SNR)
